Re: 2021 Updated Housing Needs Assessment – Evansville, Indiana

Dear Ms. Bailey,

Bowen National Research is pleased to provide you with the updated Housing Needs Assessment of the city of Evansville we completed on the City's behalf. This update includes the following elements from the latest *full* Housing Needs Assessment that was completed in March of 2020:

- Updated Demographic and Economic Trends
- Updated Housing Supply (Rental, For-Sale and Senior Living)
- Updated Residential Pipeline Information (Planned and Proposed)
- Revised Housing Gap/Demand Estimates
- Updated Submarket Overviews

While this draft of the report includes all required work elements, we certainly will respond to any changes or additions you may require.

We have enjoyed working on this project again and look forward to hearing from you.

Respectfully,

Patrick M. Bowen  
President

Enc.

# HOUSING NEEDS ASSESSMENT UPDATE

Evansville, Indiana

2021

**BOWEN**  
NATIONAL  
RESEARCH

## TABLE OF CONTENTS

- I. Introduction
- II. Executive Summary
- III. Study Area Delineation
- IV. Demographic Analysis
- V. Economic Analysis
- VI. Housing Supply Analysis
- VII. Housing Gap/Demand Analysis
- VIII. Subarea/Neighborhood Analysis
  - Addendum A – Telephone Survey of Senior Facilities
  - Addendum B – Telephone Survey of Conventional Rentals
  - Addendum C – Non-Conventional Rentals
  - Addendum D – Glossary
  - Addendum E – Qualifications
  - Addendum F – Sources

# **I. INTRODUCTION**

## **A. PURPOSE**

This Evansville Housing Needs Assessment involves an update of key work elements from previous Evansville Housing Needs Assessments completed by our firm on behalf of the City of Evansville (Indiana) Department of Metropolitan Development. The last update of the Housing Needs Assessment was completed March of 2020.

This updated report intends to:

- Present and evaluate past, current and projected detailed demographic characteristics of Evansville.
- Present and evaluate economic characteristics and trends of Evansville.
- Determine current characteristics of all major housing components within Evansville (for-sale/ownership and rental housing alternatives).
- Calculate a housing gap by tenure and income segment within Evansville.

By accomplishing the study's objectives, area stakeholders, local public officials, area employers, and private housing developers can: 1) better understand Evansville's evolving housing market, 2) modify or expand Evansville's housing policies, and 3) enhance and/or expand Evansville's housing market to meet future housing needs.

## **B. METHODOLOGIES**

The following methods were used by Bowen National Research to collect and analyze data for this study:

### **Study Area Delineation**

The primary geographic scope of this study is the city of Evansville (approximately 45 square miles), which is referred to as the Primary Study Area (PSA). Because of the size of the city and some of the unique attributes within portions of the city, we have divided the PSA into five separate submarkets: Central Submarket, East Submarket, Near East Submarket, North Submarket, and West Submarket. These five submarkets, which are compared with each other and with the overall city of Evansville, are delineated in Section III of this report. We have also provided analysis of three districts or designated areas in Section VIII, which include Downtown, the Arts District, and the Jacobsville Redevelopment District.

### **Demographic Information**

Demographic data for population, households, housing, crime, and employment was secured from ESRI, Incorporated, the 2000 and 2010 United States Census, Applied Geographic Solutions, U.S. Department of Commerce, and the American Community Survey. Estimates for 2020 and projections for 2025 are also provided. This data has been used in its primary form and by Bowen National Research for secondary calculations. All sources are referenced throughout the report and in Addendum F of this report.

### **Employment Information**

Employment information was obtained and evaluated for various geographic areas that were part of this overall study. This information included data related to wages by occupation, employment by job sector, total employment, unemployment rates, identification of top employers, and identification of large-scale job expansions or contractions. Most information was obtained through the U.S. Department of Labor, Bureau of Labor Statistics. However, Bowen National Research also conducted numerous interviews with local stakeholders familiar with employment characteristics and trends of the Evansville area.

### **Housing Component Definitions**

This study is concerned with two major housing components: 1) for-sale/ownership (both single-family and multifamily) and 2) rental (both multifamily apartments and smaller, non-conventional units). For-sale/ownership housing includes single-family homes and condominiums. Multifamily rentals include single-family homes and multifamily apartments (generally 20+ units per building). Note that for the purposes of this analysis, we provide supplemental senior care housing information, including congregate care, assisted living and nursing home market data.

### **Housing Supply Documentation**

During January and February of 2021, Bowen National Research conducted telephone research, as well as online research, to update key metrics of the Evansville housing supply. This research involved an update of the properties identified in our analysis and the addition of new properties. The following data was collected on each property.

1. Property Information: Name, address, total units, and number of floors
2. Owner/Developer and/or Property Manager: Name and telephone number
3. Population Served (i.e. seniors vs. family, low-income vs. market-rate, etc.)
4. Available Amenities/Features: Both in-unit and within the overall project
5. Years Built and Renovated (if applicable)
6. Vacancy Rates
7. Distribution of Units by Bedroom Type
8. Square Feet and Number of Bathrooms by Bedroom Type

9. Gross Rents or Price Points by Bedroom Type
10. Property Type
11. Quality Ratings\*
12. GPS Locations

\*Quality ratings used in this study were established after a careful examination of the housing properties and their surrounding neighborhoods. Factors influencing the ratings include curb appeal, unit and property amenities, age, interior and exterior building conditions, parking arrangements, architectural design, landscaping and grounds, management presence, accessibility, visibility, signage, public infrastructure, condition of adjacent properties, neighborhood interviews, and area services.

Information regarding for-sale single-family homes was collected by Bowen National Research in-office staff during the aforementioned research period. Home listings were gleaned from realtor.com and MLS listings.

### **Housing Demand**

Based on the demographic data for both 2020 and 2025, and taking into consideration the housing data from our field survey of area housing alternatives, we are able to project the potential number of *new* units the Evansville market can support.

- Rental Housing – We included renter household growth, the number of units required for a balanced market, and the need for replacement housing as the demand components for new rental housing units. As part of this analysis, we accounted for vacancies reported among all rental alternatives and considered product in the development pipeline. We concluded this analysis by providing the number of units that the market can support by three different income segments.
- For-Sale Housing – We considered potential demand from new owner-occupied household growth, the number of units required for a balanced market, and need for replacement housing in our estimates for new for-sale housing. We deducted the estimated number of available for-sale housing to yield a net support base of potential for-sale housing. Demand estimates were provided for three income stratifications.

### **C. REPORT LIMITATIONS**

The intent of this report is to collect and analyze significant levels of housing data for the city of Evansville, Indiana. Bowen National Research relied on a variety of data sources to generate this report (see Addendum F). These data sources are not always verifiable; however, Bowen National Research makes a concerted effort to assure accuracy. While this is not always possible, we believe that our efforts provide an acceptable standard margin of error. Bowen National Research is not responsible for errors or omissions in the data provided by other sources.

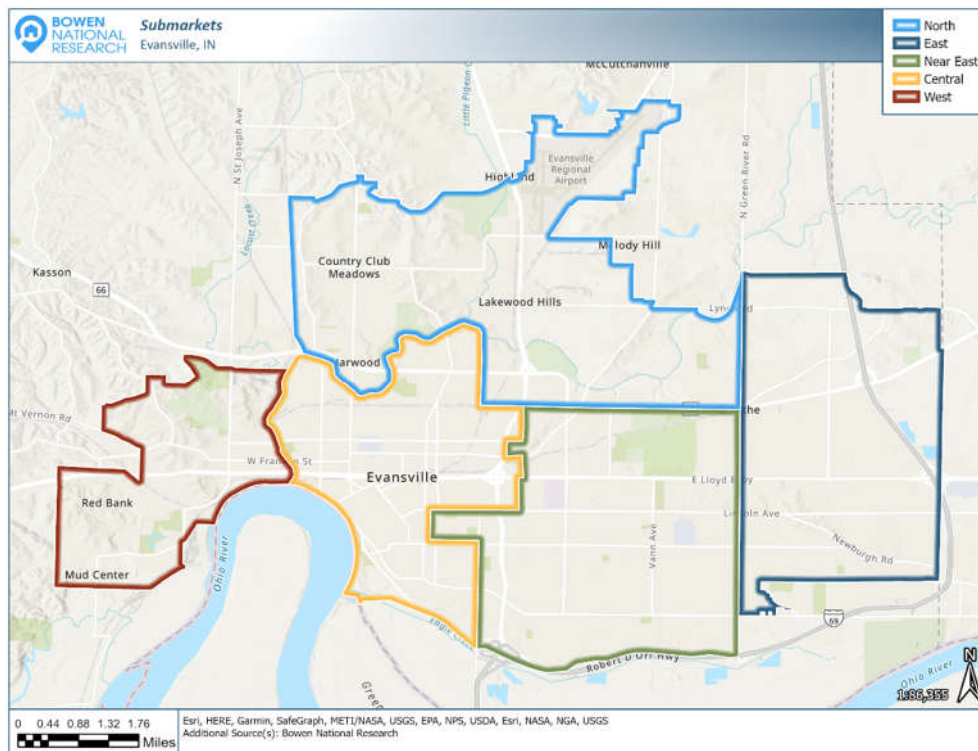

We have no present or prospective interest in any of the properties included in this report, and we have no personal interest or bias with respect to the parties involved. Our compensation is not contingent on an action or event resulting from the analyses, opinions, or use of this study.

## II. EXECUTIVE SUMMARY

**Purpose:** Bowen National Research was retained by the Evansville, Indiana Department of Metropolitan Development in late 2020 to conduct an update to the 2020 Comprehensive Housing Needs Assessment that we completed of the city of Evansville. This Executive Summary provides key findings and recommendations from this update.

**Work Elements:** The work elements incorporated into this updated report include an analysis of more than 100 demographic and economic metrics, a rental housing survey of 98 multifamily rental properties with a total of 12,246 units, a survey of 76 non-conventional rentals, a survey of 25 senior care facilities, an analysis of historical for-sale residential data on 16,047 homes sold since January 2010 and 168 currently available for-sale residential units, and a rental and for-sale housing gap analysis for various income segments. The study concludes with recommendations on potential residential opportunities that should be considered to meet Evansville's greatest housing needs.

**Study Areas:** The primary focus of this analysis involves assessing the housing needs of the city of Evansville, with additional consideration given to five submarkets comprising Evansville. Each study area is delineated in Section III of this report. An enlarged version of the map below is found on page III-3. A supplemental analysis of the Downtown, the Arts District and the Jacobsville Redevelopment Area is included in *Section VIII: Subarea-Neighborhood Analysis*.

**Demographic Characteristics and Trends:** The demographic picture of the Primary Study Area (Evansville) is diverse, contributing to a variety of housing product needs. Additionally, the PSA is expected to undergo notable changes within different household age, income and tenure segments that will have significant changes on the housing needs of Evansville. Key demographic characteristics and trends are summarized below:

- ***Overall Population and Household Growth have been Positive in the City Since 2010 and are Projected to Remain Positive for the Foreseeable Future*** – The PSA experienced population growth of 177 (0.1%) between 2010 and 2020 and household growth of 349 (0.7%). Between 2020 and 2025, the PSA is projected to add 674 (0.6%) people and 376 (0.7%) households. Excepting the West Submarket, household growth rates among the individual submarkets are projected to be positive, ranging from 0.3% (North Submarket) and 2.0% (East Submarket). This growth contributes to the need for additional housing.
- ***While a Vast Majority of Renter Households Earn less than \$50,000 Annually, Most of the Projected Growth is Expected to Occur Among Higher Income Households Earning Over \$50,000*** – In 2020, nearly three-quarters (74.1%) of all renter households have annual incomes below \$50,000. While this base is expected to decline over the next few years, the low-income household segment has limited available housing alternatives that are affordable to them, with many affordable properties maintaining long wait lists. Therefore, there is pent-up demand for rental housing that is affordable to these lower income households. It is projected that between 2020 and 2025 renter household growth in the PSA will only occur among households making \$50,000 or more, increasing by 1,816 (29.1%) during this time. The projected growth among renter households making \$50,000 or more from 2020 to 2025 ranges from 138 (14.0%) in the Central Submarket to 445 (16.2%) in the Near East Submarket. This growth will drive demand for additional market-rate rental alternatives.
- ***Higher Income Households Comprise a Majority of Homeowner Households, Which are Projected to Increase Significantly over the Next Several Years*** – By 2025, owner-occupied households making \$60,000 and higher will comprise over one-half (53.1%) of the PSA's owner households and are the only owner-occupied household income segments projected to increase. Between 2020 and 2025, households that make at least \$60,000 will increase by 1,652 (12.4%), while households earning less than \$60,000 will decrease by 1,611 (10.9%). These trends will drive demand for higher priced housing, generally priced above \$200,000. While a majority (74.4%) of the available homes in the market are priced below \$200,000, most of these homes are priced below \$100,000, are more than 40 years old, and likely require substantial repairs and/or modernization. These are additional costs that would be incurred by the homeowner, for which most low-income households could not afford.

- ***While Most Households are Under the Age of 65, Most Household Growth is Projected to Occur Among Households Ages 65 and Older and Between the Ages of 35 and 44*** – Nearly three-quarters (72.7%) of all households in the PSA (Evansville) in 2020 were headed up by persons under the age of 65. By 2025, 70.1% of the households in the PSA will be under the age of 65, while 29.9% will be ages 65 and older. Within the overall PSA, the greatest growth between 2020 and 2025 will be among households ages 65 and older. This age cohort is projected to increase by 1,488 (10.5%) in the overall PSA. This will increase the need for senior-oriented housing within each submarket. Notable growth (7.5%) is also projected to occur among the 35 to 44 age group, adding 636 such households to the PSA between 2020 and 2025. All submarkets are expected to experience growth among these older millennials.

Detailed demographic data of Evansville and its submarkets is included in Section IV of this report.

***Housing Supply:*** We have evaluated the age and condition of housing, the affordability of both rental and for-sale product, and inventoried rental, for-sale and senior care housing as part of this update. The following summarizes key findings. A full analysis of the existing housing stock is included in Section VI.

#### *Housing Age and Conditions*

The following table compares key housing age and condition of Evansville and its submarkets based on 2015-2019 ACS data. Housing units built over 50 years ago (pre-1970), overcrowded housing (1.01+ persons per room) or housing that lacks complete indoor kitchens or bathroom plumbing are illustrated for each study area by tenure in the following table. It is important to note that some occupied housing units may have more than one housing issue.

	Housing Age and Condition											
	Pre-1970 Product				Overcrowded				Incomplete Plumbing or Kitchen			
	Renter		Owner		Renter		Owner		Renter		Owner	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent
<b>North</b>	1,061	33.5%	3,529	54.5%	88	2.8%	43	0.7%	21	0.7%	16	0.2%
<b>East</b>	540	10.7%	1,563	35.6%	26	0.5%	15	0.3%	193	3.8%	15	0.3%
<b>Near East</b>	3,724	55.7%	8,133	86.3%	125	1.9%	89	0.9%	138	2.1%	54	0.6%
<b>Central</b>	4,122	76.2%	4,736	88.3%	121	2.2%	29	0.5%	134	2.5%	0	0.0%
<b>West</b>	1,280	47.4%	2,924	88.0%	49	1.8%	24	0.7%	18	0.7%	26	0.8%
<b>Evansville</b>	10,726	46.7%	20,884	72.1%	408	1.8%	200	0.7%	502	2.2%	203	0.7%

Source: 2015-2019 American Community Survey; ESRI; Urban Decision Group; Bowen National Research

Among the preceding categories, the greatest housing issue facing Evansville residents appears to be associated with older housing stock. A total of 10,726 occupied units, representing nearly one-half (46.7%) of renter-occupied housing units in Evansville were built prior to 1970, which have the potential for lead paint issues. This share is even higher among owner-occupied housing units in Evansville, with housing units built prior to 1970 representing nearly three-quarters (72.1%) of the ownership housing stock. Unsurprisingly, the well-established Central Submarket

has the highest share of renter- and owner-occupied units built prior to 1970. Other housing condition issues affect 2.2% or less of Evansville residents. It is worth noting that the East Submarket has a significantly higher share (3.8%) of renter-occupied product with incomplete kitchens or plumbing than the other submarkets.

### Housing Affordability

The following table compares key household income, housing cost, and affordability metrics of Evansville and its submarkets.

Household Income, Housing Costs, and Affordability						
Study Area	2020 Households	Median Household Income	Median Home Price (ESRI)	Average Gross Rent	Share of Cost Burdened Households*	
					Renter	Owner
North	9,518	\$52,135	\$123,262	\$798	43.7%	17.1%
East	9,704	\$47,549	\$173,624	\$877	46.7%	15.9%
Near East	16,275	\$41,282	\$90,685	\$778	46.0%	22.5%
Central	10,962	\$29,016	\$70,789	\$711	56.0%	25.7%
West	5,795	\$45,619	\$98,027	\$795	48.5%	15.6%
Evansville	52,255	\$41,993	\$101,117	\$789	48.5%	20.1%

Source: American Community Survey (2015-2019); ESRI

\*Paying more than 30% of income toward housing cost

As the preceding illustrates, Evansville's average gross rent is \$789, its median home price is \$101,117, and its median household income is \$41,993. The high shares of cost burdened renter (48.5%) and owner (20.1%) households in Evansville indicates that many households are paying a disproportionately high share of their income toward housing costs, likely due to a lack of affordable housing. Among the individual submarkets, the median home prices, average gross rents, and median household incomes are all lowest within the Central Submarket, followed by the Near East Submarket. Subsequently, the share of cost burdened households is highest in the Central Submarket. Additionally, the West Submarket has a lower average gross rent compared to the North and East submarkets, yet it has a slightly higher share of cost burdened renter households.

### Multifamily Apartment Rentals

Overall, Bowen National Research identified and personally surveyed 98 multifamily rental housing projects containing a total of 12,246 units within the PSA (Evansville). Because certain portions of the city of Evansville may exhibit rental housing characteristics or trends that may be unique, we have also evaluated the rental housing supply of Evansville based on five geographic submarkets (see Section III: Study Area Delineation for descriptions and maps of these submarkets). We have also provided historical occupancy information from 2014, 2016, 2018 and 2020 for comparison purposes. The following table summarizes the overall PSA's (Evansville) and submarkets' rental housing supply.

Overall Market Performance by Area						
	North	East	Near East	Central	West	Evansville
Projects Surveyed	11	25	23	30	10	98
Total Units	1,905	5,117	2,693	1,475	1,056	12,246
Vacant Units	8	205	80	53	14	359
<b>Current Occupancy Rate</b>	<b>99.6%</b>	<b>96.0%</b>	<b>97.0%</b>	<b>96.4%</b>	<b>98.7%</b>	<b>97.1%</b>
<i>(Occupancy % from 3/2020)</i>	<i>(94.9%)</i>	<i>(96.4%)</i>	<i>(93.9%)</i>	<i>(96.0%)</i>	<i>(96.2%)</i>	<i>(95.5%)</i>
<i>(Occupancy % from 3/2018)</i>	<i>(96.9%)</i>	<i>(95.3%)</i>	<i>(90.4%)</i>	<i>(97.9%)</i>	<i>(98.5%)</i>	<i>(95.0%)</i>
<i>(Occupancy % from 9/2016)</i>	<i>(98.9%)</i>	<i>(96.7%)</i>	<i>(93.9%)</i>	<i>(99.7%)</i>	<i>(99.1%)</i>	<i>(97.1%)</i>
<i>(Occupancy % from 3/2014)</i>	<i>(97.1%)</i>	<i>(95.8%)</i>	<i>(93.1%)</i>	<i>(98.8%)</i>	<i>(98.6%)</i>	<i>(95.9%)</i>

Source: Bowen National Research

Healthy, well-balanced rental housing markets typically have occupancy levels generally between 94% and 96%. A market occupancy level over 97.0% *may* be an indication of a possible housing shortage, which can lead to housing problems such as unusually rapid rent increases, people forced to live in substandard housing, households living in rent overburdened situations, and residents leaving the area to seek housing elsewhere. Conversely, occupancy rates below 94% *may* indicate some softness or weakness in a market, which may be the result of a saturated or overbuilt market, or one that is going through a decline due to economic downturns and corresponding demographic declines.

Based on our survey of multifamily rentals, the PSA (Evansville) has a very high occupancy rate of 97.1%, equaling the highest annual rate from the four selected periods shown on the preceding table. This is a likely indication that there is a shortage of multifamily rental supply in the local market. The 98%+ occupancy rates in the North and West submarkets are very high. In fact, given that there were only 14 or fewer vacant units identified in the North and West submarkets, it appears that there is extremely limited availability among multifamily rental properties in these submarkets. The lowest occupancy rate of 96.0% in the East Submarket is still considered a relatively high occupancy rate. This submarket has 205 vacant units indicating the prospective renters have a larger base of potential rental alternatives from which they can choose as compared with other areas in the city. Details of the rental housing supply starts on page VI-4 of this report.

### For-Sale Housing Supply

Within the entire city of Evansville there were 15,879 housing units sold between January 2010 and December 2020. Meanwhile the available inventory of homes totals only 168 units. The following table summarizes the available and sold (since January 2010) housing stock for the PSA and its submarkets.

Evansville For-Sale/Sold Housing Supply						
Type	North	East	Near East	Central	West	Evansville
Available	18	25	57	47	21	168
Sold	3,433	2,258	5,866	2,361	1,961	15,879
Total	<b>3,451</b>	<b>2,283</b>	<b>5,923</b>	<b>2,408</b>	<b>1,982</b>	<b>16,047</b>

Source: Indiana Regional MLS and Bowen National Research

Details of the for-sale housing market start on page VI-17 of this report.

a. Historical For-Sale Analysis

The following table includes a summary of annual for-sale residential transactions that occurred within the PSA (Evansville) since January 2010.

City of Evansville				
For-Sale Housing by Year Sold				
Year	Units Sold		Median Price Sold	
	Number	Change	Price	Change
2010	1,929	-	\$103,500	-
2011	1,867	-3.2%	\$100,900	-2.5%
2012	2,136	14.4%	\$108,838	7.9%
2013	2,345	9.8%	\$110,000	1.1%
2014	1,852	-21.0%	\$104,311	-5.2%
2015	1,371	-26.0%	\$82,900	-20.5%
2016	1,551	13.1%	\$87,000	4.9%
2017	1,631	5.2%	\$89,500	2.9%
2018	1,596	-2.1%	\$90,000	0.6%
2019	1,722	7.9%	\$102,000	13.3%
2020	1,833	6.4%	\$115,000	12.7%

Source: Indiana Regional MLS and Bowen National Research

Annual residential for-sales activity within the PSA over the past two years has increased, while the median sales price has increased over the past five years. The latest (2020) median sales price of \$115,000 reflects an 11-year high. This is reflective of a strong and growing level of demand for for-sale housing.

b. Available For-Sale Housing Supply

When considering the PSA's (Evansville's) estimated 28,140 owner-occupied housing units, the 168 *available* for-sale units represent a 0.6% availability/vacancy rate, which is a significant decrease from the 1.3% rate from our March 2020 analysis of this market and reflective of the market's lowest availability/vacancy rate during the past six years. As such, the inventory of available for-sale housing appears to have diminished significantly and has reached a point that may adversely impact the city's ability to grow (economically, demographically, etc.) or meet the needs of its residents.

The following table summarizes the inventory of available for-sale housing in Evansville by submarket.

Available For-Sale Housing by Market (As of December 31, 2020)							
	Total Units	% Share of PSA	Low List Price	High List Price	Average List Price	Median List Price	Average Days On Market
North	18	10.7%	\$59,000	\$995,000	\$229,028	\$167,400	91
East	25	14.9%	\$105,000	\$969,969	\$358,205	\$289,900	146
Near East	57	33.9%	\$29,900	\$349,900	\$104,538	\$89,900	124
Central	47	28.0%	\$16,900	\$424,900	\$93,208	\$62,500	171
West	21	12.5%	\$36,843	\$335,000	\$120,443	\$109,900	101
PSA - Evansville	168	100.0%	\$16,900	\$995,000	\$154,443	\$105,000	134

Source: Indiana Regional MLS and Bowen National Research

Based on the preceding table, the largest share (33.9%) of the available product is located in the Near East Submarket. The average list price (\$104,538) of housing in this submarket is the second lowest of the five submarkets and it has an average days on market (124) that is lower than the overall city. This may be an indication that despite the large inventory of available product in this submarket, demand for housing remains strong. The lowest *average* list price (\$93,208) is within the Central Submarket, while the highest median list price (\$358,205) is in the East Submarket. While the Central Submarket appears to have a large number of for-sale housing product that might be considered affordable to low-income households, based on our personal on-site observations, it appears that much of this product is older and lower quality. In fact, most of the available for-sale product is more than 40 years old. Therefore, while this product may be considered affordable, it is likely that due to its age and lower quality, that such product would require additional costs to repair, update and maintain that may be difficult for some lower income households to afford.

### Senior Care Housing Supply

Within the Evansville area we identified and surveyed 25 senior residential facilities, three congregate care facilities, eight assisted living facilities, and 14 nursing homes (Note: some projects offer more than one housing type). These 25 facilities represent most of the senior care facilities in Evansville and are representative of the housing choices available to seniors requiring special care housing. We referenced the Medicare.com and Indiana State Department of Health websites for all licensed assisted living facilities and cross referenced this list with other senior care facility resources. As such, we believe the identified and surveyed senior care facilities represent most licensed facilities in Evansville. It should be noted that we were unable to survey any of the few independent living senior facilities in the city.

The 25 senior residential facilities surveyed are summarized as follows:

Evansville Senior Care Housing - 2021					Evansville 2014 Occupancy Rate	National Occupancy Rate**
Facility Type*	Facilities Surveyed	Total Units/Beds	Vacant Units/Beds	Occupancy Rates		
Congregate Care	3	150	12	<b>92.0%</b>	98.0%	91.5%
Assisted Living	8	592	138	<b>76.7%</b>	93.3%	90.7%
Nursing Care	14	1,462	387	<b>71.7%</b>	85.5%	88.0%
Total	25	2,204	537	<b>75.6%</b>	-	-

\*Some facilities offer more than one type of housing product

\*\*Source: American Seniors Housing Assn. *The State of Seniors Housing*

The Evansville senior care market is reporting overall occupancy rates between 71.7% (nursing care) to 92.0% (congregate care). Historically, the PSA (Evansville) senior care housing market has operated at relatively high occupancy levels. However, as happened throughout much of the country over the past year, the COVID-19 pandemic has adversely impacted occupancy levels among assisted living and nursing home facilities, with most operating below 80%. According to several facility operators, prospective resident traffic has greatly subsided due to health

concerns of seniors living at such facilities. These same representatives believe as more people are vaccinated, tenant traffic and occupancy rates should return to normal levels.

Due to the abnormally low occupancy rates experienced at most senior care housing projects that were the result of COVID-19, we have not prepared any demand estimates for this type of housing product. It is anticipated that as occupancy levels return to more typical levels in the near future, the demand for additional senior care housing will return. An analysis of the senior care housing supply starts on page VI-28.

***Housing Gap Analyses:*** The rental and for-sale housing demand estimates for the Primary Study Area (Evansville) are below. Details of methodology, assumptions, and data sets are included in *Section VII: Housing Demand-Gap Analysis*.

#### *Rental Housing Gap Estimates*

The table on the following page includes a demand calculation for rental units targeting the three income segments considered in this analysis.

2020 - 2025 Rental Demand Potential by Income Level & Rent Affordability Evansville, IN Primary Study Area			
Household Income Range	< \$36,000	\$36,001-\$58,000	\$58,001+
Rent Affordability	< \$900	\$901-\$1,450	\$1,410+
New Income-Qualified Renter Households	-1,340	267	1,404
Units Needed for Balanced Market*	660	187	-77
Replacement Housing Needed**	630	99	48
Total External/Commuter Market Support^	817	281	271
Gross Demand of Units Needed	767	834	1,646
Less Units in the Development Pipeline (Planned Projects)	-177	-183	-81
<b>Total Potential PSA (Evansville) Support for New Units</b>	<b>590</b>	<b>651</b>	<b>1,565</b>

\*Based on Bowen National Research's survey of area rentals

\*\*Based on ESRI/ACS estimates of units lacking complete indoor plumbing and/or are overcrowded

^Based on Bowen National Research proprietary research and commuting patterns for Evansville

Based on the preceding demand estimates, it is clear that there is some level of demand among all household income levels within Evansville over the five-year projection period. There is an overall housing need for approximately 2,806 additional rental units in the city over the next five years. There is a notable need for housing among all affordability levels. As such, future rental housing development should include a variety of rent and income-eligibility levels.

### For-Sale Housing Gap Estimates

The following table summarizes for-sale housing demand at various income segments within Evansville.

2020-2025 For-Sale Housing Demand by Income Level & Price Point Evansville, IN Primary Study Area			
Household Income Range	< \$36,000	\$36,001-\$58,000	\$58,001+
Housing Price Affordability	< \$113,999	\$114,000-\$183,999	\$184,000+
New Owner-Occupied Household Growth	-1,200	-455	1,645
Units Required for a Balanced Market*	154	145	192
Total Replacement Housing**	125	59	0
Total External/Commuter Market Support^	991	353	412
Total Step-Down Support	51	1,074	-1,125
Gross Demand of Units Needed	121	1,176	1,124
Less Units in the Development Pipeline (Planned Projects)	0	-141	-51
<b>Total Potential PSA (Evansville) Support for New Units</b>	<b>121</b>	<b>1,035</b>	<b>1,073</b>

\*Based on Bowen National Research's survey of available for-sale housing supply

\*\*Based on share of units lacking complete indoor plumbing and/or are overcrowded

^Based on Bowen National Research proprietary research and commuting patterns for Evansville

As the preceding table illustrates, there is a potential need for for-sale housing of up to 2,229 units over the five-year projection period. Most of this housing need is split between moderate income households earning between \$36,001 and \$58,000 and those earning more than \$58,000. While there is a projected need of for-sale housing priced under \$114,000, it will be difficult for most developers to build such product. However, the development of higher priced product (\$114,000+) would enable some existing homeowners currently in lower priced homes to leave such product, thereby freeing up lower priced housing for those households that can afford it.

### Overall City-Wide Conclusions

Based on the findings contained in this updated report, there is a growing need for additional rental and for-sale housing in Evansville. As the housing gap estimates show, there are large housing gaps among a variety of housing affordability levels within both the rental and for-sale housing market segments. Additional housing will need to be added to create more balanced market conditions and to accommodate the anticipated household growth in the market. Without the addition of new housing, the market may experience slowing job growth, diminishing economic investment and stagnant demographic growth. Additionally, home prices and rental rates could increase more rapidly, placing even greater pressures on housing affordability, particularly for lower income households. Given the notable negative impact COVID-19 had on occupancy levels of senior residential care facilities (e.g. assisted living facilities and nursing homes), the development community may want to delay developing new senior care housing projects on a large scale until this market segment is more stabilized.

### III. STUDY AREA DELINEATION

The focus of this analysis is to assess the market characteristics of, and to determine the housing needs for, the overall city of Evansville and predetermined, smaller submarkets within Evansville.

The Primary Study Area (PSA) of this report is the city of Evansville, which contains approximately 45 square miles. Because of the size of the city and the distinct socioeconomic differences that exist within the various portions of the city, we have divided the PSA into five separate submarkets. These five submarkets, which are compared with each other and with the overall city of Evansville, are defined below.

***Central Submarket*** – The Central Submarket (often referred to by city representatives as the “Focus Area”) is generally defined as the section of the city of Evansville that is bounded by Pigeon Creek to the north, Kentucky Avenue, Willow Road, and Harlan Avenue to the east, Veteran’s Memorial Parkway (Interstate 164) to the south, and the Ohio River and Pigeon Creek to the west. This area encompasses the following Qualified Census Tracts of Evansville: 11, 12, 13, 14, 17, 18, 19, 20, 21, 23, 24, 25 and 26. This area contains subareas generally described as the Downtown Redevelopment Area, the Arts District Redevelopment Area, and the Jacobsville Redevelopment Area. These subareas are further detailed in Section VIII. The overall Central Submarket contains a total of 7.7 square miles.

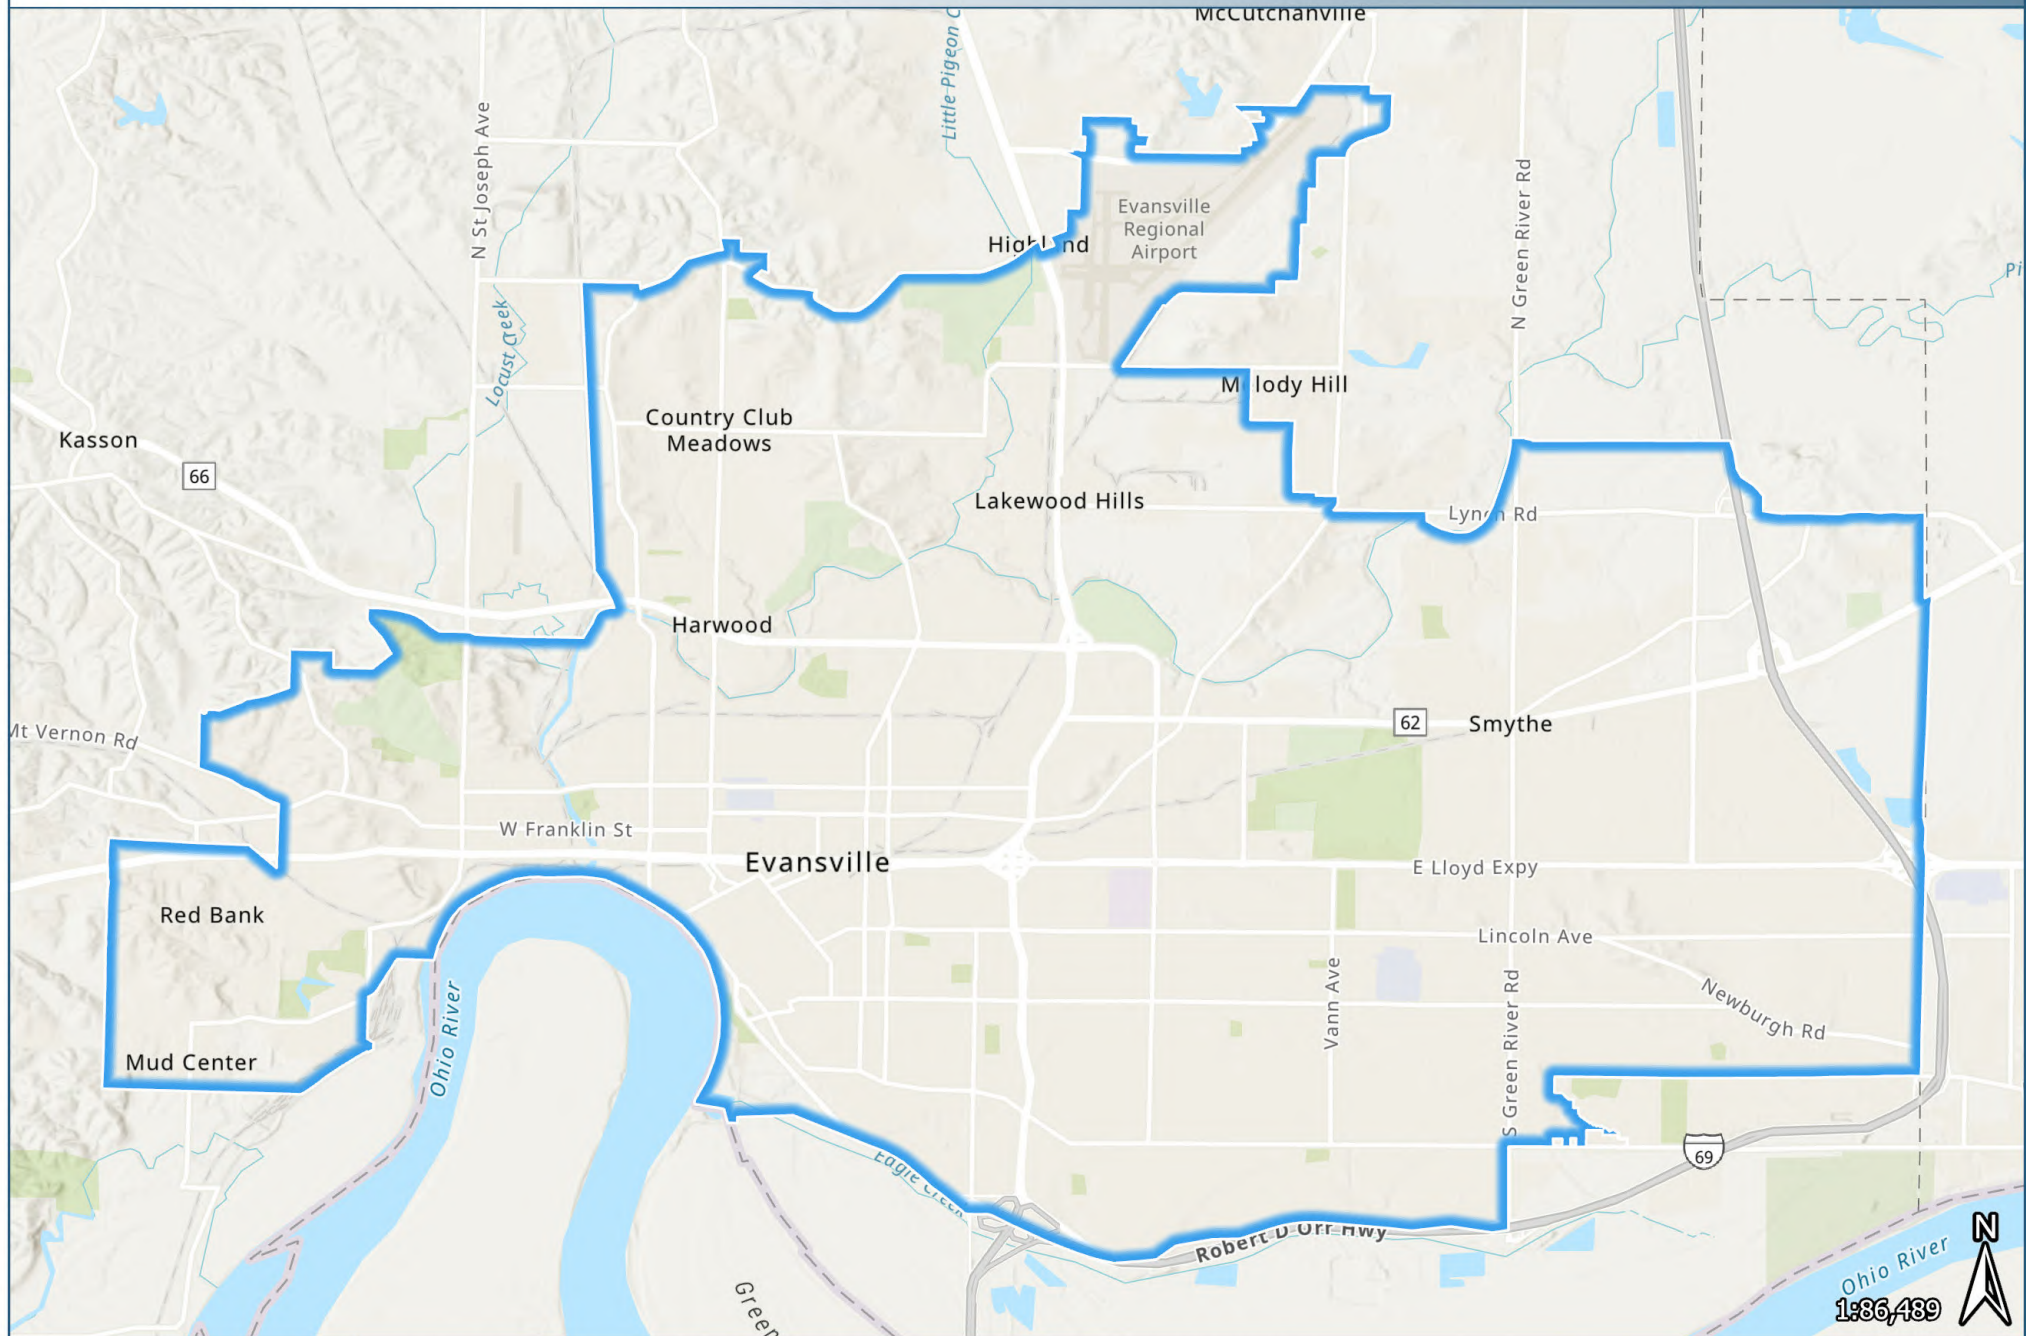

***North Submarket*** – The North Submarket is generally considered the area of Evansville immediately north of the Central Submarket. The North Submarket is bounded by the Evansville city limits to the north, east, and west, and Pigeon Creek and Morgan Avenue (I-62) to the south. This submarket contains approximately 13.5 square miles.

***Near East Submarket*** – The Near East Submarket is the area of Evansville between the designated Central and East Submarkets. The Near East Submarket is generally bounded by Morgan Avenue (I-64) to the north, South Green River Road to the east, Evansville city limits to the south, and Kentucky Avenue, Willow Road, and Harlan Avenue to the west. Overall, this submarket contains a total of 10.5 square miles.

***East Submarket*** – The East Submarket is the area east of the Near East Submarket. Its boundaries consist of the Evansville city limits to the north, east and south, and South Green River Road to the west. Overall, this submarket contains a total of 7.2 square miles.

***West Submarket*** – The West Submarket is located west of the Central Submarket. Its boundaries consist of the Evansville city limits to the north, south and west, and Pigeon Creek to the east. Overall, this submarket contains a total of 5.7 square miles.

A map illustrating the boundaries of the PSA (Evansville) with its five submarkets follows this page.

## IV. DEMOGRAPHIC ANALYSIS

### A. INTRODUCTION

This section of the report evaluates key demographic characteristics for the Primary Study Area (Evansville) and the five submarkets within the city. Through this analysis, unfolding trends and unique conditions are revealed regarding populations and households residing in the selected geographic areas. Demographic comparisons among these geographies provide insights into the human composition of housing markets. Critical questions, such as the following, can be answered with this information:

- Who lives in Evansville and what are these people like?
- In what kinds of household groupings do Evansville residents live?
- What share of people rent or own their Evansville residence?
- Are the number of people and households living Evansville increasing or decreasing over time?

This section includes a discussion of population and household characteristics. Population characteristics describe the qualities of individual people, while household characteristics describe the qualities of people living together in one residence.

It is important to note that 2000 and 2010 demographics are based on U.S. Census data (actual count), while 2020 and 2025 data are based on calculated estimates and projections provided by ESRI, a nationally recognized demography firm. The accuracy of these estimates depends on the realization of certain assumptions:

- Economic projections made by secondary sources materialize;
- Governmental policies with respect to residential development remain consistent;
- Availability of financing for residential development (i.e. mortgages, commercial loans, subsidies, Tax Credits, etc.) remains consistent;
- Sufficient housing and infrastructure are provided to support projected population and household growth.

Significant unforeseen changes or fluctuations among any of the preceding assumptions could have an impact on demographic projections/estimates.

## B. POPULATION CHARACTERISTICS

Population by numbers and percent change (growth or decline) for selected years is shown in the following table:

	Total Population									
	2000	2010	Change 2000-2010		2020	Change 2010-2020		2025	Change 2020-2025	
	Census	Census	Number	Percent	Estimated	Number	Percent	Projected	Number	Percent
North	20,579	21,529	950	4.6%	21,316	-213	-1.0%	21,347	31	0.1%
East	17,154	19,295	2,141	12.5%	20,358	1,063	5.5%	20,782	424	2.1%
Near East	40,934	38,913	-2,021	-4.9%	39,112	199	0.5%	39,300	188	0.5%
Central	30,726	26,959	-3,767	-12.3%	26,586	-373	-1.4%	26,735	149	0.6%
West	13,494	13,385	-109	-0.8%	12,886	-499	-3.7%	12,768	-118	-0.9%
Evansville	122,887	120,081	-2,806	-2.3%	120,258	177	0.1%	120,932	674	0.6%

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Noteworthy observations from the preceding table include:

- From 2000 to 2010, the PSA (Evansville) population decreased by 2,806 (2.3%), or by 281 (0.2%) per year. Between 2010 and 2020, the PSA's (Evansville) population increased by 177 (0.1%). Of the five submarkets, the East Submarket increased the most, adding a total of 1,063 people during this 10-year period. This represents an increase of 5.5%. A modest increase (0.5%) also occurred within the Near East Submarket, representing an increase of 199 people. Meanwhile the North Submarket decreased by 213 (1.0%), the Central Submarket decreased by 373 (1.4%), and the West Submarket decreased by 499 (3.7%).
- Overall, the PSA is projected to increase by 674 (0.6%) people from 2020 to 2025, greatly outpacing the trends from 2010 to 2020. The projected population growth from 2020 to 2025 will improve over the trends from 2010 to 2020 in the North, Central and West submarkets, while population growth will slow down in the East and Near East submarkets. Individual submarket growth is projected at 424 (2.1%) in the East Submarket, 149 (0.6%) in the Central Submarket, 188 (0.5%) in the Near East Submarket, and 31 (0.1%) in the North Submarket. Only the West Submarket is projected to decline over the next five years (2020-2025), though it will only decline by 118 (0.9%) people.

The following graph compares percent change in population (growth) for two periods, 2010 to 2020 and 2020 to 2025:

Population by age cohorts for selected years is shown in the following table:

		Population by Age							Median Age
		<25	25 to 34	35 to 44	45 to 54	55 to 64	65 to 74	75+	
North	2010	6,274 (29.1%)	3,014 (14.0%)	2,546 (11.8%)	3,181 (14.8%)	2,598 (12.1%)	1,807 (8.4%)	2,109 (9.8%)	40.7
	2020	5,561 (26.1%)	3,052 (14.3%)	2,795 (13.1%)	2,489 (11.7%)	2,916 (13.7%)	2,309 (10.8%)	2,194 (10.3%)	42.0

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Noteworthy observations from the preceding table include:

- The median age in the PSA (Evansville) of 38.2 in 2020 is expected to increase steadily with time, reaching 39.1 by 2025. This reflects a 0.47% annualized increase in the median age from 2020 to 2025, which is higher than the 0.38% annualized increase from 2010 to 2020.
- The North Submarket population has the oldest median age of the submarkets, with a median age over 40 in 2010 and a projected median age of over 43 by 2025. Each of the remaining submarkets generally appear to have similar median ages when compared to each other.
- From 2020 to 2025, the number of seniors age 65 and older within the PSA (Evansville) is projected to increase by 2,331 (10.9%). The senior population is projected to increase by 493 (12.1%) in the East Submarket, by 529 (11.7%) in the North Submarket, by 657 (10.4%) in the Near East Submarket, by 429 (10.1%) in the Central Submarket, and by 222 (10.0%) in the West Submarket.

- The largest projected decline among any age group in the PSA (Evansville) is projected to occur among people between the ages of 25 and 34, reflecting a decline of 1,604 people (9.0%) and among those between the ages of 55 and 64, which is projected to decline by 1,459 (9.6%) people between 2020 and 2025.

The graph below illustrates the population by age group for 2020:

Population by educational attainment for 2020 is shown in the following table:

		Population by Educational Attainment						
		No High School Diploma	High School Graduate	Some College, No Degree	Associate Degree	Bachelor Degree	Graduate Degree	Total
North	Number	1,510	5,396	3,460	1,600	2,715	1,073	15,755

Source: 2010 Census; ESRI; Urban Decision Group; Bowen National Research

In the PSA (Evansville) overall, 12.2% of the population did not graduate from high school. Areas with low shares of educational attainment often suffer from poverty and lower wages due to their limited earning potential. The Central Submarket has the highest share of people *without* a high school diploma, representing 19.4% of the submarket's population. The East Submarket has the highest share (94.4%) of people that graduated from high school and/or that went on to obtain some level of post-secondary education. Nearly two-fifths (38.8%) of the population in the East Submarket has at least a bachelor's degree.

The following graph compares educational attainment for 2020:

Population by poverty status for each study area is shown in the following table:

		Population by Poverty Status						
		Income below poverty level:			Income at or above poverty level:			
		<18	18 to 64	65+	<18	18 to 64	65+

Source: U.S. Census Bureau, 2015-2019 American Community Survey; Urban Decision Group; Bowen National Research

Noteworthy observations from the preceding table include:

- Over one-fifth (21.6%) of the PSA (Evansville) population lives in poverty. More than one-third (33.8%) of children (under the age of 18) within the PSA live in poverty.
- The poverty rate is the highest within the Central Submarket, with more than one in three households (35.4%) living in poverty. The Near East Submarket also has a notable share of people living in poverty, with over one-fifth of its population having income below the poverty level.

The following graph compares poverty status for each study area:

Population by migration (previous residence one year prior to survey) for each study area is shown in the following table:

		Population by Migration					
		Same House	Different House in Same County	Different County In Same State	Different State	Moved from Abroad	Total
North	Number	17,042	2,685	819	473	0	21,019

Source: U.S. Census Bureau, 2015-2019 American Community Survey; ESRI; Urban Decision Group; Bowen National Research

On average, nearly 80% of the PSA's population stays within their place of residence in a given year, while just over one-fifth moves. The West Submarket has the highest annual turnover rate of 24.3%, while the North Submarket has the lowest annual turnover rate of 18.9%.

### C. HOUSEHOLD CHARACTERISTICS

Households by numbers and percent change (growth or decline) for selected years are shown in the following table:

	Total Households									
	2000 Census	2010 Census	Change 2000-2010		2020 Estimated	Change 2010-2020		2025 Projected	Change 2020-2025	
			Number	Percent		Number	Percent		Number	Percent
North	9,178	9,522	344	3.7%	9,518	-4	0.0%	9,548	30	0.3%
East	7,913	9,208	1,295	16.4%	9,704	496	5.4%	9,898	194	2.0%

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Noteworthy observations from the preceding table include:

- Between 2000 to 2010, the number of households in the PSA (Evansville) decreased by 1,000 (1.9%). Between 2010 and 2020, the PSA recovered roughly one-third of the households it lost between 2000 and 2010, increasing by 349 (0.7%) households during this time.

- Between 2010 and 2020, the number of households increased by about 500 (5.4%) in the East Submarket, while an increase of 122 (0.8%) also occurred in the Near East Submarket. During this same period, the number of households decreased by 89 (0.8%) in the Central Submarket and by 177 (3.0%) in the West Submarket. The North Submarket has remained virtually unchanged during the previous 10-year period.
- Between 2020 and 2025, the PSA (Evansville) is projected to increase by 376 (0.7%) households, reaching a total household count of 52,631. Excepting the West Submarket, household growth rates among the individual submarkets are projected to be positive, ranging from 0.3% (North Submarket) and 2.0% (East Submarket). This growth contributes to the need for additional housing.

The following graph compares percent change in households for two time periods, 2010 to 2020 and 2020 to 2025:

Householders by age cohort for selected years are shown in the following table:

		Householders by Age

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Noteworthy observations from the preceding table include:

- Nearly three-quarters (72.7%) of all households in the PSA (Evansville) in 2020 were headed up by persons under the age of 65, while the remaining quarter were senior (age 65 and older) households. By 2025, 70.1% of the households in the PSA will be under the age of 65, while 29.9% will be ages 65 and older.
- Within the overall PSA, the greatest growth between 2020 and 2025 will be among households ages of 65 and older. This age cohort is projected to increase by 1,488 (10.5%) in the overall PSA. Within the submarkets, the number of senior (ages 65 and older) households is projected to increase by 296 (10.6%) in the East Submarket, by 444 (10.5%) in the Near East Submarket, by 335 (11.3%) in the North Submarket, by 270 (9.8%) in the Central Submarket, and by 143 (9.8%) in the West Submarket. This will increase the need for senior-oriented housing within each submarket.
- Notable growth (7.5%) is also projected to occur among the age 35 to 44 group, adding 636 such households to the PSA between 2020 and 2025. The greatest number (211) and highest rate of increase (15.3%) among households ages 35 to 44 is among households in the East Submarket. Regardless, all submarkets are expected to experience growth among these older millennials.

The following graph compares the change of households by age cohort between 2020 and 2025:

Households by tenure for selected years are shown in the following table:

Households by Tenure

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Noteworthy observations from the preceding table include:

- In 2020, 53.9% of households in the PSA (Evansville) are owner-occupied and the remaining 46.1% are renter-occupied. The overall mix of households by tenure is projected to remain similar through 2025. The East and Central submarkets are the only two submarkets that have a share of renter-occupied households above 50% in 2020.
- Between 2020 and 2025, owner households in the PSA are projected to increase by 44 (0.2%), while renter households are projected to increase by 332 (1.4%). As such, owner households comprise 88.3% of the projected household growth in the PSA by 2025. These trends indicate that there will be an increasing need for all types of housing within the PSA, though the majority of the need will be for rental product.
- Except for projected declines of 55 (1.6%) in the West Submarket and 16 (0.3%) in the Central Submarket, owner households are projected to increase in all submarkets. The North Submarket contains the greatest projected increase (78 or 1.2%) in owner households and the only projected decrease (48 or 1.5%) in renter households. The greatest projected growth among renter households is within the East and Central submarkets, which are projected to increase by 169 (3.0%) and 138 (2.3%), respectively.

The following graph compares household tenure shares for 2020:

Renter households by size for selected years are shown in the following table:

		Persons Per Renter Household						Average H.H. Size

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Noteworthy observations from the preceding table include:

- In 2020, single persons comprise nearly one-half (47.4%) of renter households in the PSA (Evansville), while couples represent approximately one-fourth of PSA renter households. Between 2020 and 2025, projected growth is exclusive to one-person and 5+-person renter households, which are projected to increase by 376 (3.3%) and 37 (2.3%), respectively. A decline of 81 (0.9%) is projected for two- and three-person renter households in the PSA, and four-person households in the PSA will remain unchanged.
- Between 2020 and 2025, single renter households are only projected to increase in the East, Near East, and Central submarkets, by 252 (7.4%), 85 (3.2%), and 29 (1.1%), respectively. During the same time, the only significant growth in two-person renter households is within the Central Submarket, reflecting a projected 55 (3.3%) increase.
- The Near East and West submarkets have the largest shares (21.7% and 17.4%, respectively) of large-family (four-person or larger) renter households in 2020. As a result, these submarkets have relatively large median renter household sizes. The East and North submarkets have the largest shares of one-person households, at 60.1% and 50.2% of renter households in 2020, respectively. These submarkets have significantly lower shares of large-family renter households, at 7.7% and 12.3% in 2020, respectively.

The following graph compares renter household size shares for 2020:

Owner households by size for selected years are shown on the following table:

		Persons Per Owner Household					Total	Average H.H. Size
		1-Person	2-Person	3-Person	4-Person	5-Person

Noteworthy observations from the preceding table include:

- Generally, one- and two-person owner households have each represented about one-third of the owner household base within the PSA (Evansville). The distribution of the PSA's owner households by size is not expected to change much through 2025, though large-family (four-person or larger) owner households are projected to increase by 27 (0.6%) compared to the projected increase of 15 (0.1%) among smaller households during this time.
- Among the five submarkets, the average owner household size is highest in the East and Central submarkets. By 2025, large-family (four-person or larger) owner households in these submarkets will comprise approximately one-fifth of households, while the shares in the remaining submarkets are projected to be no higher than 16.6% in 2025. The East and Central submarkets are also projected to have the lowest shares of one- to two-person owner households in 2025 (66.2% and 64.5%, respectively), while the shares in all remaining submarkets will be above 69.0% in 2025.
- Between 2020 and 2025, growth in one-person owner households is concentrated within the Near East Submarket, which is projected to increase by 61 (1.8%). Meanwhile, growth in two-person owner households is concentrated within the North and Central submarkets, which are projected to increase by 51 (2.0%) and 33 (1.9%), respectively.
- Except for the West Submarket, large-family (four-person or larger) owner households are projected to increase in each submarket, with projected growth rates ranging from 2.4% (Near East Submarket) to 5.9% (Central Submarket).

The following graph compares owner household size shares for 2020:

Median household income for selected years is shown in the following table:

	Median Household Income				
	2010 Census	2020 Estimated	% Change 2010-2020	2025 Projected	% Change 2020-2025
North	\$36,886	\$52,135	41.3%	\$58,333	11.9%
East	\$41,873	\$47,549	13.6%	\$54,516	14.7%

Evansville	\$33,226	\$41,993	26.4%	\$48,794	16.2%

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Noteworthy observations from the preceding table include:

- The PSA (Evansville) had an estimated median household income of \$33,226 in 2010. This increased to \$41,993 in 2020. It is projected that median household income will increase to \$48,794 by 2025, reflecting a greater annual rate of increase compared to the previous decade.
- The Central Submarket has historically had and is projected to have the lowest median household income of the five Evansville submarkets. The submarkets with the highest median household incomes (North, East, and West submarkets) are projected to increase the most over the next five years.

Renter households by income are shown in the following table:

		Renter Households by Income

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Key findings from the preceding table are summarized below:

- Between 2010 and 2020, the PSA's (Evansville) renter household base grew among all household income segments with incomes of \$20,000 or more. During this time, renter households with incomes between \$20,000 and \$49,999 increased by 594 (6.6%), while households with incomes of \$50,000 or more roughly doubled, adding 3,152 households to the PSA.
- It is projected that between 2020 and 2025 renter household growth in the PSA will only occur among households making \$50,000 or more, increasing by 1,816 (29.1%) during this time. The projected growth among renter households making \$50,000 or more from 2020 to 2025 ranges from 138 (14.0%) in the Central Submarket to 445 (16.2%) in the Near East Submarket during this time.

The following graph compares the change of renter households by income between 2020 and 2025 for each submarket:

Owner households by income are shown in the following table:

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Key observations from the preceding table include the following:

- Owner-occupied household growth within the PSA (Evansville) between 2010 and 2020 only occurred among households that made at least \$60,000 annually. During this same time, households that made at least \$60,000 increased by 3,629 (37.5%), while households earning less than \$60,000 decreased by 4,471 (23.2%).
- By 2025, owner-occupied households making \$60,000 and higher will comprise over one-half (53.1%) of the PSA's owner households and are the only owner-occupied household income segments projected to increase. Between 2020 and 2025, households that make at least \$60,000 will increase by 1,652 (12.4%), while households earning less than \$60,000 will decrease by 1,611 (10.9%).
- The projected change among PSA households making \$60,000 and higher during this time (2020 to 2025) ranges from a decline of 121 (2.9%) in the Near East Submarket to an increase of 378 (15.0%) in the East Submarket. The growth in households making at least \$60,000 is primarily concentrated among those making between \$60,000 and \$99,999 in the North, Central, and West submarkets, while the majority of the household growth in the East Submarket is among households making \$100,000 or more.

The following graph compares the change in households by income between 2020 and 2025 for each submarket:

## **V. ECONOMIC ANALYSIS**

### **A. INTRODUCTION**

The demand for housing within a given geographic area is influenced by the number of households choosing to live there. Although the number of households within Evansville at any given time is a function of many factors, one of the primary reasons for residency is job availability. In this section, Evansville's workforce and employment are examined.

In Section B below, an overview of Evansville's workforce is provided through several overall metrics: employment by industry, wages by occupation, total employment, unemployment rates and in-place employment trends. The Primary Study Area's (Evansville's) relationship with Vanderburgh County and the Evansville Metropolitan Statistical Area (MSA) are examined in this section. When available, employment data for the five submarkets within the city limits is evaluated in detail and compared statistically with the PSA. Within Section C, we conclude this section of the report with commuting and migrating data and analysis.

### **B. WORKFORCE ANALYSIS**

Evansville and Vanderburgh County comprise a large and diverse employment base that are interdependent on each other to some degree and are generally influenced by similar economic factors such as taxes, government policy, and labor laws. Because of the mobility of the workforce between each study area and the reliance that each economy has with the other, it was necessary to evaluate the economies of the entire Vanderburgh County area, and to a degree, the Evansville MSA. The following evaluates key economic metrics within the various study areas. It should be noted that based on the availability of various economic data metrics, some information is presented only for the PSA (Evansville), Vanderburgh County, MSA and/or state.

#### **Employment by Industry**

The distribution of employment by industry sector in each of the five submarkets is compared with the overall PSA (Evansville) in the tables on the following page.

NAICS Group	Employment by Industry (Employees)					
	North		East		Near East

Note: Since this survey is conducted of establishments and not of residents, some employees may not live within the study area. These employees, however, are included in our labor force calculations because their places of employment are located within the study area.

The largest employment sectors within the PSA (Evansville) are within Health Care & Social Assistance (18.5%), Retail Trade (16.6%), Professional, Scientific & Technical Services (10.9%), and Manufacturing (10.2%). Combined, these four industry sectors represent nearly three-fifths (56.2%) of the total employment base or nearly 64,000 jobs.

With over 44,000 jobs, the Central Submarket contains two-fifths (39.9%) of the PSA's employment base. This submarket, which contains the Evansville Central Business District, has most of its employed persons within Health Care & Social Assistance (17.7%), Professional, Scientific & Technical Services (16.5%), and Manufacturing (15.7%).

The Near East Submarket also contains a notable share of jobs, with an estimated 24,699 persons employed. Health Care & Social Assistance (38.4%), Retail Trade (15.4%), and Professional, Scientific & Technical Services (11.3%) represent the largest shares of employment within this submarket.

Because the overall PSA employment base is diversified and well balanced, it appears that Evansville is less vulnerable to a notable economic downturn in a specific job sector. Additionally, because Evansville employment is distributed among a variety of professional (white collar) and labor (blue collar) jobs, the area has a diverse base of income levels that ultimately drive the demand for a variety of housing needs (including affordability). The household income levels are evaluated in greater detail in Section IV: Demographic Analysis and was considered in Section VII: Housing Gap/Demand Analysis. A pie chart illustrating the distribution of employment by job sector for the PSA is included below.

Typical wages by job category for the Evansville Metropolitan Statistical Area (MSA) are compared with those of Indiana in the following table:

Typical Wage by Occupation Type		
Occupation Type	Evansville MSA	Indiana
Management Occupations	\$93,880	\$102,280
Business and Financial Occupations	\$57,930	\$66,930
Computer and Mathematical Occupations	\$67,930	\$77,380
Architecture and Engineering Occupations	\$78,550	\$77,330
Community and Social Service Occupations	\$43,260	\$44,810
Art, Design, Entertainment and Sports Medicine Occupations	\$48,010	\$48,870
Healthcare Practitioners and Technical Occupations	\$74,520	\$78,410
Healthcare Support Occupations	\$30,700	\$30,010
Protective Service Occupations	\$39,360	\$43,090
Food Preparation and Serving Related Occupations	\$22,660	\$23,320
Building and Grounds Cleaning and Maintenance Occupations	\$29,030	\$28,950
Personal Care and Service Occupations	\$25,930	\$26,740
Sales and Related Occupations	\$37,960	\$40,750
Office and Administrative Support Occupations	\$36,360	\$38,210
Construction and Extraction Occupations	\$54,510	\$51,480
Installation, Maintenance and Repair Occupations	\$45,800	\$47,260
Production Occupations	\$39,580	\$39,750
Transportation and Moving Occupations	\$34,750	\$35,480

Source: U.S. Department of Labor, Bureau of Statistics

Most annual blue-collar salaries range from \$22,660 to \$54,510 within the Evansville MSA. White-collar jobs, such as those related to professional positions, management and medicine, have an average salary of \$74,562. It is important to note that most occupational types within the Evansville MSA have slightly lower (4.1% on average) typical wages than the State of Indiana's typical wages. Just four occupational groups have typical wages which are slightly above the State, with the largest difference (5.6%) within Construction and Extraction Occupations. While the area has a wide range for typical wages by occupation, including some higher wage paying jobs, the majority of wages appear to be under \$60,000 annually. These wages likely limit the amount of money that many households can pay toward housing costs in the Evansville MSA.

### **Employment Base and Unemployment Rates**

The following tables were generated from the U.S. Department of Labor, Bureau of Labor Statistics and reflect employment trends of the county in which the site is located.

The following table and graphs illustrate the total employment base for Evansville, Vanderburgh County, the state of Indiana and the United States.

	Total Employment							
	Evansville		Vanderburgh County		Indiana		United States	
Year	Total Number	Percent Change	Total Number	Percent Change	Total Number	Percent Change	Total Number	Percent Change

**Vanderburgh County Total Employment (2010-2020)**

As the preceding illustrates, the Evansville employment base has increased by 2,245 (4.2%) since 2010, exhibiting year-over-year growth between 2014 and 2019. However, much of this increase occurred in 2014 and 2015, and the Evansville employment base decreased by 2.7% since the end of 2019 due to a reduction in business and commercial activity during the COVID-19 pandemic. This is evaluated further in this section. Regardless, Evansville's 2019 employment base of 57,719 represents a 10-year high. This positive employment growth contributes to the overall positive demographic trends of the city. Given the influence Evansville has on the county's economy, it is not surprising that Vanderburgh County's employment base trends generally mirrored the city's trends.

The unemployment rate in Evansville has ranged between 3.3% and 9.8%, while Vanderburgh County has remained between 3.1% and 8.9%, well below the state average since 2009. Unemployment rates for Evansville, Vanderburgh County, the state of Indiana and the United States are illustrated as follows.

Year	Unemployment Rate			
	Evansville	Vanderburgh County	Indiana	United States
2010	9.8%	8.9%	10.1%	9.7%
2011	8.7%	8.0%	8.9%	9.0%
2012	8.4%	7.7%	8.2%	8.1%
2013	7.7%	7.1%	7.5%	7.4%
2014	5.9%	5.4%	5.9%	6.2%
2015	4.6%	4.3%	4.8%	5.3%
2016	4.4%	4.1%	4.4%	4.9%
2017	3.6%	3.3%	3.5%	4.4%
2018	3.4%	3.2%	3.4%	3.9%
2019	3.3%	3.1%	3.2%	3.7%
2020	7.9%	6.8%	7.1%	8.1%

Source: Department of Labor, Bureau of Labor Statistics

The unemployment rate in the PSA (Evansville) has remained slightly above the Vanderburgh County average since 2010. The 10-year low unemployment rate at the end of 2019 is a good indication of the strength of the local job market. The 2020 *annualized* unemployment rate in the PSA was 7.9%. This is primarily attributed to the initial economic impact of COVID-19 and associated stay-at-home orders. The initial impact of COVID-19 and the subsequent economic recovery in the months that followed are illustrated on the following page.

The following table and graph illustrate the *monthly* unemployment rate in Evansville and Vanderburgh County for the most recent 18-month period for which data is currently available.

18-Month Unemployment Rate		
Month	Evansville	Vanderburgh County
July 2019	3.5%	3.2%
August 2019	3.4%	3.2%
September 2019	2.9%	2.7%
October 2019	3.2%	2.9%
November 2019	3.2%	2.9%
December 2019	3.0%	2.7%
January 2020	3.6%	3.3%
February 2020	3.3%	3.1%
March 2020	3.1%	2.9%
April 2020	17.6%	15.7%
May 2020	13.7%	11.8%
June 2020	12.8%	10.9%
July 2020	9.6%	8.0%
August 2020	7.9%	6.5%
September 2020	7.0%	5.8%
October 2020	6.3%	5.1%
November 2020	5.8%	4.7%
December 2020	4.6%	3.8%

Source: Department of Labor, Bureau of Labor Statistics

Prior to the COVID-related unemployment effects beginning in April 2020, the monthly unemployment rate within the PSA (Evansville) ranged between 2.9% and 3.6% in the preceding nine months. Since the peak unemployment rate of 17.6% in April 2020, there has been a sizeable recovery in the economy. However, as of December 2020, the PSA's unemployment rate remained at 4.6%, still above, but near, pre-COVID levels.

In-place employment reflects the total number of jobs within the county regardless of the employee's county of residence. The following illustrates the total in-place employment base for Vanderburgh County.

In-Place Employment Vanderburgh County			
Year	Employment	Change	Percent Change
2010	104,094	-	-
2011	105,699	1,605	1.5%
2012	104,870	-829	-0.8%
2013	103,355	-1,515	-1.4%
2014	105,177	1,822	1.8%
2015	106,446	1,269	1.2%
2016	106,993	547	0.5%
2017	108,249	1,256	1.2%
2018	109,361	1,112	1.0%
2019	109,001	-360	-0.3%
2020*	100,979	-8,022	-7.4%

Source: Department of Labor, Bureau of Labor Statistics

\*Through September

The preceding table illustrates in-place employment has grown by 4,907 jobs over the past 10 full years, reflecting a 4.7% increase. This is significant job growth *within* Vanderburgh County. However, the county lost a total of 360 jobs in 2019 and just over 8,000 jobs through September of 2020. Given the significant annual job growth *within* the county prior to 2019, particularly over the preceding five-year period, the 7.4% decline in in-place employment through September of 2020 is attributable to COVID-19 factors and not a reflection of any inherent weakness in the market. As shown on the previous page, the local economy has recovered significantly in the last quarter of 2020.

Data for 2019, the most recent year that year-end figures are available, indicates in-place employment in Vanderburgh County to be 118.5% of the total Vanderburgh County employment. This means that Vanderburgh County has more employed persons coming to the county from other counties for work (daytime employment) than those who both live and work there. This represents a development opportunity, as many of the people commuting into the county for work could represent potential residents that would support (live in) new residential development. Commuting and migrating data is included in Section C, later in this section of the report.

### **Economic Drivers & Major Employers**

The ten largest employers within Evansville comprise a total of more than 25,000 employees and are summarized as follows:

Employer Name	Business Type	Total Employed
Deaconess Health System	Healthcare	6,500
Evansville-Vanderburgh School Corporation	Education	3,450
St. Vincent's Healthcare-Evansville	Healthcare	3,150
University of Southern Indiana	Education	2,650
Berry Global	Manufacturer	2,600
Koch Enterprises, Incorporated	Manufacturer	2,100
TJ Maxx Distribution Center	Distribution	1,600
SKANSKA-Industrial Contractors, Incorporated	Construction & Engineering	1,550
OneMain Financial	Financial Services	1,250
Vectren, A CenterPoint Energy Company	Utilities	1,000
Total		25,850

Source: Growth Alliance for Greater Evansville Economic Development; Date Unknown

According to a representative with the Growth Alliance for Greater Evansville, the Evansville economy was improving prior to COVID-19 and has slowly recovered.

In 2020, due to the pandemic, the monthly unemployment rose from 3.6% to 17.6% between January and April. Since then, job growth has increased, and the unemployment rate has declined significantly. In 2020, several projects were announced along with future investments that should facilitate economic growth in 2021. According to local sources, the need for locally manufactured goods continues to exceed pre-recession levels which is a good indication that employment and productivity will increase in 2021.

Several local events were cancelled in 2020 due to the pandemic but several are on the calendar for 2021 such as: Night on Main 1, 2 and 3, Fireworks on the Ohio, Spring Small Business Saturday, Halloween Stroll, and Downtown Christmas. Such events will contribute to the local economy.

In February 2021, Vanderburgh County, and the City of Evansville announced updated guidelines regarding gatherings to help slow the spread of COVID-19. Facilities/venues (weddings, funeral homes, etc.) cannot exceed 50% of capacity, and need to continue reinforcing the face mask mandate and sanitation measures. The same applies to facilities/venues for conventions, sport competitions, concerts, and other business or commercial functions. Prior to the events, the facilities/venues must submit a safety plan to the local health department.

In 2015, Southwest Indiana received a \$42 million grant which sparked the economic growth in downtown Evansville. Some notable openings in downtown include CoWorkEvansville Space (2018), Robert L. Koch Center for the Arts and Sciences building (2020), the mixed-use Post House (2020) and the Hyatt Place Hotel, which is to open in March 2021. Two shell buildings were completed in 2020 to encourage more large-scale businesses. One building is 75,000 square feet and the other is 150,000 square feet.

Additionally, in 2016 the Evansville Land Bank Corporation was put in place to ensure that Evansville's vacant lots could be maintained, and vacated homes and buildings could be demolished. As a result, 328 vacant buildings were demolished, and 400 parcels were transferred to local homeowners, businesses, and a few developers. The land bank still held 325 parcels in 2020, with over 90% located in Pigeon Township, which encompasses downtown, Jacobsville, and Haynie's Corner. Of the 400 parcels that were transferred, over 100 parcels will be used to build affordable housing, 30 parcels were used for businesses, 36 structures that were transferred are being rehabilitated, and 24 new owners of the land bank parcels built new market-rate homes.

According to local sources, Evansville is "high on the list" for possible development areas for businesses as they assess their possible return on investment. Both Evansville's cost of development and cost of living are enticing to developers. The area's strong manufacturing base and desirable location for product distribution also contributes to its appeal.

The following tables summarize some key economic announcements that impact the Evansville economy:

Economic Development Activity			
Evansville			
Project Name	Investment	Job Creation	Scope of Work/Details
Atlas World Group, Incorporated	\$1.1 million	75	Expanding headquarters; Moving international relocation service branch from Seattle to Evansville under the name AWG Equipment Leasing, Incorporated; ECD and job creation by 2023
Evansville Regional Airport	\$6.5 million	N/A	Completed construction of solar covered parking canopy in 2020
EFP Corporation	\$2 million	29	Leased a 100,000 square-foot building at Vanderburgh Industrial Park; Job creation by end of 2021
Polyram Compounds	\$10 million	50	Leased a 100,000 square-foot building at Vanderburgh Industrial Park; Job creation by 2022
The Promenade	N/A	N/A	A 228-acre mixed-use neighborhood; The project is expected to add over \$500 million in economic development for the SW Indiana region; Construction still ongoing
CenterPoint Energy, Incorporated	\$6 billion	N/A	CenterPoint Energy, Incorporated acquired Vectren Corporation in 2019
Torsion Group Corporation (Torsion Plastics)	\$4.1 million	18	In 2020, a 30,000 square-foot expansion was completed and new equipment was added; Job creation by 2025
Vectren Foundation	\$4.5 million	N/A	Announced in 2019; Vectren invested funding to have 100 affordable single-family homes built over the next five years
Promise Zone	N/A	N/A	In 2016, the City of Evansville received a 10-year Promise Zone designation; A total of 71 affordable single-family homes will be built; 30 have been completed
Outfall Cascade and Sunrise Pump Station	\$33 million	N/A	These projects are part of the \$729 million "Renew Evansville" plan that was approved in 2016; The cascade will feature an overlook, laboratory facility, observation deck and steps leading down to the Ohio River; ECD 2022; The Sunrise Pump Station to be completed end of 2021

N/A – Not Available

ECD – Estimated Completion Date

In addition to the above, Toyota Indiana, located in Princeton (Gibson County), invested \$700 million and added 150 new jobs in 2020. This brings a total of 550 new jobs and \$1.3 billion in total investment into the region since 2017 for preparation to manufacture the Toyota Highlander.

Additional economic activity within the three subareas of the Central Submarket which include the Downtown Study Area, Jacobsville Study Area, and the Arts District Study Area are outlined below.

Economic Development Activity			
Downtown Study Area			
Project Name	Investment	Job Creation	Scope of Work/Details
The 5th & Main Tower	\$60 million	N/A	Building at 420 Main Street to be demolished in 2021 along with the Sycamore building; Plans include a mixed-use project with four floors of indoor parking; Apartments on upper floors with indoor and outdoor amenities; ECD 2023
Architectural Renovators Lofts (A/R Lofts)	\$80 million	N/A	Former Nabisco building renovated into a mixed-use development; 2 <sup>nd</sup> Language restaurant (on first floor) opened in late 2020; Apartments on top floors are currently being leased
Deaconess Clinic	N/A	N/A	Opened facility in summer 2020; Offers primary care, specialty care, and clinical research space
217 and 219 Main Street	N/A	N/A	Announced in 2020; Developer will build office space
Roger's Hair Academy	N/A	N/A	Relocated salon and academy to 221 Main Street in spring 2020
425 Main Street	N/A	N/A	New owner renovated the property for storefront and office space; Sixth and Zero opened a space on first floor in February 2021
The Post House	\$42 million	N/A	Located at 215 Vine Street; Mixed-use project with commercial space, parking garage, grocery, and apartments; Completed in 2020
4th and Main streets Park	N/A	N/A	Land was acquired in October 2018 to develop a park; Still in the planning stages
Ascension St. Vincent YMCA	\$16.5 million	N/A	Opened new facility in September 2019 which includes wellness and group exercise rooms, a gym, pool, locker rooms and executive offices as well as a STEM learning center and teaching kitchen
Central Lofts	\$25 million	N/A	Anderson Partners Development and ECHO Housing Corporation are renovating the former YMCA into affordable rental units; ECD spring 2022
Hyatt Place Hotel	\$18 million	N/A	The 139-room hotel to start accepting reservations in May 2021
Mediterranean Hotel	N/A	N/A	The historic Riverhouse Hotel underwent renovations and opened in 2020 under the new name
Robert L. Koch Center for the Arts and Sciences	\$2.5 million	N/A	The Evansville Signature School opened the center in January 2020
Indiana University Medical School	\$2.5 million	100+	In 2019, the university was awarded grants to expand its residency program; Job creation over the next few years
Tropicana Evansville	\$480 million	N/A	In 2020, Caesars Entertainment, Incorporation announced the sale of the casino to Gaming and Leisure Properties and Twin River Worldwide Holdings; The deal is valued at nearly half a billion dollars

N/A – Not Available

ECD – Estimated Completion Date

In 2016, neighborhood residents and city stakeholders came up with a Quality of Life plan and used \$13.5 million to revitalize the Jacobsville neighborhood. In 2017, the North Main Street improvement project, between Division Street and Franklin Street, was completed. A protected bike lane of the bike loop connecting the riverfront to downtown from North Main Street and Garvin Park was also completed in 2017. The path is expected to generate between \$7 to \$11 million over the next six years according to research done by the Lochmueller Group. Streetlamps were replaced to provide better lighting and paired with new businesses that opened in the area to help reduce crime in the neighborhood.

Economic Development Activity			
Jacobsville Study Area			
Project Name	Investment	Job Creation	Scope of Work/Details
Jacobsville Overlay Zone	N/A	N/A	Evansville City Council approved an overlay zone for the Jacobsville neighborhood in July 2018; Developers can use special permissions to create mixed-use projects such as retail with housing above
Jacobsville Redevelopment Area	N/A	N/A	Evansville City Council voted in 2019 to expand the Jacobsville Redevelopment Area; Amy's on Franklin was able to purchase a three-way liquor license for \$1,500 compared to \$30,000 or \$40,000
Deaconess Aquatic Center (Garvin Park)	\$28 million	N/A	Construction began December 2019; Stadium for 800 people, stretch pool for competitive events, a teaching pool, a leisure pool, an outdoor spray park, concessions area; ECD July 2021
Forge on Main (AKA North Main Lofts)	\$28.4 million	N/A	Former IGA demolished in 2020; Mixed-use project under construction; Commercial space, grocery store and apartments; ECD 2022
Vectren Foundation	\$1 million	N/A	Announced in 2019 that funding is going toward 26 affordable single-family homes; Homes to be built over a five-year time span
Berry Global Group (FKA Berry Plastics Group)	\$70 million	150	In March 2018, Berry Global began construction to expand its manufacturing operations and construction is still ongoing; Job creation occurred in 2020
Superfund Sites	\$60 million	N/A	In 2004, the Environmental Protection Agency made 4.5 square miles around Jacobsville a Superfund Site (land contaminated by hazardous waste); Cleanup began in 2007; To date, over 3,466 homes have been cleaned with about 1,500 more homes that still need addressed; All remaining homes to be completed by 2025

### Infrastructure Projects

Project Name	Investment	Scope of Work/Details
Interstate 69 Extension	\$6 million	Once project is complete in 2024, Interstate 69 will connect Evansville and Indianapolis; Transportation officials from Kentucky and Indiana continue discussions on the Interstate 69 Ohio River Crossing bridge that would run over the Ohio River between Evansville, Indiana and Henderson, Kentucky and expected to have an impact on the economy
Walnut Street Improvement	\$5.3 million	Phase I was completed in 2019 and included lane reduction from four lanes to three lanes on Walnut Street to Weinbach Avenue, intersection improvements, and storm sewer upgrades; Project will be done in three phases and is expected to be complete in winter 2023
Water Main	\$8 million	Work began in January 2021 and includes new water lines along First Avenue between Moran Avenue, Colonial Avenue, and a portion of the railroad corridor
Outfall Cascade and Sunrise Pump Station	\$33 million	These projects are part of the \$729 million "Renew Evansville" plan that was approved in 2016; The cascade will feature an overlook, laboratory facility, observation deck and steps leading down to the Ohio River; ECD 2022; The Sunrise Pump Station to be complete at the end of 2021

ECD – Estimated Completion Date

The Worker Adjustment and Retraining Notification (WARN) Act requires advance notice of qualified plant closings and mass layoffs. WARN notices were reviewed on March 3, 2021. According to the Indiana Department of Workforce Development there have been 10 WARN notices reported for Evansville over the past 12 months.

WARN Notices				
Company	Location	Jobs	Effective Date	Type of Lay Off
White Stallion Energy, LLC	Evansville and Illinois	338	12/2020	Permanent/COVID-19
Monarch Beverage Company	Evansville and Indianapolis	633	12/2020	Permanent

DoubleTree	Evansville	83	3/2020	Temporary/COVID-19

### **Tourism**

Visit Evansville is largely funded by the bed tax, which is paid by out of town guests. However, corporate and leisure travel declined due to the COVID-19 pandemic, which negatively impacted the marketing and advertising budgets. Visit Evansville contracted the Conventions, Sports & Leisure International, LLC to form a 10-year tourism and destination management master plan for Evansville and Vanderburgh County. The plan, which will help Evansville recover from the pandemic, is expected to be released the second quarter of 2021.

As previously noted, DoubleTree laid off dozens of workers since corporate travel and leisure travel declined.

Tropicana Evansville also laid off hundreds of employees due to the pandemic. The casino temporarily closed in mid-March 2020 then reopened in June 2020. Due to the closure in March, the casinos adjusted gross revenue (AGR) fell 52.9% compared to February 2020.

The Mesker Park Zoo saw a decline in visitors in 2020. Typically the zoo brings in \$1 to \$1.2 million in annual revenue, but as of July 2020 revenue was at \$178,000. Despite this, the zoo continued with construction of the \$6.8 million Penguins of Patagonia exhibit that will be complete in summer 2021.

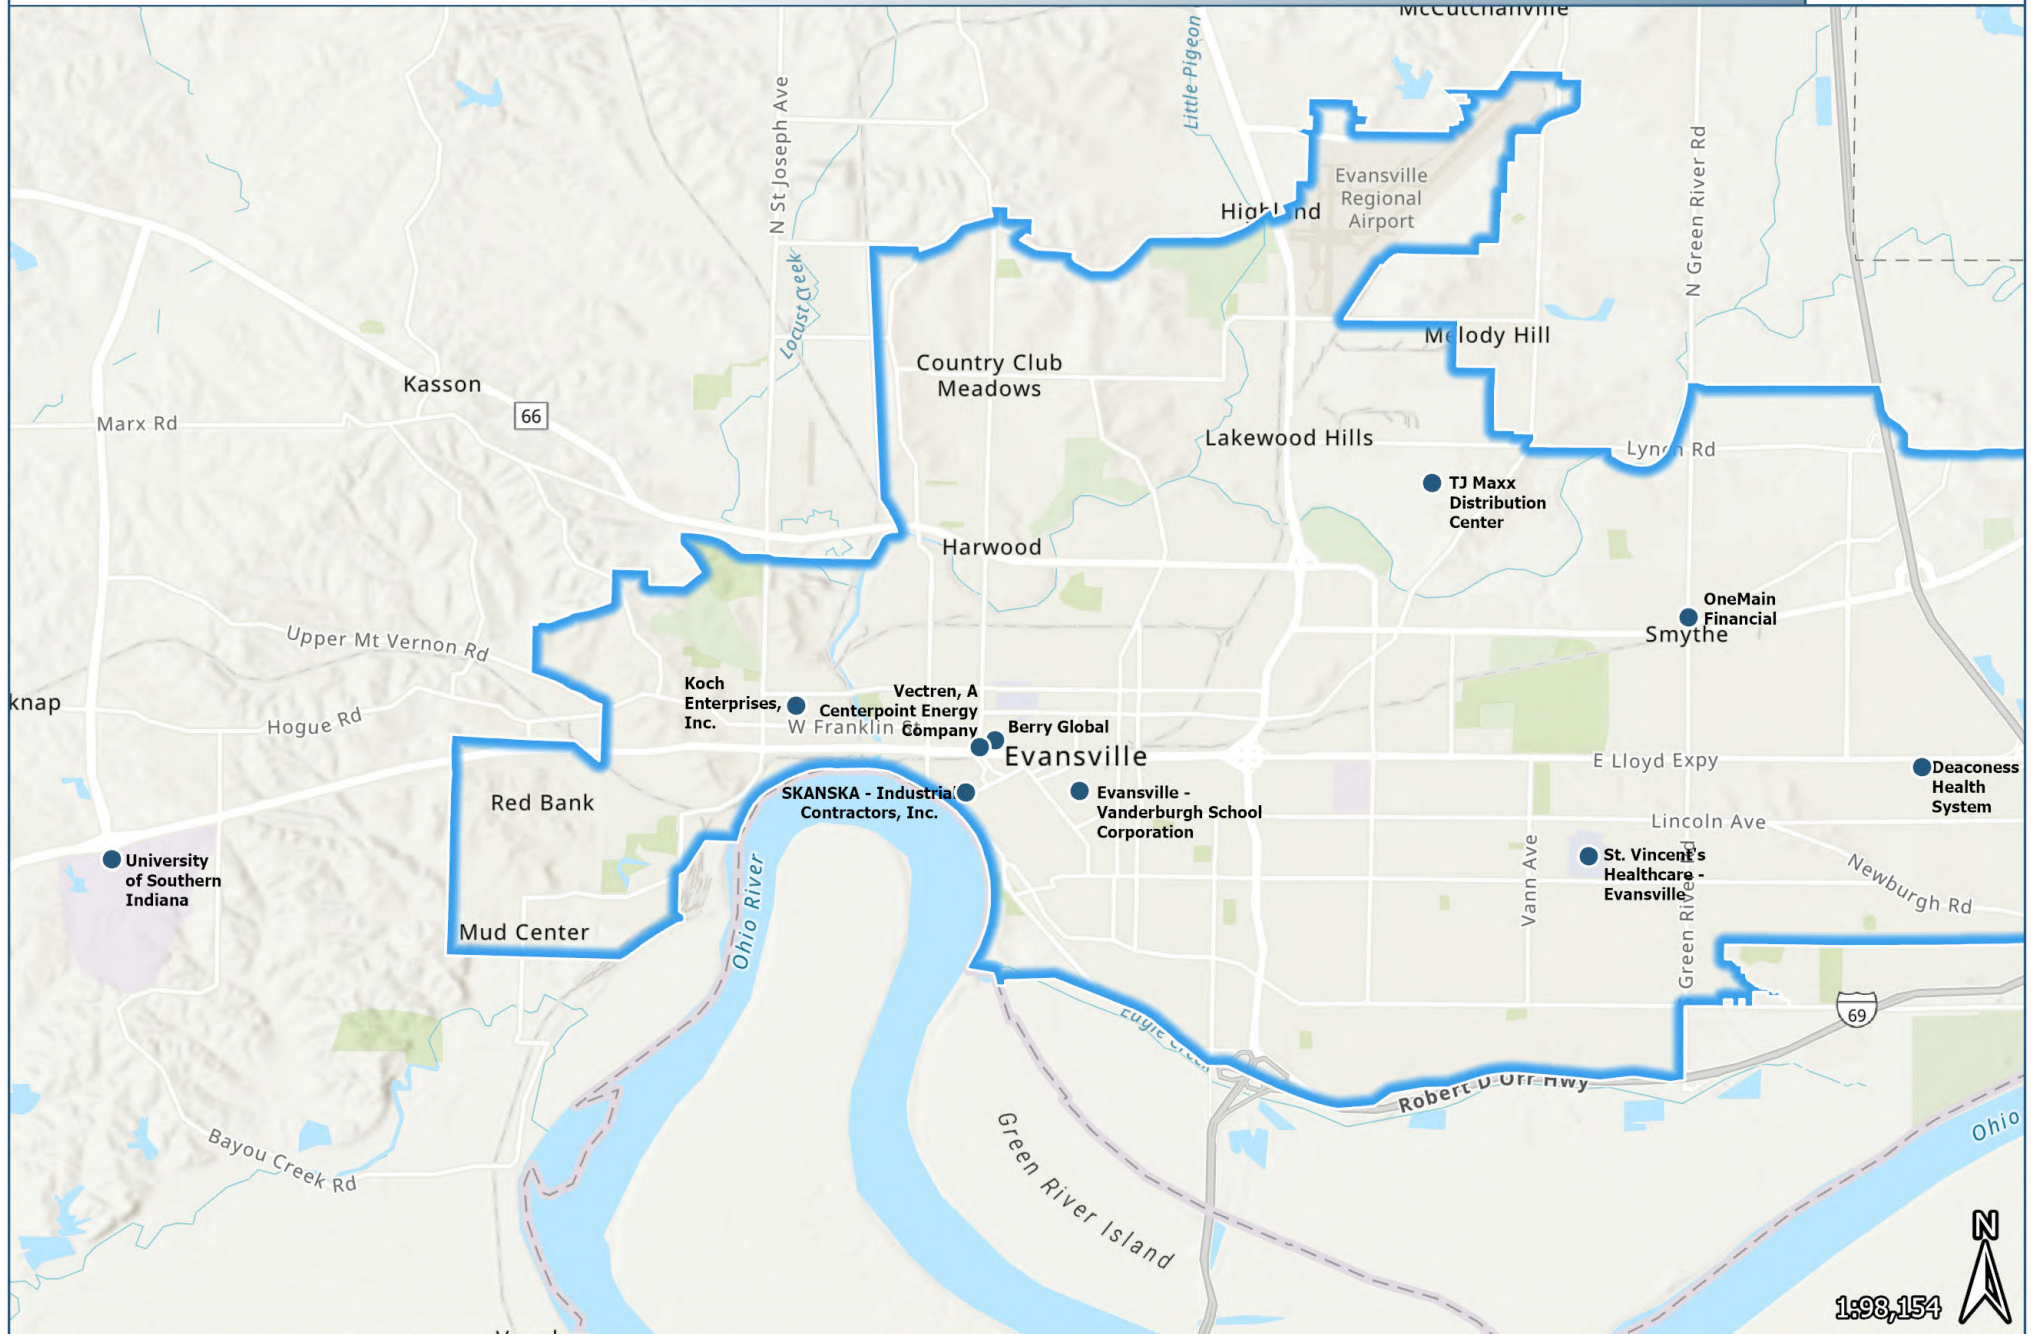

Despite COVID-19, Evansville was able to host the United States Specialty Sports Association (USSSA) Fastpitch Great Lakes Nationals in 2020. However, just over 220 teams participated even though more than 300 teams had registered. Economic impact was estimated at \$4.6 million.

In 2019, the Ohio Valley Conference Men's and Women's National Collegiate Athletic Association (NCAA) Basketball Championships returned to the Ford Center and will continue to be held there through the 2023 season. The agreement includes the possibility to have the games held there in 2024. The 2021 Men's Division II Elite Eight Basketball tournament will also be held at the Ford Center. This is the second year of a four-year deal with the NCAA.

Construction began in 2019 on the Deaconess Aquatic Center in Garvin Park. The \$28 million project includes a seating area that can seat more than 900 people, a stretch pool for competitions, a leisure and teaching pool, a spray park, and concession stands. Construction will be complete in July 2021 and the center is expected to have a significant economic impact for the area.

According to the representative of the Evansville Convention & Visitors Bureau (CVB), Evansville has many premium attractions that appeal to persons young and old. There are eight museums in the Evansville area, including the Evansville Museum of Arts, History & Science, the Koch Family Children's Museum, the Evansville African American Museum, the John James Audubon Museum, the Reitz Home Museum, the EMTRAC-Evansville Museum Transportation Center, and the LST 325 World War II Warship and Memorial that attracts thousands of visitors annually. Other local attractions include the Victory Theatre, a 1,950-seat venue that recently underwent a \$20 million renovation and is the home of the Evansville Philharmonic Orchestra, the Burdette Park Aquatic Center, and a BMX Track. There is a thriving arts district consisting of several galleries including the Bower-Suhrheinrich Foundation Art Gallery. The Haynie's Corner Arts District, an arts and culture neighborhood close to downtown Evansville, annually hosts the Funk in the City Haynie's Corner Art Festival, which draws a large number of people to the area. While the tourism industry was impacted by the pandemic, numerous events are planned for 2021 that should help the local tourism industry continue to recover.

### C. COMMUTING AND MIGRATING

The ability of a person or household to move easily, quickly, and affordably throughout a locality influences the desirability of a housing market. If traffic jams create long commuting times or public transit service is not available for carless people, the quality of life is diminished. Factors that lower resident satisfaction ultimately weaken housing markets. People move about their locality most often to commute, run errands, or recreate. Determining factors for the ease of personal mobility include commuting patterns and public transit availability and costs.

The following table shows commuting mode for the designated study areas.

		Commuting Mode						
		Drove Alone	Carpooled	Public Transit	Walked	Other Means	Worked at Home	Total
North	Number	9,255	692	215	152	133	221	10,668
	Percent	86.8%	6.5%	2.0%	1.4%	1.2%	2.1%	100.0%
East	Number	8,763	504	22	235	53	237	9,814

	Percent	84.1%	7.9%	2.3%	2.7%	1.5%	1.5%	100.0%

Source: U.S. Census Bureau, 2015-2019 American Community Survey

Most (92.0%) Evansville residents commute by car, either driving alone or carpooling. It does not appear that any one submarket has a notably divergent share of people using any particular mode of travel. The Central Submarket has a relatively high share (4.3%) of people that walk to work.

The following table shows commuting times for the designated study areas.

		Commuting Time						
		Less Than 15 Minutes	15 to 29 Minutes	30 to 44 Minutes	45 to 59 Minutes	60 or More Minutes	Worked at Home	Total
North	Number	4,069	4,172	1,668	237	303	221	10,670

Source: U.S. Census Bureau, 2015-2019 American Community Survey

Overall, nearly two-fifths of Evansville residents have commute times of less than 15 minutes and 81.0% have commute times of less than 30 minutes. Overall, about 1.5% of Evansville commuters work from home. Generally speaking, most area commuters have relatively short drive-times to work, thereby keeping their travel costs down. Drive times of less than 30 minutes are relatively consistent between the five submarkets. Therefore, it appears that none of the submarkets have abnormally long drive times and, as a result, should not have abnormally high transit costs that would notably influence housing choices.

The following table and graph show commuter inflow and outflow data for the city of Evansville:

	Inflow/Outflow Data (City of Evansville)					
	2010 Census		2018 Estimated		Change 2010-2018	
	Number	Percent	Number	Percent	Number	Percent
Employed in Evansville	95,289	100.0%	95,549	100.0%	260	0.3%

Note: Figures exclude contract employees and self-employed workers

### Evansville, Indiana Commuter Flow (All Jobs), 2018

According to U.S. Census Longitudinal Origin-Destination Employment Statistics (LODES), of the 95,549 persons employed in Evansville in 2018, 63.7% of the city work force lives outside of Evansville, while the remaining 36.3% lives and works in Evansville. Note that of the 55,970 employed persons that live in Evansville, over two-thirds (67.3%) both live and work in Evansville. According to the data, the Evansville labor market has a notable share of employees that live in the city and commute from outside of the city limits for employment. Note that non-residents represent over 60.0% of people employed in the city of Evansville and represent a good base of potential support for future residential development. The number of Evansville residents commuting outside the city for employment also increased by 4,604 (27.6%) between 2010 and 2018. These trends indicate that Evansville residents are increasingly finding economic opportunity outside of the city. Conversely, the share of inbound commuters decreased slightly (by 0.1%) and the number of Evansville residents working within the city increased by 0.9% during the same period.

The following graph illustrates various socioeconomic characteristics of outbound residents, inbound non-residents, and internal commuters in the Evansville area.

As illustrated in the preceding graph, commuter flow by age appears to be somewhat similar between resident outflow share, worker inflow share, and resident workers share. Note that 43.9% of workers that live outside of Evansville and commute to the city for work earn more than \$3,333 per month. By comparison, the largest share of resident workers earns between \$1,251 and \$3,333 per month. This data indicates that a large share of high-paying jobs in Evansville are held by workers that reside outside the city. In addition, nearly two-thirds of jobs held by workers who live in Evansville are in the All Other Services category, a larger share than outflow workers and inflow workers. Resident workers also represent the smallest share (15.0%) of Goods Producing jobs, which are typically associated with the Manufacturing sector. Higher-income commuters represent potential Evansville residents that will most likely be seeking a wide range of housing alternatives.

## VI. HOUSING SUPPLY ANALYSIS

This housing supply analysis considers both rental and for-sale housing. Understanding the historical trends, market performance, characteristics, composition, and current housing choices provide critical information as to current market conditions and future housing potential. The housing data presented and analyzed in this section includes primary data collected directly by Bowen National Research and secondary data sources including American Community Survey (ACS), U.S. Census housing information and data provided by various government entities and real estate professionals.

While there are a variety of housing alternatives offered in the Evansville area, we focused our analysis on the most common alternatives. The housing structures included in this analysis are as follows:

- **Rental Housing** – Rental Properties generally with 20 or more units were identified and surveyed. A total of 98 multifamily properties with a total of 12,246 units in Evansville were surveyed and updated by Bowen National Research. A total of 76 non-conventional rental units (e.g., single-family homes, duplexes, units over storefronts, etc.) were identified as currently available for rent and are also evaluated. A total of 25 senior care facilities (e.g., assisted living, nursing homes, etc.) with a total of 2,204 beds were also surveyed.
- **For-Sale Housing** – We identified attached and detached for-sale housing. Some of these include individual homes, while others were part of a planned development or community, as well as attached multifamily housing such as condominiums. A total of 16,047 housing units sold between January of 2010 and December of 2020, as well as 168 currently available for-sale homes, were identified in Evansville.

For the purposes of this analysis, the housing supply information is presented for the Primary Study Area (Evansville) and compared with the five submarkets within the PSA. This analysis includes secondary Census housing data (renter- and owner-occupied), Bowen National Research's survey of area rental alternatives, and for-sale housing data (both historical sales and available housing alternatives) obtained from secondary data sources (Indiana Regional MLS, REALTOR.com, and other online sources). Finally, planned or proposed housing was considered for its potential impact on housing market conditions and demand.

Maps illustrating the location of various housing types are included throughout this section.

Please note, the totals in some charts may not equal the sum of individual columns or rows or may vary from the total reported in other tables due to rounding.

## A. HOUSING SUPPLY OVERVIEW

Evaluation of the age, condition and affordability of the existing housing stock is important to understanding housing needs of a market. This section of area housing supply relies on secondary data sources such as the U.S. Census, 2015-2019 American Community Survey and ESRI to provide insight on these housing market metrics in the PSA (Evansville) and its submarkets.

The following table illustrates vacant units as a share of total units along with the change in total units for various time periods for the designated study areas.

Vacant Units by Market											
Study Area	2010 (Census)			2020 (Estimated)				2025 (Projected)			
	Total	Number Vacant	Percent Vacant	Total	Number Vacant	Percent Vacant	Total Unit Change 2010-2020	Total	Number Vacant	Percent Vacant	Total Unit Change 2020-2025
<b>North</b>	10,357	835	8.1%	10,404	886	8.5%	0.5%	10,489	941	9.0%	0.8%
<b>East</b>	16,153	887	5.5%	16,275	797	4.9%	0.8%	16,354	834	5.1%	0.5%
<b>Near East</b>	18,298	2,145	11.7%	18,514	2,239	12.1%	1.2%	18,688	2,334	12.5%	0.9%
<b>Central</b>	13,912	2,861	20.6%	14,036	3,074	21.9%	0.9%	14,285	3,202	22.4%	1.8%
<b>West</b>	6,613	641	9.7%	6,615	820	12.4%	0.0%	6,619	871	13.2%	0.1%
<b>Evansville</b>	59,276	7,370	12.4%	60,070	7,815	13.0%	1.3%	60,813	8,182	13.5%	1.2%

Source: 2010 Census; ESRI; Urban Decision Group; Bowen National Research

There are approximately 60,000 housing units in the PSA (Evansville). The largest number of housing units in the city is within the Near East, East and Central submarkets. Approximately, 13.0% of all housing units are vacant, with the greatest share (21.9%) vacant in the Central Submarket. It is important to note that a variety of factors contribute to vacancies within a given market, including units that may be abandoned or uninhabitable. This is addressed on the following pages.

The following table illustrates the vacancy types within Evansville and its submarkets based on the 2010 U.S. Census and 2015-2019 American Community Survey (ACS) data.

	Vacancy by Type			
	2010 (Census)		2015-2019 (ACS)	
For Rent	3,110	42.2%	1,870	25.4%
For-Sale Only	1,119	15.2%	685	9.3%
Renter/Sold, Not Occ.	365	5.0%	642	8.7%
Seasonal or Recreational	197	2.7%	172	2.3%
Other Vacant	2,579	35.0%	4,006	54.3%
<b>Total</b>	<b>7,370</b>	<b>100.0%</b>	<b>7,375</b>	<b>100.0%</b>

Source: 2010 Census; ESRI; Urban Decision Group; Bowen National Research

While the number of vacant units has remained virtually unchanged over the past decade, the share of vacant units classified as “for rent” and “for-sale only” have declined. This is similar to the declining vacancies we have found based on our survey of rental housing and the number of MLS listings of available for-sale homes.

The following table compares key housing age and condition of Evansville and its submarkets based on 2015-2019 ACS data. Housing units built over 50 years ago (pre-1970), overcrowded housing (1.01+ persons per room) or housing that lacks complete indoor kitchens or bathroom plumbing are illustrated for each study area by tenure in the following table. It is important to note that some occupied housing units may have more than one housing issue.

	Housing Age and Condition											
	Pre-1970 Product				Overcrowded				Incomplete Plumbing or Kitchen			
	Renter		Owner		Renter		Owner		Renter		Owner	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent
<b>North</b>	1,061	33.5%	3,529	54.5%	88	2.8%	43	0.7%	21	0.7%	16	0.2%
<b>East</b>	540	10.7%	1,563	35.6%	26	0.5%	15	0.3%	193	3.8%	15	0.3%
<b>Near East</b>	3,724	55.7%	8,133	86.3%	125	1.9%	89	0.9%	138	2.1%	54	0.6%
<b>Central</b>	4,122	76.2%	4,736	88.3%	121	2.2%	29	0.5%	134	2.5%	0	0.0%
<b>West</b>	1,280	47.4%	2,924	88.0%	49	1.8%	24	0.7%	18	0.7%	26	0.8%
<b>Evansville</b>	10,726	46.7%	20,884	72.1%	408	1.8%	200	0.7%	502	2.2%	203	0.7%

Source: 2015-2019 American Community Survey; ESRI; Urban Decision Group; Bowen National Research

Among the preceding categories, the greatest housing issue facing Evansville residents appears to be associated with older housing stock. A total of 10,726 occupied units, representing nearly one-half (46.7%) of renter-occupied housing units in Evansville were built prior to 1970, which have the potential for lead paint issues. This share is even higher among owner-occupied housing units in Evansville, with housing units built prior to 1970 representing nearly three-quarters (72.1%) of the ownership housing stock. Unsurprisingly, the well-established Central Submarket has the highest share of renter- and owner-occupied units built prior to 1970. Other housing condition issues affect 2.2% or less of Evansville residents. It is worth noting that the East Submarket has a significantly higher share (3.8%) of renter-occupied product with incomplete kitchens or plumbing than the other submarkets.

The following table compares key household income, housing cost, and affordability metrics of Evansville and its submarkets.

Household Income, Housing Costs, and Affordability						
Study Area	2020 Households	Median Household Income	Median Home Price (ESRI)	Average Gross Rent	Share of Cost Burdened Households*	
					Renter	Owner
North	9,518	\$52,135	\$123,262	\$798	43.7%	17.1%
East	9,704	\$47,549	\$173,624	\$877	46.7%	15.9%
Near East	16,275	\$41,282	\$90,685	\$778	46.0%	22.5%
Central	10,962	\$29,016	\$70,789	\$711	56.0%	25.7%
West	5,795	\$45,619	\$98,027	\$795	48.5%	15.6%
Evansville	52,255	\$41,993	\$101,117	\$789	48.5%	20.1%

Source: American Community Survey (2015-2019); ESRI

\*Paying more than 30% of income toward housing cost

As the preceding illustrates, Evansville's average gross rent is \$789, its median home price is \$101,117, and its median household income is \$41,993. The high shares of cost burdened renter (48.5%) and owner (20.1%) households in Evansville indicates that many households are paying a disproportionately high share of their income toward housing costs, likely due to a lack of affordable housing. Among the individual submarkets, the median home prices, average gross rents, and median household incomes are all lowest within the Central Submarket, followed by the Near East Submarket. Subsequently, the share of cost burdened households is highest in the Central Submarket. Additionally, the West Submarket has a lower average gross rent compared to the North and East submarkets, yet it has a slightly higher share of cost burdened renter households.

## **B. RENTAL HOUSING SUPPLY**

### **Multifamily Rental Housing Overview**

During January and February of 2021, Bowen National Research telephone updated a total of 98 rental housing properties within Evansville, Indiana. These surveyed projects represent more than one-half of the total multifamily rental housing projects identified within the city. As such, this survey represents a good base from which characteristics and trends of rental housing can be evaluated, and from which conclusions can be drawn.

Projects surveyed operate as market-rate and under a number of affordable housing programs including the Low-Income Housing Tax Credit (LIHTC) program and various HUD programs. Definitions of each housing program are included in Addendum D: Glossary. Data collected during our survey is presented in aggregate format for the Primary Study Area (PSA) and submarkets within the PSA.

Managers and leasing agents at each project were surveyed to collect a variety of property information including vacancies, rental rates, design characteristics, amenities, utility responsibility, and other features. Projects were also rated based on quality and upkeep; and each was photographed and mapped as part of the original study we completed.

Because certain portions of the city of Evansville may exhibit rental housing characteristics or trends that may be unique, we have also evaluated the rental housing supply of Evansville based on five geographic submarkets (see Section III: Study Area Delineation for descriptions and maps of these submarkets). We have also provided historical occupancy information from 2014, 2016, 2018 and 2020 for comparison purposes. The following table summarizes the overall PSA's (Evansville) and submarkets' rental housing supply.

Overall Market Performance by Area						
	North	East	Near East	Central	West	Evansville
Projects Surveyed	11	25	23	30	10	98
Total Units	1,905	5,117	2,693	1,475	1,056	12,246
Vacant Units	8	205	80	53	14	359
<b>Current Occupancy Rate</b>	<b>99.6%</b>	<b>96.0%</b>	<b>97.0%</b>	<b>96.4%</b>	<b>98.7%</b>	<b>97.1%</b>
<i>(Occupancy % from 3/2020)</i>	<i>(94.9%)</i>	<i>(96.4%)</i>	<i>(93.9%)</i>	<i>(96.0%)</i>	<i>(96.2%)</i>	<i>(95.5%)</i>

Source: Bowen National Research

Healthy, well-balanced rental housing markets typically have occupancy levels generally between 94% and 96%. A market occupancy level over 97.0% *may* be an indication of a possible housing shortage, which can lead to housing problems such as unusually rapid rent increases, people forced to live in substandard housing, households living in rent overburdened situations, and residents leaving the area to seek housing elsewhere. Conversely, occupancy rates below 94% *may* indicate some softness or weakness in a market, which may be the result of a saturated or overbuilt market, or one that is going through a decline due to economic downturns and corresponding demographic declines.

Based on our survey of multifamily rentals, the PSA (Evansville) has a very high occupancy rate of 97.1%, equaling the highest annual rate from the four selected periods shown on the preceding table. This is a likely indication that there is a shortage of multifamily rental supply in the local market. The 98%+ occupancy rates in the North and West submarkets are very high. In fact, given that there were only 14 or fewer vacant units identified in the North and West submarkets, it appears that there is extremely limited availability among multifamily rental properties in these submarkets. The lowest occupancy rate of 96.0% in the East Submarket is still considered a relatively high occupancy rate. This submarket has 205 vacant units indicating the prospective renters have a larger base of potential rental alternatives from which they can choose as compared with other areas in the city.

**Non-Subsidized Housing (Market-rate and Tax Credit)**

Non-subsidized rental housing consists of product that does not receive or operate with any direct federal government financial assistance. This typically includes market-rate housing and product developed under the Low-Income Housing Tax Credit program. While Tax Credit housing has programmatic income and rent restrictions, the property owner and renters do not receive a federal subsidy of any kind. Therefore, for the purposes of this analysis, these two housing segments are evaluated together as non-subsidized housing.

The following table summarizes the breakdown of market-rate and Tax Credit units surveyed within the PSA (Evansville).

Market-rate						
Bedroom	Baths	Units	Distribution	Vacancy	% Vacant	Median Collected Rent
Studio	1.0	123	1.3%	5	4.1%	\$459

Source: Bowen National Research

The market-rate units are 96.7% occupied and the Tax Credit units are 96.8% occupied. These are both relatively high occupancy rates, indicating healthy markets but somewhat limited availability of product.

The following tables summarize the breakdown of non-subsidized (market-rate and Tax Credit) units surveyed within Evansville and its five submarkets. Note that 2019 median rents have also been provided, as well as the corresponding change over the past two years with an annualized percent change in rents.

Market-Rate Median Collected Rents							Historical Data (2019)

Source: Bowen National Research

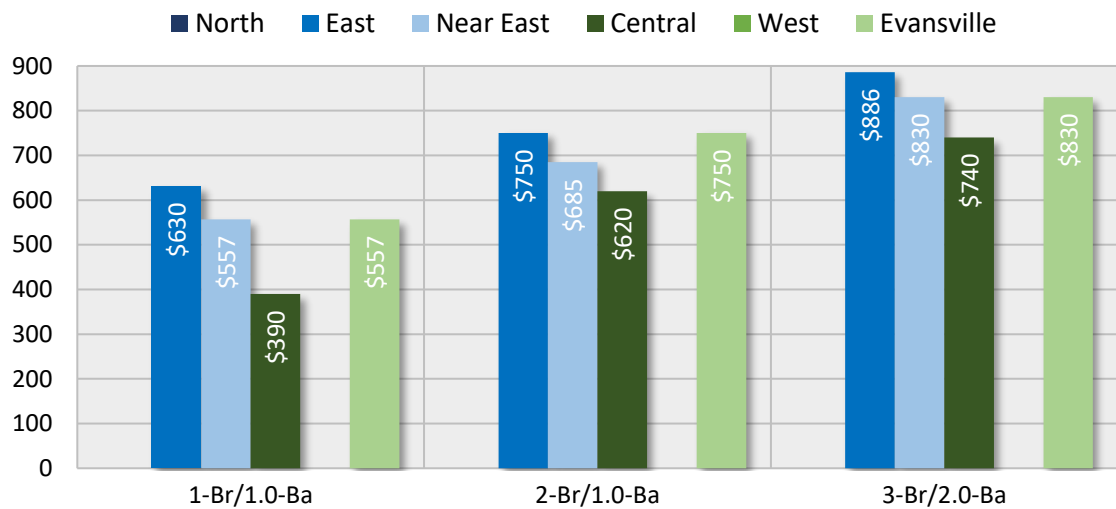

All five of the submarkets offer at least some market-rate multifamily choices. The Central Submarket has relatively high median market-rate rents, while the lowest rents are generally within the Near East Submarket. As for Tax Credit units, the North and West submarkets do not offer any Tax Credit units, or we were unable to survey any Tax Credit projects. While the Tax Credit rents between the submarkets do not vary significantly, the Central and West submarkets appear to offer some of the highest market-rate rents.

Based on a comparison with 2019 survey data, it appears that market-rate rents are increasing at an annual rate of around 4.7%, while Tax Credit rents are increasing at a nearly equal rate of 4.6%. While the average annual rate of rent growth among the market-rate supply is slightly high, the average annual rent growth among the Tax Credit supply is unusually large and likely outpacing household income growth among most low-income households.

### Market-rate Median Collected Rents

### Tax Credit Median Collected Rents

### **Government-Subsidized Housing**

There is a total of 14 projects in the PSA (Evansville) that contain some type of government subsidy. These 14 projects contain a total of 1,212 units. All of these projects are fully occupied, and most of these properties maintain wait lists. The 100.0% occupancy rate and wait lists at a majority of the government-subsidized projects are clear indications that there is pent-up demand for rental housing affordable to very low-income households.

The 11 government-subsidized projects within the PSA operate under a variety of housing programs and serve both seniors and families. Generally, these properties have few amenities, are older and offer small unit sizes (square feet). The government-subsidized units (both with and without Tax Credits) in the PSA are summarized as follows.

Subsidized Tax Credit					
Bedroom	Baths	Units	Distribution	Vacancy	% Vacant
Studio	1.0	204	37.6%	0	0.0%
One-Bedroom	1.0	102	18.8%	0	0.0%
Two-Bedroom	1.0	71	13.1%	0	0.0%
Two-Bedroom	1.5	14	2.6%	0	0.0%
Three-Bedroom	1.0	84	15.5%	0	0.0%
Three-Bedroom	1.5	11	2.0%	0	0.0%
Three-Bedroom	2.0	30	5.5%	0	0.0%
Four-Bedroom	1.5	9	1.7%	0	0.0%
Four-Bedroom	2.0	18	3.3%	0	0.0%
<b>Total Subsidized Tax Credit</b>		<b>543</b>	<b>100.0%</b>	<b>0</b>	<b>0.0%</b>
Government-Subsidized					
Bedroom	Baths	Units	Distribution	Vacancy	% Vacant
One-Bedroom	1.0	451	67.4%	0	0.0%
Two-Bedroom	1.0	108	16.1%	0	0.0%
Two-Bedroom	1.5	69	10.3%	0	0.0%
Three-Bedroom	1.5	39	5.8%	0	0.0%
Four-Bedroom	1.5	2	0.3%	0	0.0%
<b>Total Subsidized</b>		<b>669</b>	<b>100.0%</b>	<b>0</b>	<b>0.0%</b>

All surveyed government-subsidized units in the PSA (Evansville) are occupied. This 100.0% occupancy rate among all subsidized projects and long wait lists at several projects indicates a continued pent-up demand for government-subsidized rentals in the market.

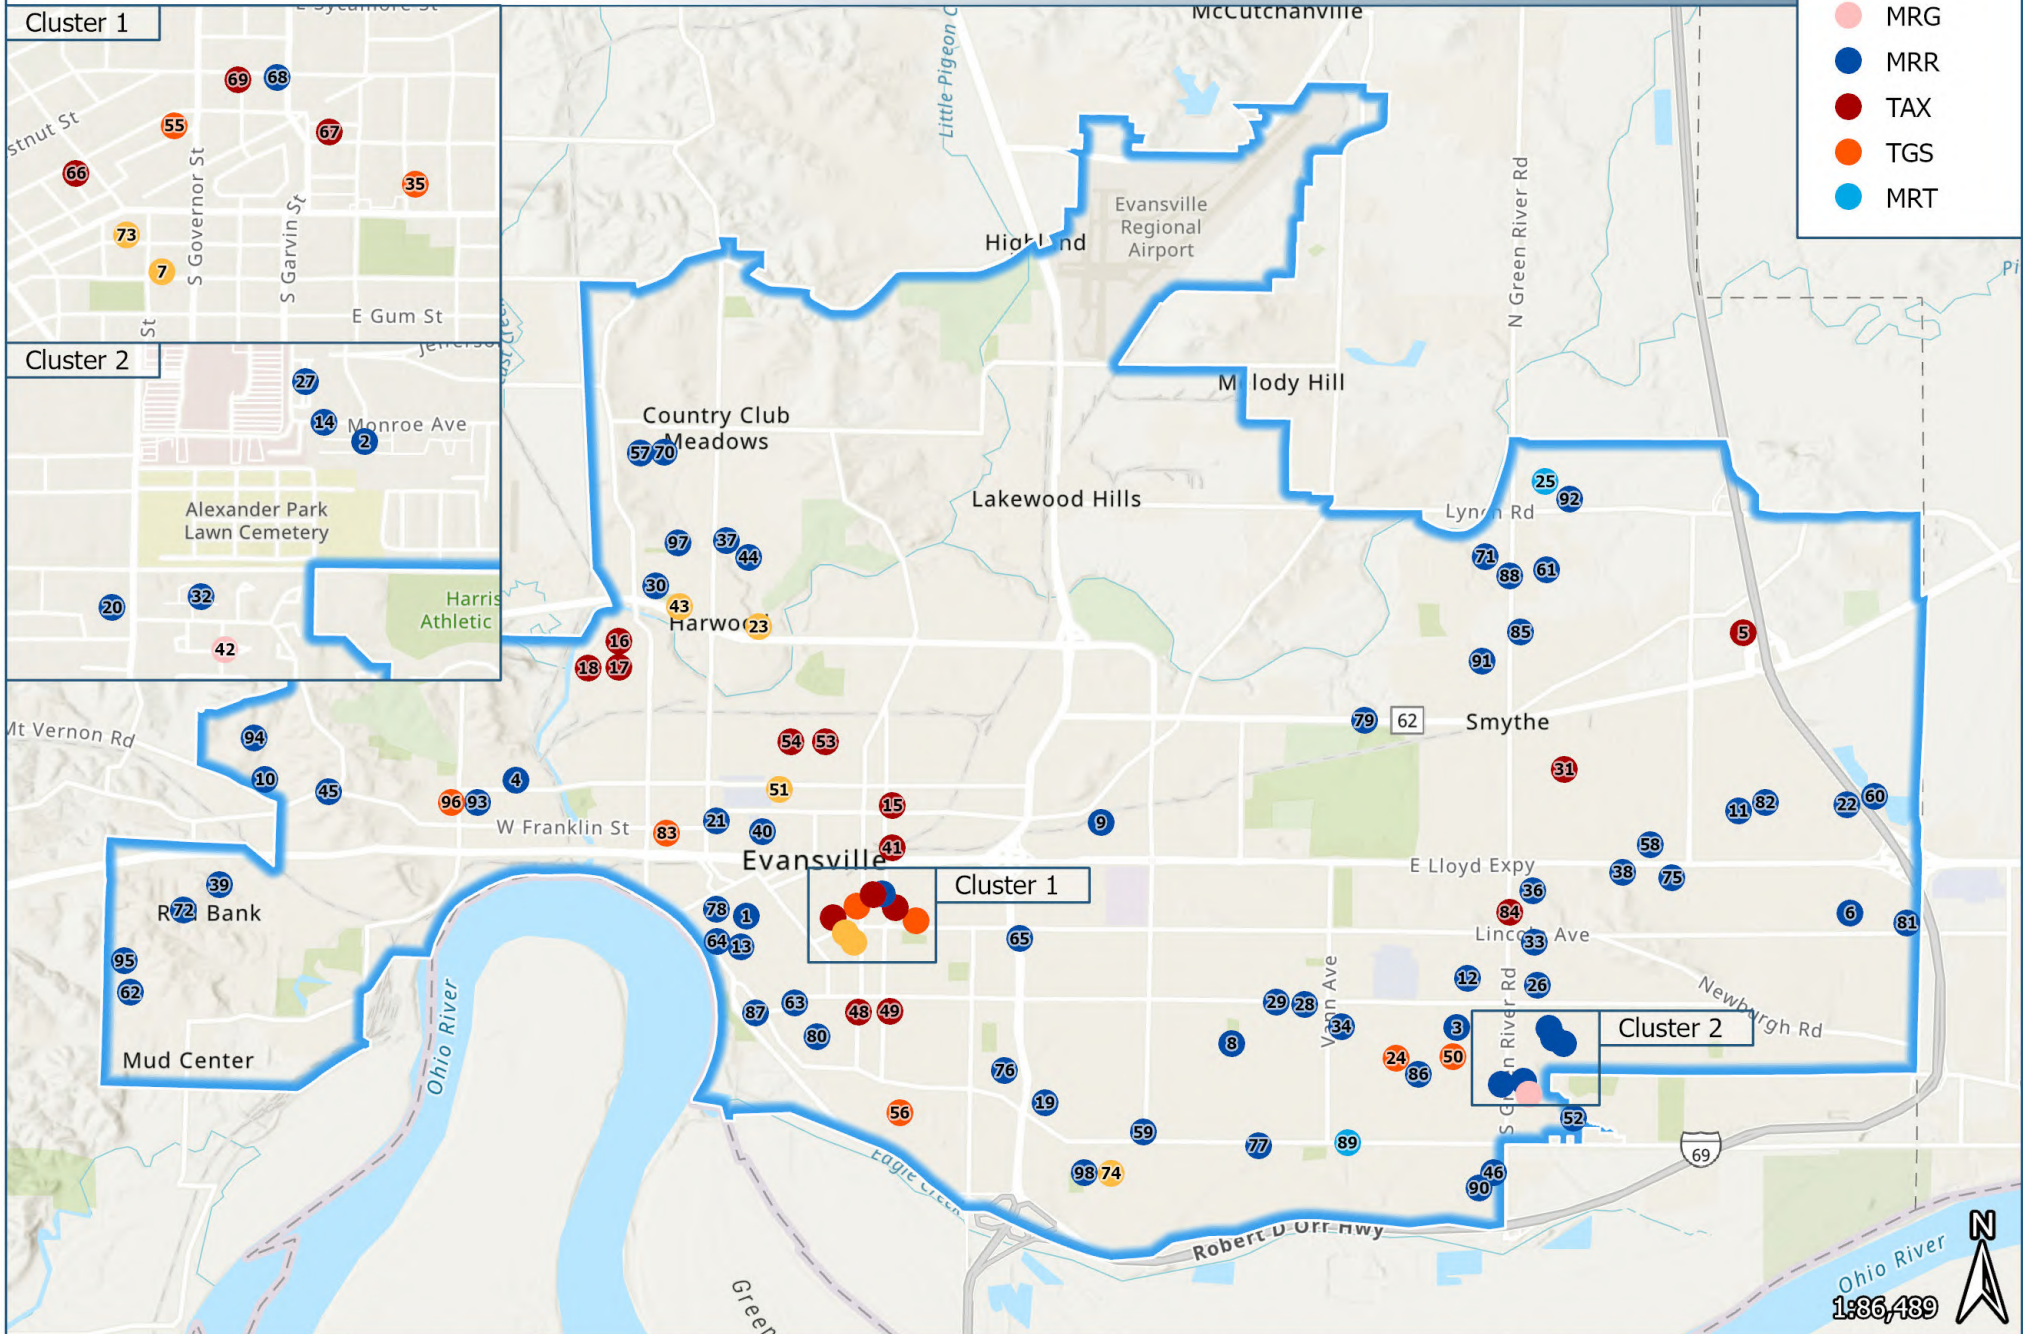

The subsidized housing market is dominated by smaller bedroom types, with nearly two-thirds of all subsidized housing consisting of studio and one-bedroom units. This disproportionately high share of smaller bedroom types is likely influenced by the fact that approximately half of the subsidized projects are restricted to seniors. The share of two-bedroom units is around 25% and the share of three-bedroom or larger units is around 15%. The share of three-bedroom or larger units is fairly typical, however, the share of two-bedroom units is lower than normal. Regardless, demand for all bedroom types is strong as evidenced by the high occupancy rates and wait lists at virtually all of the subsidized projects.

According to a representative with the Evansville Housing Authority, there are approximately 1,575 Housing Choice Voucher holders within the housing authority's jurisdiction, and 500 people currently on the waiting list for additional Vouchers. The waiting list is closed and is expected to reopen in 2<sup>nd</sup> or 3<sup>rd</sup> quarter 2021. Annual turnover is estimated at 240 households. This reflects the continuing need for Housing Choice Voucher assistance.

A map illustrating the location of all multifamily apartments surveyed within Evansville is included on the following page.

## **Non-Conventional Rentals**

Non-conventional rentals are considered rental units typically consisting of single-family homes, duplexes, units over store fronts, mobile homes, etc. For the purposes of this analysis, we have assumed that rental properties consisting of four or less units are non-conventional rentals. As such, there are 12,143 non-conventional rental units in the PSA (Evansville) based on 2019 Five-Year American Community Survey estimates, reflecting 52.8% of the rental housing stock. The share of non-conventional rentals ranges from 28.5% in the East Submarket to 66.9% in the Central Submarket. With a majority of the rental housing stock in the PSA consisting of non-conventional rentals, it is clear that this segment is significant and warrants additional analysis.

The following table and graph summarize 2019 Five-Year estimates of gross rents (tenant-paid rents and utilities) and number and share of the rental properties consisting of four or less units by study area. These rents are for all rental product types including apartments, non-conventional rentals, and mobile homes. However, since the majority of all rentals in the city are considered non-conventional rentals, the rents below provide insight as to likely rents for non-conventional rentals within the PSA.

Estimated Gross Rents and Share of Non-Conventional Rentals by Market												
Gross Rent	North		East		Near East		Central		West		Evansville	
	Units	Share	Units	Share	Units	Share	Units	Share	Units	Share	Units	Share

### Gross Rents/Share of Non-Conventional Rentals (2015-2019)

As the preceding illustrates, two-thirds of rental units in the PSA (Evansville) have rents between \$500 and \$1,000, while a notable share (16.0%) of rental units in the PSA have rents between \$1,000 and \$1,500. While all five submarkets have over 70% of their rental product priced below \$1,000, the highest share (77.0%) of such product is in the Near East Submarket.

In an effort to further evaluate the non-conventional rental housing inventory, we conducted a sample survey identifying a total of 76 individual units *available* for rent within detached single-family homes, duplexes, units over storefronts, etc. While these rentals do not represent all non-conventional rentals, these units are representative of common characteristics of the various non-conventional rental alternatives available in the market. As a result, these rentals provide a good baseline to evaluate the attributes of non-conventional rentals.

The following table aggregates the 76 non-conventional rental units surveyed in the PSA by bedroom type.

Non-Conventional Rental Supply				
Bedroom	Units	Rent Range	Average Rent	Average Rent PSF
Studio	2	\$450-\$575	\$513	\$0.91
One-Bedroom	12	\$450-\$750	\$538	\$1.06
Two-Bedroom	31	\$495-\$1,149	\$695	\$0.77
Three-Bedroom	24	\$695-\$1,450	\$945	\$0.84
Four-Bedroom	7	\$850-\$1,995	\$1,123	\$0.66
Total	76			

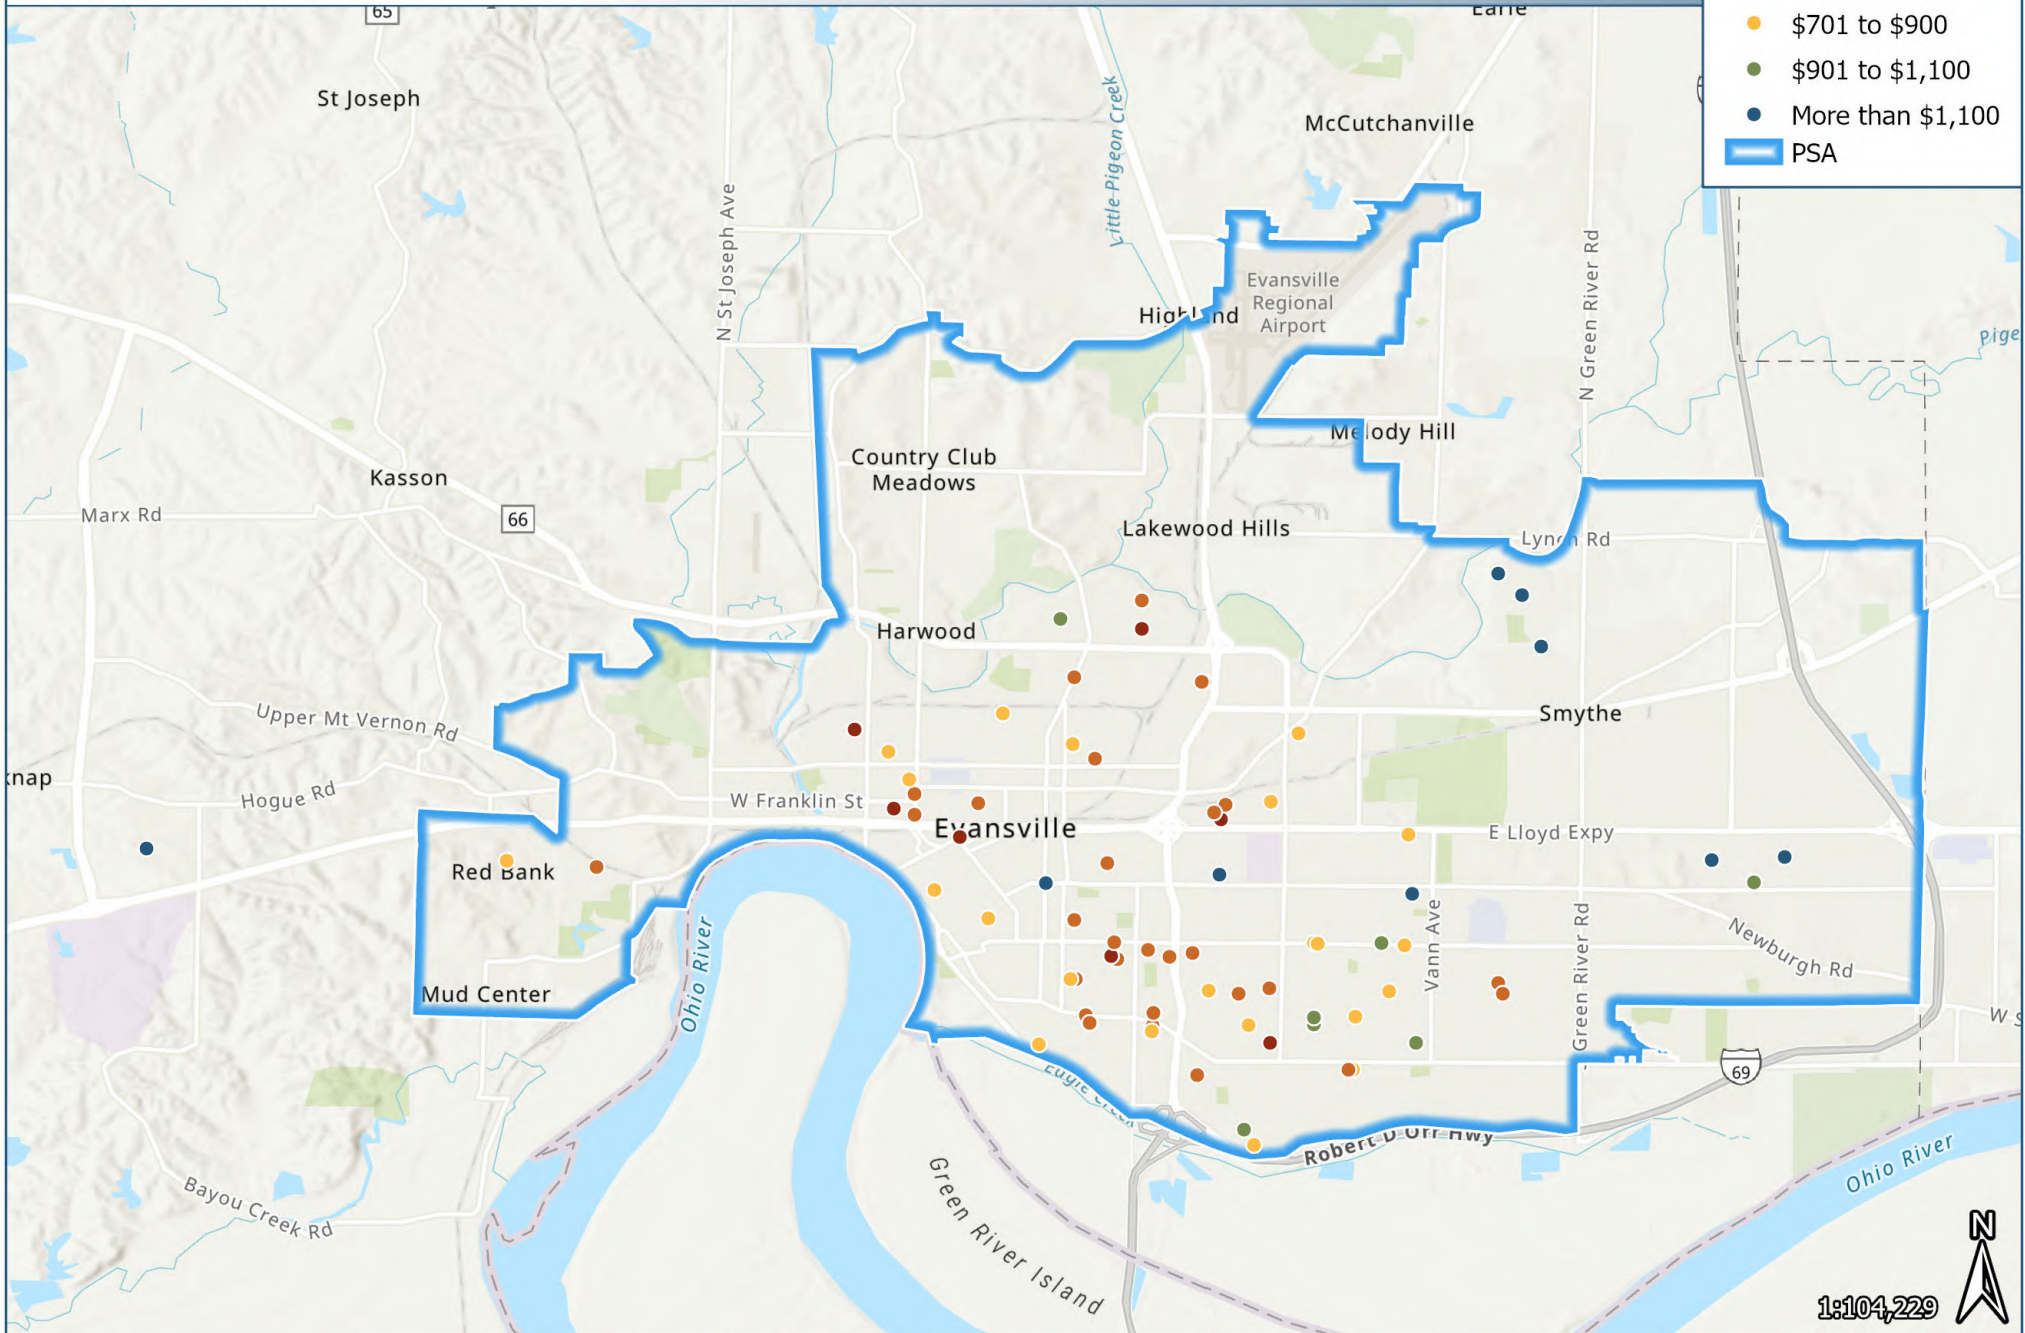

PSF – Per Square Foot

The distribution of surveyed units by bedroom type is more concentrated among two- and three-bedroom units, representing nearly three-quarters (72.4%) of the identified supply. This is comparable to other markets. Average collected rents by bedroom type range from \$513 for a studio unit to \$1,123 for a four-bedroom unit. The average rents per-square-foot by bedroom type range from \$0.66 for a four-bedroom unit to \$1.06 for a one-bedroom unit. Generally, the rents of non-conventional rentals are lower than market-rate apartment rentals but higher than typical Tax Credit rent levels. As such, it may be difficult for some low-income households to afford non-conventional rentals. When also considering that the amenity packages typical of non-conventional product are relatively limited along with additional tenant-paid utility costs, it would appear the non-conventional rentals represent less of a value than most multifamily apartments in the market.

A full listing of unit details of all non-conventional rentals identified as available to rent in the city is included in Addendum C: Non-Conventional Rentals.

A map of the identified non-conventional rentals is included on the following page.

- \$500 or Less
- \$501 to \$700
- \$701 to \$900
- \$901 to \$1,100
- More than \$1,100

## **C. FOR-SALE HOUSING SUPPLY**

### **For-Sale Housing Overview**

Bowen National Research, through a review of the Multiple Listing Service information for the PSA (Evansville), identified both historical for-sale residential data and currently available for-sale housing stock. Key metrics that were considered include age of product, bedroom types, number of bathrooms, square footage, geographic location, and days on market (DOM).

Within the entire city of Evansville there were 15,879 housing units sold between January 2010 and December 2020. More than one-third (36.9%) of the PSA's sold homes were within the Near East Submarket. This is consistent with historic trends from previous analyses of the market. The remaining four submarkets each contain roughly 12% to 22% of the sold housing supply. There is a total of 168 housing units available for purchase in the city of Evansville, of which over one-third (33.9%) are within the Near East Submarket, which is significantly greater than the other submarkets. The following table summarizes the available and sold (since January 2010) housing stock for the PSA and its submarkets.

Evansville For-Sale/Sold Housing Supply						
Type	North	East	Near East	Central	West	Evansville
Available	18	25	57	47	21	168
Sold	3,433	2,258	5,866	2,361	1,961	15,879
Total	<b>3,451</b>	<b>2,283</b>	<b>5,923</b>	<b>2,408</b>	<b>1,982</b>	<b>16,047</b>

Source: Indiana Regional MLS and Bowen National Research

The historical and available for-sale housing supply for the PSA is compared with the five submarkets in this section.

### **Historical For-Sale Analysis**

The historical data includes any home sales that occurred within the study areas from January 2010 to December 2020. It is our opinion that an evaluation of sales activity after 2009 is representative of true market conditions and market norms following the "Great Recession."

The following table includes a summary of annual for-sale residential transactions that occurred within the PSA (Evansville) since January 2010.

City of Evansville				
For-Sale Housing by Year Sold				
Year	Units Sold		Median Price Sold	
	Number	Change	Price	Change
2010	1,929	-	\$103,500	-
2011	1,867	-3.2%	\$100,900	-2.5%
2012	2,136	14.4%	\$108,838	7.9%
2013	2,345	9.8%	\$110,000	1.1%
2014	1,852	-21.0%	\$104,311	-5.2%
2015	1,371	-26.0%	\$82,900	-20.5%
2016	1,551	13.1%	\$87,000	4.9%
2017	1,631	5.2%	\$89,500	2.9%
2018	1,596	-2.1%	\$90,000	0.6%
2019	1,722	7.9%	\$102,000	13.3%
2020	1,833	6.4%	\$115,000	12.7%

Source: Indiana Regional MLS and Bowen National Research

Annual residential for-sales activity within the PSA over the past two years has increased, while the median sales price has increased over the past five years. The latest (2020) median sales price of \$115,000 reflects an 11-year high. This is reflective of a strong and growing level of demand for for-sale housing.

The following graph illustrates the overall annual number of homes sold in the PSA (Evansville) since January of 2010 and the annual median sales price.

The following table includes a summary of the total for-sale residential transactions that occurred within each submarket and the overall PSA since January 2010.

Sales History by Submarket (Jan. 1, 2010 through Dec. 31, 2020)							
	Total Units	Percent of PSA	Low Sales Price	High Sales Price	Average Sales Price	Median Sales Price	Average Days On Market
<b>North</b>	3,433	21.6%	\$2,775	\$850,000	\$114,970	\$108,000	65
<b>East</b>	2,258	14.2%	\$12,000	\$2,050,000	\$160,856	\$139,000	79
<b>Near East</b>	5,866	36.9%	\$500	\$1,300,000	\$84,220	\$76,325	73
<b>Central</b>	2,361	14.9%	\$25	\$910,000	\$59,824	\$37,100	91
<b>West</b>	1,961	12.3%	\$2,000	\$410,000	\$83,434	\$82,000	67
<b>PSA - Evansville</b>	15,879	100.0%	\$25	\$2,050,000	\$98,041	\$85,000	74

Source: Indiana Regional MLS and Bowen National Research

Among the more than 15,000 homes sold over the past decade, the largest share (36.5%) has occurred within the Near East Submarket. Homes within this submarket have an average sales price of \$84,220. The highest average sales price of \$160,856 has been within the East Submarket. Regardless of the submarket, homes have been selling quickly, with an average days on market no higher than 91.

The graph below illustrates the number of homes sold by submarket within the PSA since 2010.

Average home sales price for each submarket is summarized in the table below:

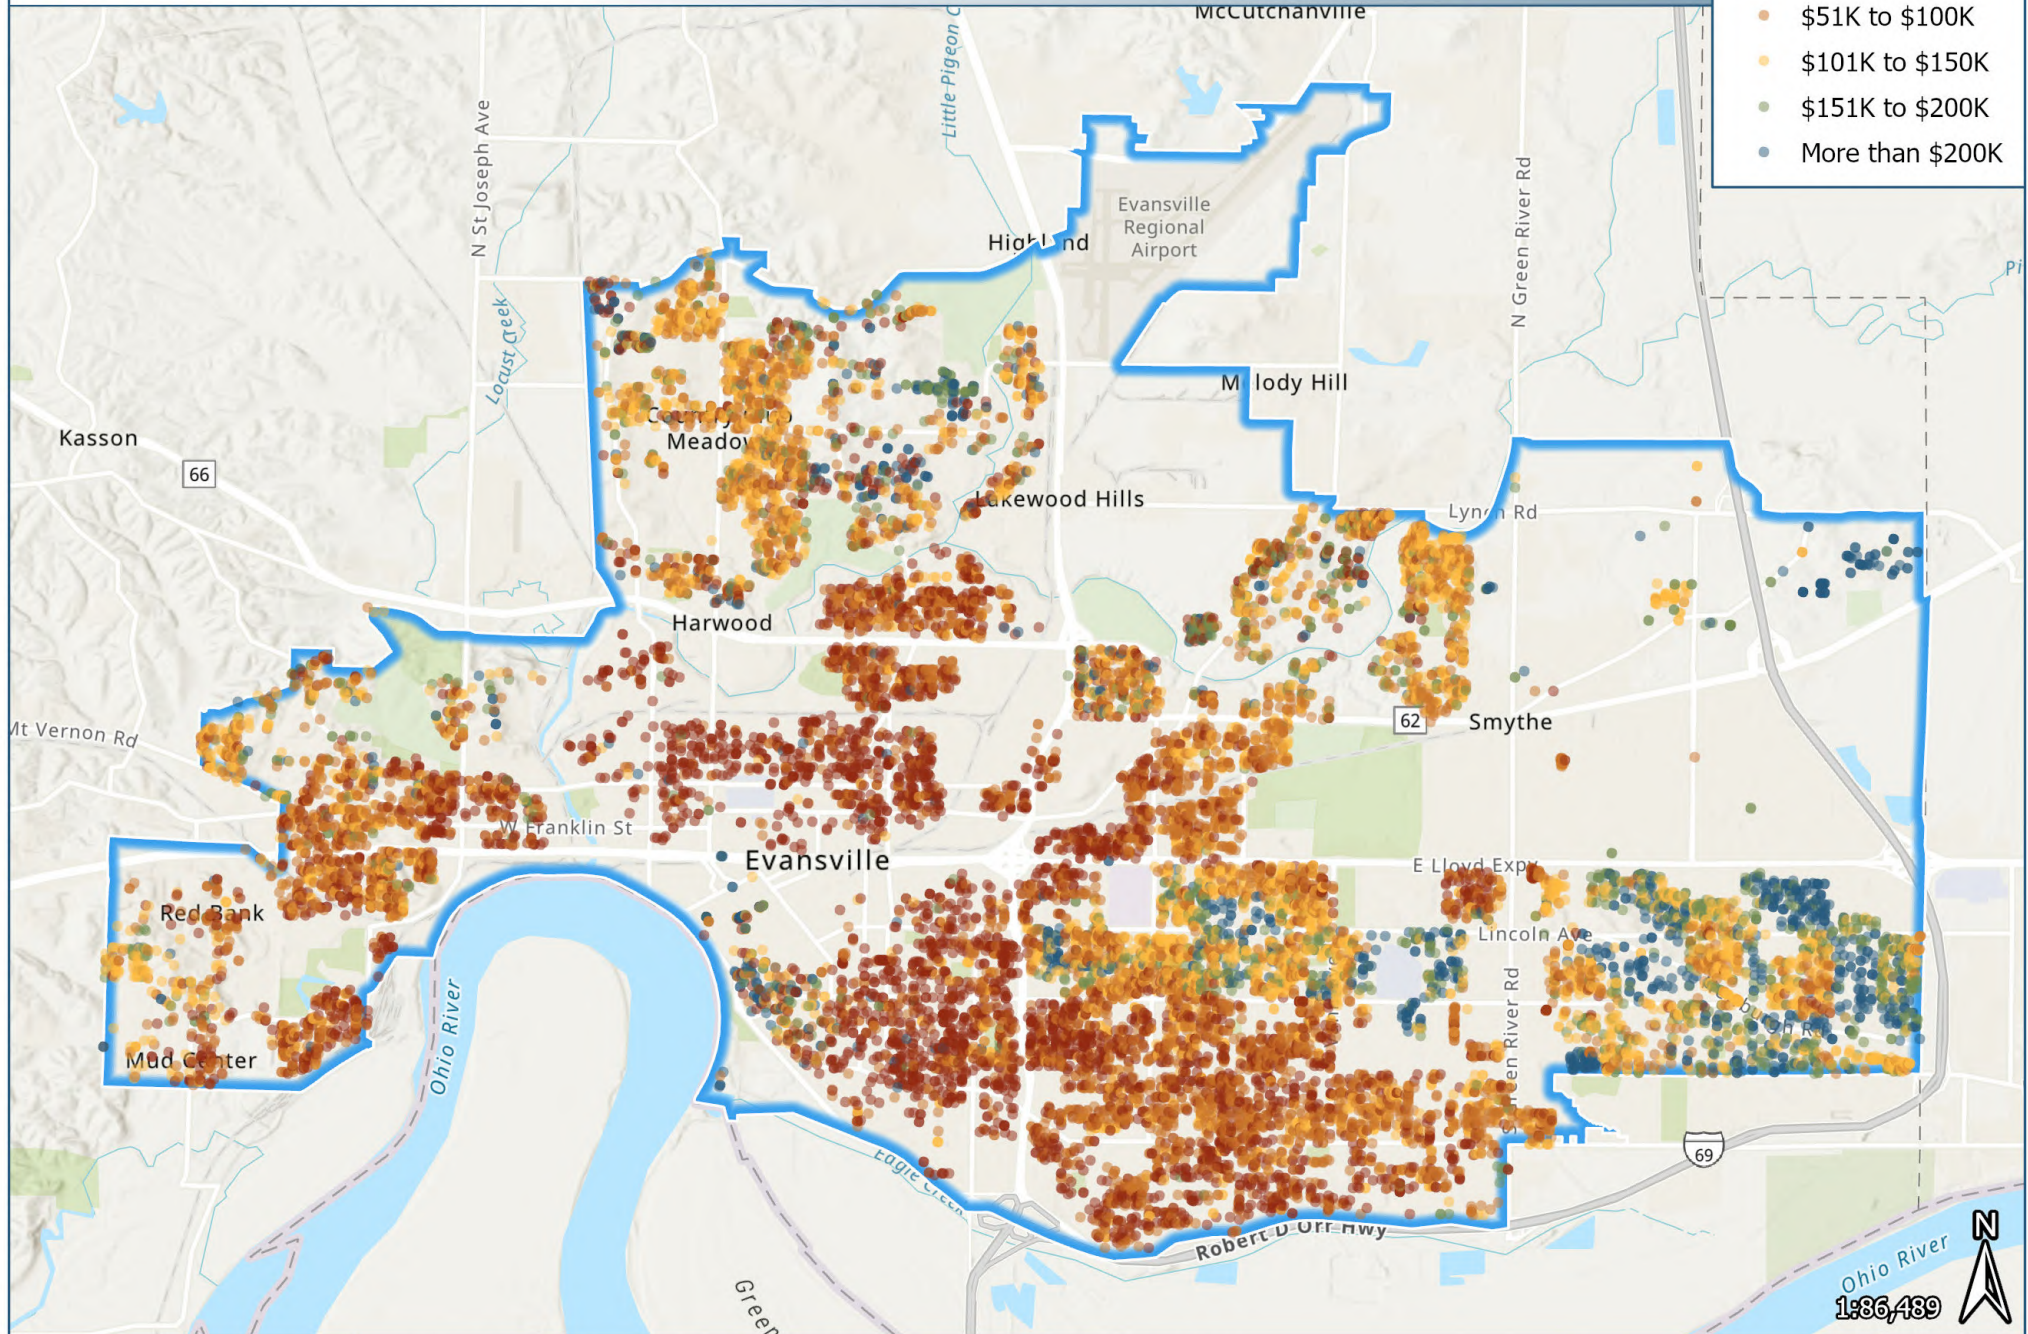

Because newer product sold in the PSA (Evansville) provides insight as to the potential for additional *new* product, we have evaluated the home sales activity of product built since 2000. The distribution of home sales by bedroom type for modern product (built since 2000) in the PSA is summarized in the following table:

PSA - City of Evansville							
New Home Sales by Bedrooms – Year Built 2000 and later (Jan. 1, 2010 through Dec. 31, 2020)							
Bedrooms	Number Sold	Average Baths	Average Square Feet	Price Range	Median Sales Price	Median Price Per Sq. Ft.	Average Days on Market
One-Br.	6	1.0	911	\$43,000 - \$146,600	\$133,000	\$134.00	352
Two-Br.	153	2.0	1,292	\$10,000 - \$405,000	\$134,000	\$106.43	111
Three-Br.	518	2.25	1,728	\$18,000 - \$585,000	\$168,000	\$103.35	71
Four-Br.	104	3.0	2,721	\$41,000 - \$867,000	\$245,000	\$102.39	71
Five+-Br.	11	3.5	3,483	\$70,500 - \$2,050,000	\$369,900	\$117.33	46
Total	792	2.25	1,793	\$10,000 - \$2,050,000	\$165,293	\$104.07	81

Source: Indiana Regional MLS and Bowen National Research

As the preceding table illustrates, nearly two-thirds (65.4%) of the newer units sold contained three-bedrooms. As expected, the more bedrooms a unit contains equates to higher median home prices. Interestingly, the average days on market (the number of days a home was listed for sale before it sold) for the newer product is 81, which is slightly longer than but comparable to the overall market's average of 71 days on market. It should be noted, however, that it is not unusual for newer product with its correspondingly higher prices to take longer to sell than older and lower priced product. This is typically the result of the more limited number of higher income households that can afford these higher priced and newer units. A map illustrating the location of all homes sold over the past decade within Evansville is included on the following page.

- PSA
- \$50K or Less
- \$51K to \$100K
- \$101K to \$150K
- \$151K to \$200K
- More than \$200K

### **Available For-Sale Housing Supply**

Through Multiple Listing Services, we identified 168 housing units within Evansville that were listed as “for sale” housing as of the end of December 2020. Virtually all of the product we surveyed included single-family home listings, while a limited number of duplexes, manufactured homes, and other non-conventional product were identified. While there are likely some other for-sale residential units available for purchase, such homes were not identified during our research due to the method of advertisement or simply because the product was not actively marketed.

It should be noted that when the PSA’s (Evansville’s) estimated 28,140 owner-occupied housing units are considered, the 168 available for-sale units represent a 0.6% availability/vacancy rate, which is significantly lower than the 1.3% vacancy rate from our 2020 analysis of this market.

The following table summarizes the total number of homes that were listed in Evansville as available for purchase, along with the median list price, during our annual research of the market, dating back to 2016.

City of Evansville					
Available For-Sale Housing by Year					
Year	Units Available		Average List Price		Average Days on Market
	Number	Change	Price	Change	
2016	577	-	\$94,465	-	152
2017	327	-43.3%	\$98,408	4.2%	132
2018	358	9.5%	\$115,098	17.0%	101
2019	369	3.1%	\$124,298	8.0%	113
2020	168	-54.5%	\$154,443	24.3%	134

Source: Indiana Regional MLS and Bowen National Research

With only 168 homes available for purchase, the available for-sale supply has declined significantly from the 369 housing units within Evansville one year earlier, reflective of a decrease of 54.5%. This follows the total available inventory of 577 in 2016, illustrating the diminishing trend of available housing stock in the market. Over the past four years, the average list price has steadily increased and the 24.3% increase in 2020 is a four-year high. Since 2016, the average list price has increased by \$59,978 or 63.5%, representing an annual increase of 15.9%. As such, the inventory of available for-sale housing appears to be diminishing significantly while home prices are increasing rapidly. This places a significant challenge on homebuyers, particularly lower income households. Beyond our analysis of the characteristics and trends of the for-sale housing market, we also considered the available housing units by price point in our demand estimates for housing units by household income levels in Section VII of this report.

The following table summarizes the inventory of available for-sale housing in Evansville by submarket.

Available For-Sale Housing by Market (As of December 31, 2020)							
	Total Units	% Share of PSA	Low List Price	High List Price	Average List Price	Median List Price	Average Days On Market
<b>North</b>	18	10.7%	\$59,000	\$995,000	\$229,028	\$167,400	91
<b>East</b>	25	14.9%	\$105,000	\$969,969	\$358,205	\$289,900	146
<b>Near East</b>	57	33.9%	\$29,900	\$349,900	\$104,538	\$89,900	124
<b>Central</b>	47	28.0%	\$16,900	\$424,900	\$93,208	\$62,500	171
<b>West</b>	21	12.5%	\$36,843	\$335,000	\$120,443	\$109,900	101
<b>PSA - Evansville</b>	168	100.0%	\$16,900	\$995,000	\$154,443	\$105,000	134

Source: Indiana Regional MLS and Bowen National Research

Based on the preceding table, the largest share (33.9%) of the available product is located in the Near East Submarket. The average list price (\$104,538) of housing in this submarket is the second lowest of the five submarkets and it has an average days on market (124) that is lower than the overall city. This may be an indication that despite the large inventory of available product in this submarket, demand for housing remains strong. The lowest *average* list price (\$93,208) is within the Central Submarket, while the highest median list price (\$358,205) is in the East Submarket. While the Central Submarket appears to have a large number of for-sale housing product that might be considered affordable to low-income households, based on our personal on-site observations, it appears that much of this product is older and lower quality. In fact, most of the available for-sale product is more than 40 years old. Therefore, while this product may be considered affordable, it is likely that due to its age and lower quality, that such product would require additional costs to repair, update and maintain that may be difficult for some lower income households to afford.

The distribution of available for-sale residential units by price point follows:

Available For-Sale Housing by Price Point (As of December 31, 2020)												
Less Than \$100k		\$100k-\$149,999		\$150k-\$199,999		\$200k-\$249,999		\$250k-\$299,999		\$300,000+		
Units	Median Price	Units	Median Price	Units	Median Price	Units	Median Price	Units	Median Price	Units	Median Price	
North	4	\$84,200	3	\$119,000	4	\$167,400	2	\$232,450	2	\$264,950	3	\$399,900
East	0	-	1	\$105,000	1	\$162,500	7	\$225,000	6	\$282,400	10	\$569,950
Near East	32	\$66,250	17	\$120,000	4	\$160,950	2	\$247,450	1	\$279,900	1	\$349,900
Central	36	\$49,900	4	\$109,200	1	\$184,000	2	\$208,500	2	\$289,450	2	\$391,950
West	10	\$69,950	6	\$124,500	2	\$177,400	2	\$236,200	0	-	1	\$335,000
Evansville	82	\$60,000	31	\$119,900	12	\$162,250	15	\$230,000	11	\$279,000	17	\$399,900

Source: Indiana Regional MLS and Bowen National Research

Nearly one-half (48.8%) of the available for-sale supply in the PSA (Evansville) is priced below \$100,000. Of the 82 units priced below \$100,000, the median price is \$60,000. Based on our on-site evaluation of the PSA's housing stock and an analysis of secondary data on such housing, it appears that much of the housing inventory is more than 40 years old and of lower quality. As a result, while it may be deemed that there is an abundance of for-sale product available to lower income households, such product likely requires additional costs for repairs, modernization and maintenance, which may be difficult for many low-income households to afford. It should also be pointed out that there are only 12 homes priced between \$150,000 and \$199,999, 15 homes available that are priced between \$200,000 and \$249,999 and only 11 homes available that are priced between \$250,000 and \$299,999 within the overall PSA. This appears to be a disproportionately low share of such product. As a result, the PSA may have difficulty retaining or attracting higher income households seeking such product. The available inventory has been considered in the housing gap estimates portion of this report.

Both the Central and Near East submarkets have disproportionately high shares (over half) of product priced below \$100,000 and very little product priced above \$150,000. As stated earlier, this lower priced product that dominates the Central and Near East submarkets is generally older and lower quality product that will likely need repaired or modernized. As a result, these two submarkets will likely require rehabilitation or replacement of some of the older housing stock and possibly the addition of some higher priced product that could appeal to young professionals and empty nesters (age 55 and older households) seeking to downsize from their current residences. While the North and East submarkets have smaller inventories of available for-sale product, they both have a good balance of product by various price points. As a result, these submarkets appear to have the ability to serve a variety of housing needs.

The following table illustrates residential units currently available for purchase in Evansville that were built in 2000 or later.

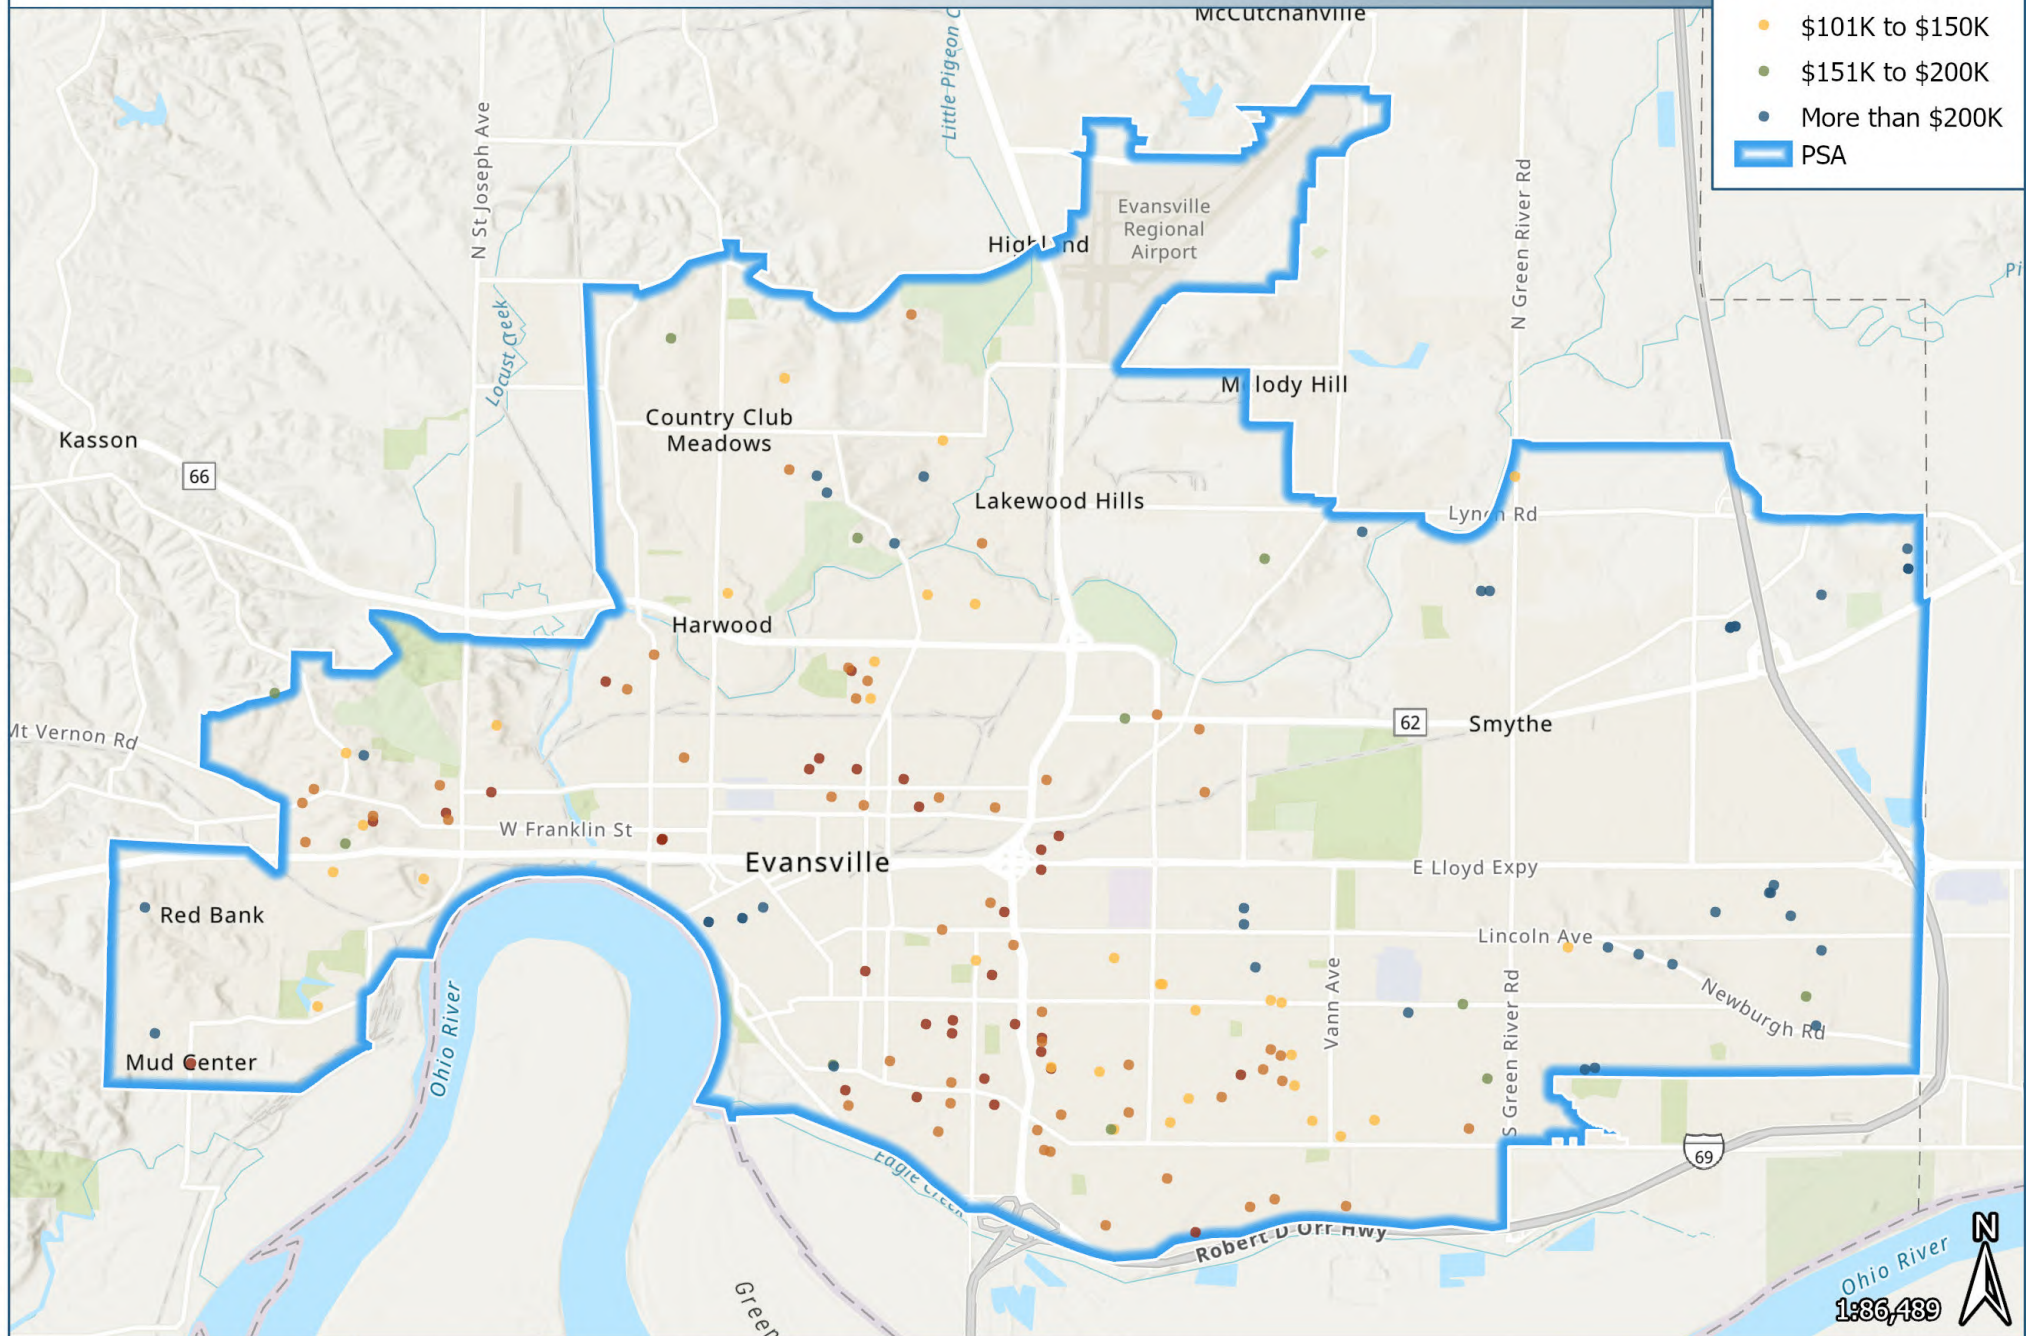

PSA - City of Evansville							
Available New Homes by Bedrooms – Year Built 2000 and later (As of December 31, 2020)							
Bedrooms	Number Listed	Average Baths	Average Square Feet	Price Range	Median List Price	Median Price Per Sq. Ft.	Average Days on Market
Two-Br.	3	2.25	1,612	\$184,000 - \$259,900	\$202,000	\$138.64	71
Three-Br.	15	2.5	2,116	\$94,900 - \$629,900	\$234,900	\$130.18	118
Four-Br.	5	3.25	3,201	\$230,000 - \$995,000	\$324,900	\$134.48	114
Total	23	2.75	2,286	\$94,900 - \$995,000	\$259,900	\$134.48	111

Source: Indiana Regional MLS and Bowen National Research

There are only 23 identified residential units in the PSA (Evansville) that are available for purchase and built in 2000 or later. While this inventory of newer product is priced slightly higher than the available modern homes from our recent surveys of this market, it is a low portion of the overall market. The average square footage of the newest for-sale residential units is 2,286, with an average list price of \$259,000. Homes priced at this level are likely not affordable to a majority of Evansville residents. Overall, these newer homes have an average number of days on market of 111, which is relatively fast. Based on this analysis, there are very limited options available for potential buyers seeking modern housing alternatives in the PSA. This is particularly true of people like young professionals or seniors seeking to downsize from their current housing situation, as well as for families whose incomes have increased and are wanting to upgrade from their current residences. As such, there is likely a need for modern for-sale product that serves such households. A map illustrating the location of available for-sale homes in Evansville is included on the following page.

- \$50K or Less
- \$51K to \$100K
- \$101K to \$150K
- \$151K to \$200K
- More than \$200K

#### **D. SENIOR CARE HOUSING**

Evansville, like larger communities throughout the country, has a large senior population that requires a variety of senior housing alternatives. Among seniors age 75 and older, some individuals are either seeking a more leisurely lifestyle or need assistance with Activities of Daily Living (ADLs). Four levels of care typically respond to older adults seeking, or who need, alternatives to their current living environment. They include, in order of increasing care requirements, independent living, congregate care, assisted living (including memory care), and nursing care.

Independent living and congregate care have often been used to describe the same type of housing. Independent living (in its purest form) is shelter only without services. Congregate care provides shelter and services such as meals and housekeeping. For the purposes of this analysis, we have classified independent living facilities as shelter without any meals included in monthly fees. These facilities may or may not have additional services included in the monthly fees.

In Indiana, assisted living facilities are licensed as Residential Care Facilities by the Indiana State Department of Health (ISDH) Division of Long Term Care. The licensure dictates that a facility must meet a certain building standard that dictates construction, fire rating, and other health and safety issues. These facilities generally offer limited care that is designed for senior citizens who need some assistance with daily activities but do not require nursing care.

A nursing home or nursing care facility is a privately operated establishment providing maintenance and personal or nursing care for persons (as the aged or the chronically ill) who are unable to care for themselves properly. These facilities are licensed by the Indiana State Department of Health (ISDH) Division of Long Term Care.

Within the Evansville area we identified and surveyed 25 senior residential facilities, three congregate care facilities, eight assisted living facilities, and 14 nursing homes (Note: some projects offer more than one housing type). These 25 facilities represent most of the senior care facilities in Evansville and are representative of the housing choices available to seniors requiring special care housing. We referenced the Medicare.com and Indiana State Department of Health websites for all licensed assisted living facilities and cross referenced this list with other senior care facility resources. As such, we believe the identified and surveyed senior care facilities represent most licensed facilities in Evansville. It should be noted that we were unable to survey any of the few independent living senior facilities in the city.

The 25 senior residential facilities surveyed are summarized as follows:

Evansville Senior Care Housing - 2021					Evansville 2014 Occupancy Rate	National Occupancy Rate**
Facility Type*	Facilities Surveyed	Total Units/Beds	Vacant Units/Beds	Occupancy Rates		
Congregate Care	3	150	12	<b>92.0%</b>	98.0%	91.5%
Assisted Living	8	592	138	<b>76.7%</b>	93.3%	90.7%
Nursing Care	14	1,462	387	<b>71.7%</b>	85.5%	88.0%
Total	25	2,204	537	<b>75.6%</b>	-	-

\*Some facilities offer more than one type of housing product

\*\*Source: American Seniors Housing Assn. *The State of Seniors Housing*

The Evansville senior care market is reporting overall occupancy rates between 71.7% (nursing care) to 92.0% (congregate care). Historically, the PSA (Evansville) senior care housing market has operated at relatively high occupancy levels. However, as happened throughout much of the country over the past year, the COVID-19 pandemic has adversely impacted occupancy levels among assisted living and nursing home facilities, with most operating below 80%. According to several facility operators, prospective resident traffic has greatly subsided due to health concerns of seniors living at such facilities. These same representatives believe as more people are vaccinated, tenant traffic and occupancy rates should return to normal levels.

Base monthly fees for congregate care housing are \$810 per month, assisted living base fees start at \$2,270 a month, and nursing care has a base monthly fee starting near \$5,475 (using a daily fee). These fees should be considered as starting points for future senior care projects in the area. Details of all surveyed senior care projects are included in Addendum A of this report.

Due to the abnormally low occupancy rates experienced at most senior care housing projects that were the result of COVID-19, we have not prepared any demand estimates for this type of housing product. It is anticipated that as occupancy levels return to more typical levels in the near future, the demand for additional senior care housing will return.

## **E. PLANNED & PROPOSED RESIDENTIAL DEVELOPMENT**

In order to assess housing development potential, we evaluated recent residential building permit activity and identified residential projects in the development pipeline for Evansville. Understanding the number of residential units and the type of housing being considered for development in Evansville can assist in determining how these projects are expected to meet the housing needs of the city.

The following tables illustrate single-family and multifamily building permits issued within the city of Evansville and Vanderburgh County for the past ten years (2020 data not available):

Housing Unit Building Permits for Evansville, IN:										
Permits	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
Multifamily Permits	39	2	22	2	4	10	80	6	0	18
Single-Family Permits	39	44	74	62	88	54	96	72	71	139
Total Units	78	46	96	64	92	64	176	78	71	157

Source: SOCDS Building Permits Database at <http://socds.huduser.org/permits/index.html>

Housing Unit Building Permits for Vanderburgh County:										
Permits	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
Multifamily Permits	64	12	24	24	26	54	104	20	10	34
Single-Family Permits	213	214	279	278	296	289	322	299	257	304
Total Units	277	226	303	302	322	343	426	319	267	338

Source: SOCDS Building Permits Database at <http://socds.huduser.org/permits/index.html>

While many economic, demographic and housing metrics within the city have been positive and are trending in a positive direction, new residential building permit activity in Evansville remained below 100 units annually from 2008 through 2015. However, activity increased significantly in 2016, when it reached 176 units which is a 10-year high. The 157 housing units permitted in 2019 was the second highest total in the city over the past decade. Residential building permit activity in Vanderburgh County has averaged over 300 units annually over the past decade. As such, residential development activity has remained steady for several years.

## Multifamily Rental Housing

Based on our interviews with planning representatives, it was determined that there are several rental housing projects either under construction or planned within the PSA (Evansville). These developments are summarized as follows:

Project Name & Address	Type	Units	Developer	Status/Details
Central Lofts 203 North West 5th Street	Tax Credit	62	Anderson Partners Development/ ECHO Housing Corporation	<b>Under Construction:</b> Allocated in 2018; 21 one-bedroom units, 37 two-bedroom units, and (4) three-bedroom units; 30% AMHI rent ranges from \$266 to \$356; 50% AMHI rent ranges from \$518 to \$705; 60% AMHI rent ranges from \$644 to \$880; Seven units will target various special needs population; ECD spring 2022
Evansville Townhomes 254 Canal Street & Scattered Sites	Tax Credit	30	Advantix Development Corporation (Evansville Housing Authority)	<b>Under Construction:</b> Allocated in 2018; All units will be at an 80% AMHI level; ECD summer 2021
TBD 4010 & 4016 Broadway Avenue	Market-Rate	21	Do It Right Investments	<b>Planned:</b> Three-bedroom/two-bath units; Still plan to go forward with project as of February 2021
Erie Pointe 320 Lincoln Avenue	Tax Credit	38	Advantix Development Corporation	<b>Planned:</b> Allocated in 2020; One-, two-, and three-bedroom units; 30%, 50% and 80% AMHI levels; No start date has been set as of February 2021
Memorial Lofts 1050 Bayard Park Drive and 535 Lincoln Avenue	Tax Credit	50	Memorial Community Development Corporation	<b>Under Construction:</b> Allocated in 2020; One-, two-, and three-bedroom units; 13 units at 30% AMHI; 14 units at 50% AMHI; 23 units at 80% AMHI; 24 units to open in August 2021; 26 units to open in November 2021
Forge on Main (AKA North Main Lofts) North Main and Illinois streets	Affordable	180	House Investments of Indianapolis	<b>Under Construction:</b> Demolition of former IGA store began in August 2020; Mixed-use; Studio, one-, and two-bedroom units; Rent ranging from \$530 to \$1,200; Considered “workforce housing” with incomes from \$28,000 to \$57,000; ECD 2022
5 <sup>th</sup> & Main 420 Main Street	Market-Rate	60+	Domo Development Company, LLC	<b>Planned:</b> Building located at 420 Main Street to be demolished in 2021 along with the Sycamore building; Mixed-use; Four floors of indoor parking; 60+ luxury apartments; ECD 2023
Cape on Cody 1106 and 1108 Cody Street	HOME Funds/ Section 8	2	Community Action Program of Evansville and Vanderburgh County (CAPE)	<b>Planned:</b> Project is still in the planning stages; Container homes; Contract rent for one-bedroom units \$395; Contract rent for two-bedroom units \$614; ECD 2021
Havens at Promenade North Burkhardt Road	Market-Rate	224	The Martin Group	<b>Proposed:</b> Mixed-use neighborhood (The Promenade); One-, two- and three-bedroom units; No permits have been issued as of February 2021

TBD – To be determined  
ECD – Estimated completion date  
N/A – Not Available

### **Senior Living Projects**

One senior rental housing project is planned in the area and is summarized below:

Project Name & Address	Type	Units	Developer	Status/ Details
Parkside Assisted Living 1701 North Heidelberg Avenue	Tax Credit/ GSS	120	C&H Capital LLC	<b>Planned:</b> Allocated 2020; Studio and one-bedroom units; Targeting households at 40%, 50%, 60%, 70% and 80% AMHI levels; 115 units will have Medicaid waiver

### **For-Sale Housing-Single Family Home, Condominiums, and Townhomes**

There are currently seven confirmed for-sale housing projects planned and/or under construction within the PSA (Evansville). These projects are summarized in the following table:

Subdivision/ Condominium	Type	Units	Developer	Status/ Details
Vectren Foundation	Affordable Single-Family Homes	100	Vectren	<b>Under Construction:</b> Announced in 2019, Vectren invested \$5.5 million for affordable single-family housing to be built over a five-year span
Promise Zone	Affordable Single-Family Homes	71	Truvest	<b>Under Construction:</b> In 2016, the City of Evansville received a 10-year Promise Zone designation; 30 affordable single-family homes have been completed
The Colours 31 Jefferson Avenue	Condos	10	Mominee Construction	<b>Status Unknown:</b> Three-bedroom; \$279,500; Three units were completed in 2020; Additional units may not be completed (company may be out of business)
Terra Vista Terra Vista Drive	Single-Family Homes	29	Thompson Homes	<b>Under Construction:</b> Low \$200,000s to \$400,000; 1,347 to 2,687 square feet
The Orchard North 617 Criterion Way	Single-Family Homes	33	Jagoe Homes	<b>Under Construction:</b> Low \$200,000s to high \$200,000s; 1,154 to 2,791 square feet
Summerlyn Trail North Burkhardt Road	Single-Family Homes and Townhomes	41	Thompson Homes	<b>Under Construction:</b> High \$180,000s; 1,347 to 2,686 square feet
Centerra Ridge 7865 Telephone Road	Single-Family Homes	37	Jagoe Homes	<b>Under Construction:</b> Section 9 of Phase II; More than 168 homes built; \$190,000 to \$400,000; 1,546 to 2,700 square feet

ECD – Estimated Completion Date

N/A – Not Available

As the preceding tables illustrate, there are numerous residential projects in the development pipeline. Overall, there are several hundred residential units under construction, planned/proposed or being renovated in Evansville, though it is likely many more are being considered for development. While there are multiple known for-sale housing projects planned or under construction, most of these only include lots. It is up to homebuyers to select and build upon the lots at these sites. Therefore, it is unknown how many and when additional homes will actually be built. The product in the development pipeline is considered in our demand estimates (Section VII) to determine remaining housing gaps that may exist.

## VII. HOUSING GAP/DEMAND ANALYSIS

### INTRODUCTION

Since the development of new housing in Evansville could include a variety of product types and target markets, our estimates for the number of units that can be supported consider a variety of rents/price points and corresponding income levels. For the purposes of this analysis, we have segmented demand into three levels of household income types: 1.) Very Low Income, 2.) Low Income, and 3.) Moderate/High Income. The actual household incomes for each segment differ slightly between the demand for rentals versus for-sale housing and are discussed in further detail within their corresponding sections.

#### 1. Rental Housing

Rental housing needs of both current and future households in Evansville will most likely take the shape of apartment, duplex, and single-family housing alternatives. There are a variety of financing mechanisms that can support the development of rental housing alternatives such as federal government programs and state programs, as well as conventional financing through private lending institutions. These different financing alternatives often have specific income and rent restrictions, which affect the market they target.

We have evaluated the Evansville market's ability to support rental housing based on three levels of income/affordability. While there may be overlap among these three levels due to program targeting and rent levels charged, we have established specific income stratifications that are exclusive of each other in order to eliminate double counting demand. The three levels of affordability are described below:

- **Very Low-Income Households** – There are a variety of federal housing programs that assist in meeting the needs of very low-income households. While the actual parameters for qualifying housing based on income levels are affected by the program type, household size limits, and other programmatic restrictions, most projects using federal housing program financing or assistance in Evansville are occupied by households with annual incomes under \$36,000. This income level generally represents 50% of Area Median Household Income (AMHI) levels (depending upon household sizes). For the purposes of this analysis, we have limited our demand estimates for housing that serves very low-income households to households with incomes up to \$36,000.

- **Low-Income Households** – Development of housing for low-income households is often financed through state issued (but federally mandated) Tax Credits under the Section 42 program. Such housing is restricted to households with incomes of up to 80% of AMHI, though most such rentals are restricted to households earning up to 60% of AMHI. While the minimum income requirement is usually based on the lowest gross rent that a Tax Credit project would charge, for the purposes of this analysis, we have limited the minimum income requirement to the maximum income limit (\$36,001) used for the very low-income households demand estimates. The maximum income limit used for this housing segment is \$58,000.
- **Moderate/High-Income Households** – Projects that are not limited by federal and state government programs are considered market-rate housing. Market-rate units can fall within the entire spectrum of affordability, as it is up to ownership and management of a market-rate project to determine the rents to charge and the corresponding income qualifications of prospective residents. For the purposes of this analysis, we assume households with incomes above 80% of AMHI will respond to market-rate housing. The income level used for this housing segment is \$58,001 and higher.

The following table summarizes the three income segments used in this analysis to estimate potential demand. It should be noted these income bands are different than the income bands used for previous Housing Needs Assessments of Evansville completed by our firm.

Household Type (% AMHI)	Income Range
Very Low Income (<50% AMHI)	<\$36,000
Low Income (51% to 80% AMHI)	\$36,001 to \$58,000
Moderate/High Income (81%+ AMHI)	\$58,001+

While different state and federal housing programs establish income and rent restrictions for their respective programs, in reality, there is potential overlap between windows of affordability between the programs. Further, those who respond to a certain product or program type vary and many households could respond to multiple project types. This is because housing markets are highly dynamic, with households entering and exiting by tenure and economic profile. Further, qualifying policies of property owners and management impact the households that may respond to specific project types. As such, while a household may prefer a certain product, ownership/management qualifying procedures (i.e., review of credit history, current income verification, criminal background checks, etc.) may affect housing choices that are available.

Regardless, we have used the preceding income segmentations as the ranges that a typical project would use to qualify residents, based on their household income. Ultimately, any new product added to the market will be influenced by many decisions made by the developer and management. This includes eligibility requirements, design type, location, rents, amenities, and other features. As such, our estimates assume that the rents, quality, location, design, and features are marketable and will appeal to most renters.

For the purposes of this Housing Needs Assessment, we used primary sources of demand for new rental housing. These sources include the following:

- New Renter Household Growth
- Additional Units Required for a Balanced Market
- Replacement Housing for Demolished and Substandard Housing
- External Market Support Generated by Commuters

#### **New Renter Household Growth**

The first source of demand is generally easily quantifiable and includes the net change in renter households between the baseline year of 2020 and the projection year of 2025.

#### **Units Required for a Balanced Market**

The second demand component considers the number of units a market requires to offer balanced market conditions. Healthy markets require approximately 4% to 6% of the rental market to be available in order to allow for inner-market mobility and encourage competitive rental rates. Markets with vacancy rates below a healthy rate often suffer from rapid rent increases, minimal tenant turnover (which may result in deferred maintenance), and residents being forced into housing situations that do not meet their housing needs. The vacancy rates by program type and/or affordability level are based on our survey of area rental alternatives. To determine a balanced market, we have applied a 5% vacancy rate to the existing rental housing supply.

#### **Replacement Housing**

Demand for new units as replacement housing takes into consideration that while some properties are adequately maintained and periodically updated, a portion of the existing stock reaches a point of functional obsolescence over time and needs to be replaced. This comes in the form of either units that are substandard (lacking complete plumbing and/or are overcrowded) or units expected to be removed from the housing stock through demolitions. According to U.S. Census data, approximately 4.0% of renter households in Evansville are considered to be living in substandard housing, depending

upon income levels (low-income households typically have a disproportionately high share of residents living in substandard housing). For the purposes of this analysis, we have used a substandard housing ratio of up to 4.0% depending upon affordability. Further, while some households may physically be accommodated in existing housing structures, many households live in housing that is priced in such a way that creates a financial burden upon households. While financially burdened, these households are currently accommodated in existing housing and were not considered in this analysis.

### **External Market Support**

Market support can originate from households not currently living in the market. This is particularly true for people working in Evansville but who currently live outside of the city and would consider moving to Evansville, if adequate and affordable housing that met residents' specific needs was offered. Currently, there are relatively few *available* housing options in the city. As such, external market support will likely be created if new housing product is developed in Evansville.

Based on our experience in evaluating rental housing in markets throughout the country, it is not uncommon for new product in a market with limited available product such as Evansville to attract as much as 10% of its support from outside the city limits. As a result, we have conservatively assumed that up to 10% of commuters would seek new rental housing if it were affordable and available.

**Note:** We only included residential rental units currently in the development pipeline that are confirmed as planned or under construction. Conversely, we have excluded projects that have not secured financing, are under preliminary review or have not established a specific project concept (e.g., number of units, rents, target market, etc.). Any vacant housing units among the existing supply are accounted for in the "Units Required for a Balanced Market" portion of our demand estimates.

The following table includes demand calculations for rental units targeting the income segments considered in this analysis.

## Rental Demand Housing Gap Estimates

2020 - 2025 Rental Demand Potential by Income Level & Rent Affordability Evansville, IN Primary Study Area			
Household Income Range	< \$36,000	\$36,001-\$58,000	\$58,001+
Rent Affordability	< \$900	\$901-\$1,450	\$1,410+
New Income-Qualified Renter Households	-1,340	267	1,404
Units Needed for Balanced Market*	660	187	-77
Replacement Housing Needed**	630	99	48
Total External/Commuter Market Support^	817	281	271
Gross Demand of Units Needed	767	834	1,646
Less Units in the Development Pipeline (Planned Projects)	-177	-183	-81
<b>Total Potential PSA (Evansville) Support for New Units</b>	<b>590</b>	<b>651</b>	<b>1,565</b>

\*Based on Bowen National Research's survey of area rentals

\*\*Based on ESRI/ACS estimates of units lacking complete indoor plumbing and/or are overcrowded

^Based on Bowen National Research proprietary research and commuting patterns for Evansville

Based on the preceding demand estimates, it is clear that there is some level of demand among all household income levels within Evansville over the five-year projection period. There is an overall housing need for approximately 2,806 additional rental units in the city over the next five years. There is a notable need for housing among all affordability levels. As such, future rental housing development should include a variety of rent and income-eligibility levels.

Based on the demographics of the market, including projected household growth estimates, it appears that approximately one-third of the demand for new rental housing could be specifically targeted to meet the needs of area seniors, though a project could be built to meet the housing needs of both seniors and families concurrently. A unit mix of around 25% to 35% one-bedroom units, 50% to 60% two-bedroom units, and 10% to 20% three-bedroom units should be the general goal for future rental housing, though senior-oriented projects should consider unit mixes closer to 50% for both one- and two-bedroom units each.

It is critical to understand that these estimates represent potential units of demand by targeted rents and income levels. In order to achieve support for all of the preceding projected estimates, a large portion of the housing units that are classified as "substandard" would need to be replaced and a large variety of product types (e.g., bedroom types, price ranges, features and amenities, designs, etc.) would have to be built to meet a broad range of housing needs. The actual number of rental units that can be supported will ultimately be contingent upon a variety of factors including the location of a project, proposed features, product quality, designs, management, and marketing efforts. As such, the potential number of units of support should be considered a general guideline to residential development planning for the overall PSA.

## 2. For-Sale Housing Demand Estimates

This section of the report addresses the market demand for for-sale housing alternatives in Evansville. Like the rental housing demand estimates, we have segmented potential demand by three different income levels. This includes very low-income households (making less than \$36,000 annually), low-income households (making between \$36,001 and \$58,000), and moderate/high-income households (making \$58,001 or higher).

There are a variety of factors that impact the demand for new homes within an area. In particular, area and neighborhood perceptions, quality of school districts, socioeconomic characteristics, mobility patterns, city demolition and revitalization efforts, and the number active builders all play a role in generating new home sales. Support can be both internal (households moving within the market) and external (households new to the market).

While new household growth alone is often the primary contributor to demand for new for-sale housing, the age and condition of the existing housing stock can be indicators that demand for new housing will also be generated from the need to replace some of the older housing stock. Overall, we have considered the following specific sources of demand for new for-sale housing in the PSA (Evansville).

- New Owner Household Growth
- Units Required for a Balanced Market
- Replacement of Functionally Obsolete/Substandard Housing
- External Market Support Generated by Commuters
- Step-Down Support (People who buy homes below their purchasing capacity)

For the purposes of this analysis, we conservatively assume that a homebuyer will be required to make a minimum down payment of at least 5.0% of the purchase price for the purchase of a new home. Further, we assume that most buyers will be qualified on a mortgage to income ratio of around 30%. Using this methodology, the following represents the potential purchase price by income level:

Household Income Level	Maximum Purchase Price
Up to \$36,000	Up to \$113,999
\$36,001-\$58,000	\$114,000-\$183,999
\$58,001 and Higher	\$184,000 and Higher

Naturally, there are cases where a household can afford a higher down payment to purchase a more expensive home. There are also cases in which a household purchases a less expensive home although they could afford a higher purchase price. The actual support for new housing will ultimately be based on a variety of factors such as price points, square footages, amenities, design, quality of finishes, and location. Considering these variations, this broad analysis provides the basis in which to estimate the potential sales of new for-sale housing within Evansville.

### **New Household Growth**

We evaluated the number of new owner-occupied households that are expected to be added to the market between 2020 and 2025. It should be noted that changes in the number of households within a specific income segment does not necessarily mean that households are coming to or leaving the market, but instead, many of these households are likely to experience income growth or loss that would move them into a higher or lower income segment.

### **Units Required for a Balanced Market**

Healthy, well-balanced for-sale housing markets typically require a sufficient supply of available product at a variety of price points in order to allow for internal market mobility (allowing people to upgrade or downsize their housing based on their household needs), to keep household pricing stable (lack of supply drives pricing up exceedingly high, while excessive supply could decrease housing prices), and to allow sufficient choices to attract new households to the Evansville market. Typically, in most for-sale housing markets, vacancy rates of around 2.0% to 3.0% are generally considered ideal, though higher vacancy rates could be supportable in high growth markets. In Evansville, we believe the for-sale housing market could experience healthy market conditions at a 3.0% availability/ vacancy rate. Therefore, we have applied this 3.0% availability/vacancy rate to the existing housing supply to estimate the number of vacant units that would be required at each pricing segment to achieve a “balanced” market.

### **Replacement Housing**

Given the limited development of new housing units in Evansville over the past several years, most homebuyers have primarily been limited to choosing from the established housing stock, much of which is more than 40 years old. Based on our on-site analysis of the existing housing stock, it appears the quality of housing varies greatly throughout the city. This variety in quality likely contributes to the variety of home pricing in the market.

Nationally, approximately 0.3% of all housing stock is considered functionally obsolete or uninhabitable on an annual basis. Certainly, factors such as the quality and type of housing originally constructed, local perceptions and expectations, seasonal climate influences, scope of city building and property maintenance codes, and political and other socioeconomic factors influence the need and rate for replacement housing.

Substandard housing is considered housing that suffers from overcrowded households, lacks completed kitchens or plumbing facilities. Based on demographic data, up to 1.5% of owner-occupied housing units are considered substandard. Since it is likely that lower priced product has a higher propensity for having substandard conditions, for the purposes of this analysis we have applied a substandard ratio of up to 1.5%.

### **External Market Support**

Market support can originate from households not currently living in the market. As shown in Section V of this report, more than 60,000 people commute into Evansville for work on a daily basis, of which an estimated 33,475 are homeowners. While these people do not live in Evansville, they represent potential future residents that may move to the city if adequate, desirable, and marketable housing was developed in the city. For the purposes of this analysis, we have assumed that between 2.5% and 10% of the demand could originate from outside of Evansville.

**Note:** We only included residential for-sale housing currently in the development pipeline that is planned or under construction and does not have a confirmed buyer, such as a condominium unit or a spec home, in our demand estimates. Conversely, we have excluded single-family home lots that may have been platted or are being developed, as such lots do not represent actual housing *units* that are available for purchase. Any housing units currently available for purchase are accounted for in the “Units Required for a Balanced Market” portion of our demand estimates.

### **Step-Down Support**

It is not unusual, particularly in the homebuyer market, that a household spends less on a house than what their income actually enables them to afford. This is more frequent among higher income households, who will often purchase a home well below their purchasing capacity. For the purposes of this report, we have assumed that 50% of the demand within each affordability segment will “step down” to the next lowest income segment.

The following table includes demand calculations for for-sale housing units targeting the income segments considered in this analysis.

### For-Sale Demand Housing Gap Estimates

2020-2025 For-Sale Housing Demand by Income Level & Price Point Evansville, IN Primary Study Area			
Household Income Range	< \$36,000	\$36,001-\$58,000	\$58,001+
Housing Price Affordability	< \$113,999	\$114,000-\$183,999	\$184,000+
New Owner-Occupied Household Growth	-1,200	-455	1,645
Units Required for a Balanced Market*	154	145	192
Total Replacement Housing**	125	59	0
Total External/Commuter Market Support^	991	353	412
Total Step-Down Support	51	1,074	-1,125
Gross Demand of Units Needed	121	1,176	1,124
Less Units in the Development Pipeline (Planned Projects)	0	-141	-51
<b>Total Potential PSA (Evansville) Support for New Units</b>	<b>121</b>	<b>1,035</b>	<b>1,073</b>

\*Based on Bowen National Research's survey of available for-sale housing supply

\*\*Based on share of units lacking complete indoor plumbing and/or are overcrowded

^Based on Bowen National Research proprietary research and commuting patterns for Evansville

As the preceding table illustrates, there is a potential need for for-sale housing of up to 2,229 units over the five-year projection period. Most of this housing need is split between moderate income households earning between \$36,001 and \$58,000 and those earning more than \$58,000.

While there is a projected need of for-sale housing priced under \$114,000, it will be difficult for most developers to build such product. However, the development of higher priced product (\$114,000+) would enable some existing homeowners currently in lower priced homes to leave such product, thereby freeing up lower priced housing for those households than can afford it.

Based on the demographic characteristics and trends known in Section IV of this report, most of the projected owner household growth is expected to occur among one- and two-person households and among senior households generally ages 65 and older. As a result, it is expected that a notable share of new product will need to consist of one- and two-bedroom units. This will enable individuals, couples, small families, and seniors (including those wishing to downsize) to move into units that will meet their needs.

It is critical to understand that these estimates represent potential units of demand by targeted sales price and income levels. In order to achieve support for all of the preceding projected estimates, a large variety of product types (e.g., bedroom types, price ranges, features and amenities, designs, etc.) within a variety of geographic areas would have to be built to meet a broad range of housing needs. The actual number of for-sale units that can be supported is likely less than estimated above and will ultimately be contingent upon a variety of factors including the location of a project,

proposed features, product quality, designs, management, and marketing efforts. As such, the potential number of units of support should be considered a general guideline to residential development planning for the overall PSA.

Overall, there is potential support for a variety of residential development alternatives in Evansville. It is important to understand that the housing demand estimates shown in this report assume no major changes occur in the local economy and that the demographic trends and projections provided in this report materialize. As such, our demand estimates should be considered conservative and serve as a baseline for development potential. With a substantial amount of planned investments and infrastructure projects, Evansville could experience significant job and demographic growth that could far exceed those projected in this report. As such, housing demand estimates could be significantly greater than our current estimates.

## VIII. SUBAREA/NEIGHBORHOOD ANALYSIS

### A. INTRODUCTION

While a primary objective of this report is to evaluate the overall housing factors and needs of Evansville and its five submarkets, we have also provided supplemental analysis on smaller selected neighborhoods located within the Central Submarket. Specifically, this section of the report addresses the various demographics and housing characteristics and trends of Downtown, the Arts District and the Jacobsville Redevelopment District. For the purposes of this analysis, we have referred to these areas as the Downtown Study Area, Arts District Study Area, and Jacobsville Study Area.

The map below delineates the boundaries of the three subareas (neighborhoods or districts), all of which fall within the Central Submarket. The individual maps of the smaller neighborhoods are included in the corresponding neighborhood analyses included in this section of the report.

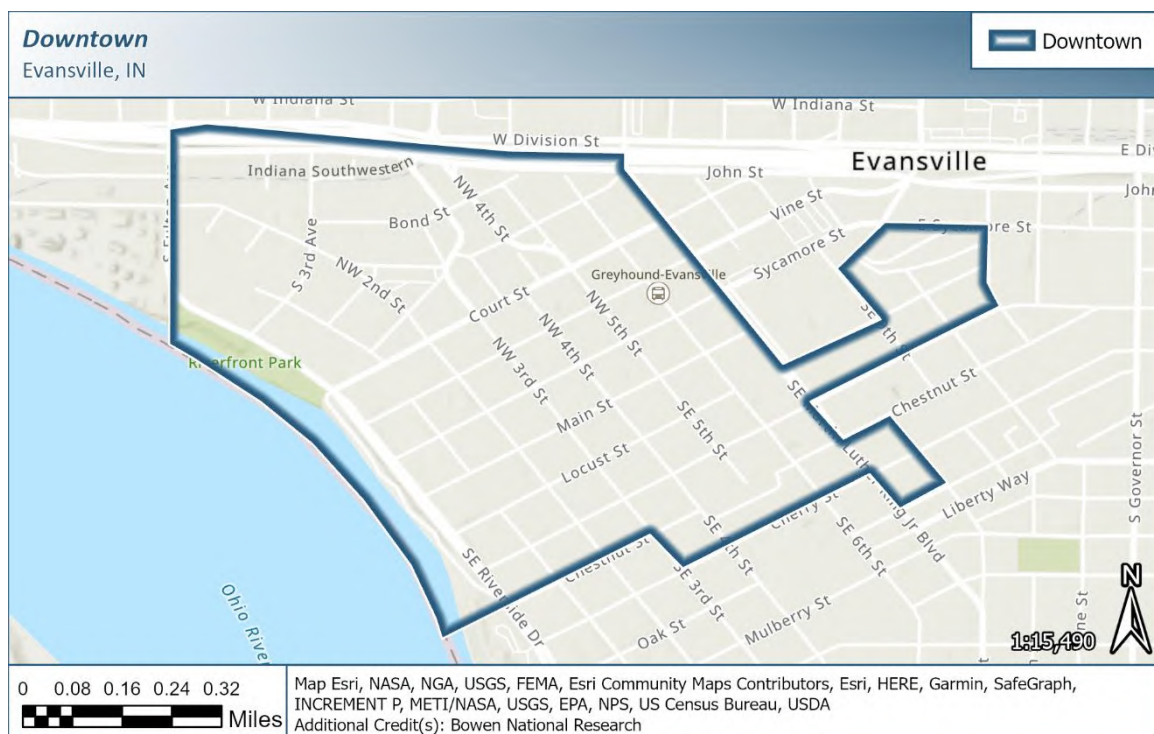

## B. DOWNTOWN STUDY AREA

The Downtown Redevelopment Area, hereinafter referred to as the Downtown Study Area, is located in the Central Submarket or central portion of Evansville, along the east side of the Ohio River. The area generally encompasses the Evansville Central Business District and includes a variety of government facilities, offices, retail establishments, and multifamily residential housing.

The Downtown Study Area is generally bounded by the Lloyd Expressway (State Road 62) to the north, Martin Luther King Boulevard to the east, Oak Street, Cherry Street, and Chestnut Street to the south, and the Ohio River and South Fulton Avenue to the west. A small portion of the Downtown Study Area also includes an area north of the Lloyd Expressway, north of the Willard Library and in the southeast quadrant of the Franklin Street and First Avenue intersection. Overall, the Downtown Study Area encompasses a total of 0.49 square miles.

A Map of the Downtown Study Area is below:

## Demographics

Population and households by numbers and percent change (growth or decline) for selected years within the Downtown Study Area (DSA) and Evansville are shown in the following table:

	Total Population		Total Households	
	DSA	Evansville	DSA	Evansville
2000 Census	1,337	122,887	455	52,906
2010 Census	992	120,081	423	51,906
Change 2000-2010	-345	-2,806	-32	-1,000
Percent Change 2000-2010	-25.8%	-2.3%	-7.0%	-1.9%
2020 Estimated	1,057	120,258	479	52,255
Change 2010-2020	65	177	56	349
Percent Change 2010-2020	6.6%	0.1%	13.2%	0.7%
2025 Projected	1,254	120,932	609	52,631
Change 2020-2025	197	674	130	376
Percent Change 2020-2025	18.6%	0.6%	27.1%	0.7%

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Between 2000 and 2010, the Downtown Study Area (DSA) population base declined. Between 2010 and 2020, the DSA population increased by 65 (6.6%), while households increased by 56 (13.2%). Between 2020 and 2025, the DSA is projected to increase by 197 (18.6%) people or 130 (27.1%) households. These positive projected demographic *rate* changes will significantly outpace the overall PSA (Evansville), which is projected to increase by less than 1.0% during the same period. As such, it appears the investment and redevelopment/development efforts in the DSA over the past decade had a positive impact on the downtown market.

The distribution of households by age for the Downtown Study Area is compared with overall Evansville in the table below.

		Household Heads by Age						
		<25	25 to 34	35 to 44	45 to 54	55 to 64	65 to 74	75+
DSA	2010	29 (6.9%)	82 (19.4%)	60 (14.2%)	70 (16.5%)	103 (24.3%)	39 (9.2%)	40 (9.5%)
	2020	21 (4.4%)	82 (17.1%)	85 (17.7%)	70 (14.6%)	103 (21.5%)	69 (14.4%)	49 (10.2%)
	2025	33 (5.4%)	102 (16.7%)	119 (19.5%)	88 (14.4%)	119 (19.5%)	79 (13.0%)	69 (11.3%)
	Change 2020-2025	12 (57.1%)	20 (24.4%)	34 (40.0%)	18 (25.7%)	16 (15.5%)	10 (14.5%)	20 (40.8%)
Evansville	2010	3,939 (7.6%)	9,068 (17.5%)	7,814 (15.1%)	10,011 (19.3%)	8,883 (17.1%)	5,606 (10.8%)	6,585 (12.7%)
	2020	3,218 (6.2%)	9,114 (17.4%)	8,434 (16.1%)	7,803 (14.9%)	9,464 (18.1%)	7,632 (14.6%)	6,590 (12.6%)
	2025	3,286 (6.2%)	8,241 (15.7%)	9,070 (17.2%)	7,796 (14.8%)	8,528 (16.2%)	8,463 (16.1%)	7,247 (13.8%)
	Change 2020-2025	68 (2.1%)	-873 (-9.6%)	636 (7.5%)	-7 (-0.1%)	-936 (-9.9%)	831 (10.9%)	657 (10.0%)

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

It is projected that by 2025, the largest share (19.5%) of households by age in the DSA will be among the 35-to-44 as well as the 55-to-64 age cohorts, while the number of households between the ages of 35 and 44 will increase the most, adding 34 households during this time. This 40.0% growth rate in the number of households ages 35 to 44 in the DSA is greater than the overall PSA's rate of 7.5%. Notable growth is also expected to occur in the DSA among households ages 65 and older, which will increase by 30 (25.4%) over the next five years, greater than the overall PSA's rate of 10.5%.

Households by income for selected years are shown in the following table:

		Households by Income							
		<\$10,000	\$10,000 - \$19,999	\$20,000 - \$29,999	\$30,000 - \$39,999	\$40,000 - \$49,999	\$50,000 - \$59,999	\$60,000 - \$99,999	\$100,000+
DSA	2010	130 (30.7%)	113 (26.7%)	47 (11.1%)	34 (8.0%)	22 (5.2%)	13 (3.1%)	39 (9.2%)	25 (5.9%)
	2020	69 (14.4%)	99 (20.7%)	69 (14.4%)	45 (9.4%)	25 (5.2%)	23 (4.8%)	38 (7.9%)	110 (23.0%)
	2025	85 (14.0%)	116 (19.1%)	81 (13.3%)	52 (8.6%)	34 (5.6%)	33 (5.4%)	54 (8.9%)	153 (25.2%)
	Change 2020-2025	16 (23.2%)	17 (17.2%)	12 (17.4%)	7 (15.6%)	9 (36.0%)	10 (43.5%)	16 (42.1%)	43 (39.1%)
Evansville	2010	6,513 (12.5%)	9,758 (18.8%)	7,528 (14.5%)	6,676 (12.9%)	5,408 (10.4%)	4,280 (8.2%)	7,894 (15.2%)	3,849 (7.4%)
	2020	4,651 (8.9%)	7,540 (14.4%)	6,901 (13.2%)	6,098 (11.7%)	4,711 (9.0%)	4,627 (8.9%)	11,221 (21.5%)	6,509 (12.5%)
	2025	3,951 (7.5%)	6,694 (12.7%)	6,271 (11.9%)	5,576 (10.6%)	4,348 (8.3%)	5,107 (9.7%)	12,846 (24.4%)	7,838 (14.9%)
	Change 2020-2025	-700 (-15.1%)	-846 (-11.2%)	-630 (-9.1%)	-522 (-8.6%)	-363 (-7.7%)	480 (10.4%)	1,625 (14.5%)	1,329 (20.4%)

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

In 2025, projections indicate that 46.4% of DSA (Downtown) households will have annual incomes below \$30,000, while 25.2% will have incomes over \$100,000. In the overall PSA (Evansville), 32.1% of households will have incomes below \$30,000 and 14.9% will have incomes of \$100,000 or more. The DSA appears to be lacking a notable presence of middle-income households (earning between \$30,000 and \$99,999).

Between 2020 and 2025, households with incomes of \$100,000 or more are projected to increase the most in absolute terms, adding 43 households to the market during this period. However, all household income segments in the DSA are projected to increase by 2025, including a projected increase of 45 (19.0%) among households earning less than \$30,000 and 69 (40.4%) earning \$50,000 or more. As such, not only does the downtown market have a high share of low-income households but this segment is also projected to experience growth, while the overall PSA is only projected to increase in households earning \$50,000 or more.

Other notable demographic findings regarding the Downtown Study Area (DSA) based on 2015-2019 American Community Survey (ACS) data include:

- Approximately 237 people, or 27.5%, of the total population within the DSA live in poverty. This is higher than the 21.6% poverty share for the overall PSA.
- Approximately 221 people, or 25.6%, of the total population within the DSA have a disability, well above the 17.0% share for the overall PSA. Among the disabled persons in the DSA, 74 (33.5%) are over the age of 65, reflecting a 42.0% disability rate for this age group.
- Approximately 262 people, or 61.9%, of households in the DSA are single, well above the 36.8% share for the overall PSA.
- Approximately 3.0% of renter households live in substandard housing, which is considered housing lacking complete indoor plumbing facilities and/or is overcrowded. This is slightly higher than the 2.0% share for the overall PSA.
- The share of homes for renters built prior to 1970 is 76.4% in the DSA, well above the 46.7% share in the overall PSA. The share of homes for owners built prior to 1970 is 71.7% in the DSA, which is comparable to the 72.1% share in the PSA.
- The share of non-conventional rental homes within structures of four or less units in the DSA is 23.3%, well below the 52.8% in the PSA.
- An approximate share of 42.6% of the renter households are considered “rent burdened” within the DSA, representing the households that pay more than 30% of their annual income toward rent. This share is slightly lower than the overall PSA share of 48.5%.

## **Economic and Redevelopment Activity**

The Downtown Study Area (DSA) has and will continue to undergo significant investment and economic activity. Notable activity includes the development of the \$100 million University of Southern Indiana's Stone Family Center (opened in 2018), the opening of the CoWorkEvansville Space (2018), and the recent opening of the Robert L. Koch Center for the Arts and Sciences building (2020). The Post House, a \$40 million mixed-use development, opened for occupancy in spring 2020. A new YMCA opened in 2019, while a 62-unit affordable housing project (Central Lofts) is slated to occupy the old YMCA building in late 2021. Hyatt Place Evansville, a newly developed 139-room hotel, is accepting reservations starting in May 2021. In addition, the City of Evansville acquired land near Fourth and Main streets in 2018, which is designated to become a park. These developments are expected to encourage ancillary development and contribute to the continued revitalization of downtown. With nearly \$200 million in investments, the downtown area is poised for significant economic growth for the foreseeable future, which will increase the need for additional downtown housing for a variety of household types.

## **Housing Supply**

### *1. Rental Housing*

We identified and telephone surveyed four multifamily rental housing projects containing a total of 321 units within the Downtown Study Area (DSA). This survey was conducted to establish the overall strength of the rental market in the downtown area. These rentals have a combined occupancy rate of 85.7%. All four projects surveyed are non-subsidized (market-rate and Tax Credit) projects. Note that this survey does not include Central Lofts, a 62-unit affordable housing property expected to open in late 2021. The distribution of surveyed rental housing supply by product type is illustrated in the following table:

Project Type	Projects Surveyed	Total Units	Vacant Units	Occupancy Rate
Market-rate	4	321	46	85.7%
Total	4	321	46	85.7%

As the preceding table illustrates, these rentals have a combined occupancy rate of 85.7%, a slightly low rate for multifamily housing. Note that one of the four projects surveyed (Post House) opened for occupancy in June 2020 and is still in lease-up. Post House has 29 of the 46 vacant units among the four properties surveyed in the DSA. Excluding the 29 vacant units at Post House, the remaining three properties are established and have a combined occupancy of 89.3%. This may indicate some level of "softness" in the DSA's market-rate rental inventory.

In addition to the four properties surveyed in the Downtown Study Area (DSA), we identified four additional *existing* properties within the DSA that we were unable to survey at the time of this report. The known details of these projects are based on previous surveys conducted by Bowen National Research in Evansville and from our review of additional sources and are summarized in the following table:

Name	Location	Year Built/ Renovated	Total Units	Property Type
A/R Lofts (aka Biscuit Company)	401 NW 2 <sup>nd</sup> Street	1894/2020	20	Market-rate
Buckner Towers	717 Cherry Street	1968/2016	108	Subsidized Tax Credit
Central Place Apts.	18 SE First Street	1917/2017	18	Market-rate
Kennedy Towers	315 SE Martin Luther King Jr. Blvd.	1965/2016	100	Subsidized Tax Credit

The following table summarizes the breakdown of market-rate units surveyed within the DSA.

Downtown Study Area (DSA)						
Market-rate						
Bedroom	Baths	Units	Distribution	Vacancy	% Vacant	Median Collected Rent
Studio	1.0	4	1.2%	0	0.0%	\$999
One-Bedroom	1.0	174	54.2%	26	14.9%	\$1,079
One-Bedroom	1.5	18	5.6%	0	0.0%	\$1,200
Two-Bedroom	1.0	44	13.7%	5	11.4%	\$900
Two-Bedroom	2.0	80	24.9%	15	18.8%	\$1,666
Three-Bedroom	2.0	1	0.3%	0	0.0%	\$3,200
<b>Total Market-rate</b>		<b>321</b>	<b>100.0%</b>	<b>46</b>	<b>14.3%</b>	-

Vacant units among properties surveyed in the DSA are primarily among one-bedroom/1.0-bath units (14.9% vacant) and two-bedroom/2.0-bath units (18.8% vacant). These vacancies primarily represent the recently completed Post House property that is currently in lease-up. Median rents by bedroom type range from \$900 to \$3,200 for the market-rate multifamily units. It is important to note that the \$3,200 rent represents a three-bedroom penthouse unit. The next highest rental unit surveyed in the DSA is a two-bedroom/2.0-bath unit that rents for \$1,666 per month. Note that most units surveyed in the DSA are one-bedroom units. Due to the lack of three-bedroom apartment units, there appear to be no multifamily rental options for most family households, particularly larger families, seeking housing within the DSA. As a result, family households seeking three-bedroom rental alternatives in the DSA likely must choose from non-conventional rentals, which typically have higher rents, fewer amenities, and are of lower quality than multifamily options.

## 2. For-Sale Housing

Bowen National Research, through a review of the Multiple Listing Service information for the Downtown Study Area (DSA), identified both historical (sold since 2010) for-sale residential data and currently available for-sale housing stock.

Within the DSA, there were 117 homes sold over the past decade and only five homes currently available for purchase. The five available homes in the DSA are all condominium units and represent a small fraction of all homes in the entire PSA (Evansville). The following tables summarize the available and sold since 2010 housing stock for the DSA and the PSA.

For-Sale/Sold Housing Supply		
Type	DSA (Downtown Study Area)	PSA (Evansville)
Available	5	168
Sold	117	17,711
<b>Total</b>	<b>122</b>	<b>17,879</b>

Source: Multiple Listing Service and Bowen National Research

Available For-Sale Housing							
	Total Units	% Share of PSA	Low List Price	High List Price	Average List Price	Median List Price	Average Days On Market
<b>DSA - Downtown Study Area</b>	5	3.0%	\$215,000	\$424,900	\$315,560	\$299,900	186
<b>PSA - Evansville</b>	168	100.0%	\$16,900	\$995,000	\$154,443	\$105,000	134

Source: Multiple Listing Service and Bowen National Research

Within the DSA (Downtown), the available homes have a median list price of \$299,900, which is nearly three times the overall PSA (Evansville) median list price of \$105,000. All five available listings are condominium units, ranging from \$215,000 to \$424,900. Given that none of the available for-sale housing supply is priced under \$215,000, it is difficult for lower income households to purchase a home in the DSA. The average days on market for available product in the DSA is 186 days, which is a longer duration than the overall PSA average of 134. Note that three of the five units listed for sale in the DSA have been on the market for over 180 days. The higher average days on market in the DSA may be reflective of much higher listing prices for homes relative to other areas of Evansville.

A total of 12 homes were sold from January 2020 to December 2020 within the Downtown Study Area (DSA). The average price of these sold homes was \$213,333, while the median price was \$184,500. Note that 11 of the 12 homes sold in 2020 were condominium units, and the average days on market for all 12 sold units was 70 days.

## **Conclusions**

The Downtown Study Area (DSA) increased in population and households from 2010 to 2020. Projections indicate that DSA population and households will increase at a significantly higher rate from 2020 to 2025. These positive projected demographic *rate* changes will significantly outpace the overall PSA (Evansville). It is projected that by 2025, the largest share (19.5%) of households by age in the DSA will be among the 35- to 44-year old as well as the 55- to 64-year old age cohorts, while the number of households between the ages of 35 and 44 will increase the most. In 2025, projections indicate that 46.4% of DSA (Downtown) households will have annual incomes below \$30,000, while 25.2% will have incomes over \$100,000. Relative to the Evansville PSA, the Downtown Study Area (DSA) appears to be lacking a notable presence of middle-income households. Note that 27.5% of the DSA population lives in poverty, and 42.6% of all renter households in the DSA are considered “rent burdened” (paying more than 30% of their income of their income toward rent). With nearly \$200 million in new development activity planned for the downtown area, it is expected that the need for affordable workforce housing and housing for young professionals and medical school students will increase.

According to Bowen National Research’s survey of rental housing alternatives and a review of the for-sale housing inventory, the DSA has few available housing units for lower income households and there appears to be pent-up demand for additional housing. It should be noted that 62 new affordable housing units (named Center Lofts) are currently under development in the 1913 YMCA building with an expected completion date in late 2021. Although there are market-rate units available for lease primarily due to the recently completed Post House property, past surveys of affordable housing projects in the DSA indicated extensive waiting lists for the next available units. Multifamily rental product identified and surveyed has median rents by bedroom type that range from \$900 to \$1,666 for most market-rate units. As such, the market-rate supply is generally not affordable to households with incomes under \$30,000, which comprises the largest share of households in the DSA. With a median list price that exceeds \$200,000 for for-sale units, most available for-sale housing is not considered affordable to households within the DSA that generally make \$50,000 or less. While existing market-rate apartment units and for-sale condominium units exist for the portion of DSA households that earn over \$100,000, there appears to be a lack of housing choices for the much larger portion of DSA households that earn less than \$30,000. Note that the expected opening of the 62-unit Central Lofts property in 2021 will satisfy a portion of unmet housing demand among lower income households in the DSA. In conclusion, it appears the downtown area needs additional rental and for-sale product, with emphasis on product affordable to lower income households.

### **C. ARTS DISTRICT STUDY AREA**

The Arts District Redevelopment Area, hereinafter referred to as the Arts District Study Area (ADSA), is located in the Central Submarket or central portion of Evansville. The ASDA is along the east side of the Ohio River and south of the downtown area of Evansville. The area generally encompasses museums, parks, medical facilities, the Riverside Historic District, retail and office space, as well as multifamily and single-family residential uses.

Generally, the Arts District Study Area is bounded by Chestnut Street and Cherry Street to the north, Martin Luther King Boulevard, Eighth Street, Garvin Street and Culver Drive to the east, the area between Culver Drive and Veterans Memorial Parkway (Interstate 164) that extends beyond Cass Avenue to the south, and Veterans Memorial Parkway and the Ohio River to the west. This area encompasses approximately 0.58 square miles.

A map of the Arts District Study Area is below:

## Demographics

The population and household trends of the Arts District Study Area (ADSA) are illustrated in the table below:

	Total Population		Total Households	
	ADSA	Evansville	ADSA	Evansville
2000 Census	3,514	122,887	1,738	52,906
2010 Census	2,996	120,081	1,459	51,906
Change 2000-2010	-518	-2,806	-279	-1,000
Percent Change 2000-2010	-14.7%	-2.3%	-16.1%	-1.9%
2020 Estimated	2,913	120,258	1,441	52,255
Change 2010-2020	-83	177	-18	349
Percent Change 2010-2020	-2.8%	0.1%	-1.2%	0.7%
2025 Projected	2,902	120,932	1,440	52,631
Change 2020-2025	-11	674	-1	376
Percent Change 2020-2025	-0.4%	0.6%	-0.1%	0.7%

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

The overall population in the ADSA declined by 518, while the number of households declined by 279 between 2000 and 2010, representing declines of 14.7% and 16.1%, respectively. The population and households decreased from 2010 to 2020 by 2.8% and 1.2%, respectively. These trends are projected to continue through 2025, although at a diminishing rate. While the ADSA lost 18 households in the previous decade, the number of ADSA households is projected to remain virtually unchanged in the next five years. The slowing decrease in overall population and households in the ADSA reflects a stabilizing neighborhood.

The distribution of households by age for the Arts District Study Area (ADSA) is compared with Evansville in the table below.

		Household Heads by Age						
		<25	25 to 34	35 to 44	45 to 54	55 to 64	65 to 74	75+
ADSA	2010	119 (8.2%)	267 (18.3%)	208 (14.3%)	278 (19.1%)	299 (20.5%)	150 (10.3%)	138 (9.5%)
	2020	112 (7.8%)	258 (17.9%)	239 (16.6%)	207 (14.4%)	236 (16.4%)	258 (17.9%)	131 (9.1%)
	2025	113 (7.8%)	232 (16.1%)	259 (18.0%)	204 (14.2%)	221 (15.3%)	246 (17.1%)	165 (11.5%)
	Change 2020-2025	1 (0.9%)	-26 (-10.1%)	20 (8.4%)	-3 (-1.4%)	-15 (-6.4%)	-12 (-4.7%)	34 (26.0%)
Evansville	2010	3,939 (7.6%)	9,068 (17.5%)	7,814 (15.1%)	10,011 (19.3%)	8,883 (17.1%)	5,606 (10.8%)	6,585 (12.7%)
	2020	3,218 (6.2%)	9,114 (17.4%)	8,434 (16.1%)	7,803 (14.9%)	9,464 (18.1%)	7,632 (14.6%)	6,590 (12.6%)
	2025	3,286 (6.2%)	8,241 (15.7%)	9,070 (17.2%)	7,796 (14.8%)	8,528 (16.2%)	8,463 (16.1%)	7,247 (13.8%)
	Change 2020-2025	68 (2.1%)	-873 (-9.6%)	636 (7.5%)	-7 (-0.1%)	-936 (-9.9%)	831 (10.9%)	657 (10.0%)

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

It is projected that by 2025, the largest share (18.0%) of households by age in the Arts District Study Area (ADSA) will be within the 35- to 44-year old age cohort, while 17.1% of households will fall within the 65- to 74-year old age cohort. Between 2020 and 2025, the only significant growth is projected among these income groups, with the number of households ages 35 to 44 increasing by 20 (8.4%) and households age 75 and older increasing by 34 (26.0%) during the projection period. The ADSA's projected five-year growth *rate* in households age 75 and older is significantly higher than the PSA (Evansville).

Households by income for selected years are shown in the following table:

		Households by Income							
		<\$10,000	\$10,000 - \$19,999	\$20,000 - \$29,999	\$30,000 - \$39,999	\$40,000 - \$49,999	\$50,000 - \$59,999	\$60,000 - \$99,999	\$100,000+
ADSA	2010	352 (24.1%)	401 (27.5%)	251 (17.2%)	154 (10.6%)	92 (6.3%)	51 (3.5%)	115 (7.9%)	43 (2.9%)
	2020	241 (16.7%)	315 (21.9%)	196 (13.6%)	133 (9.2%)	82 (5.7%)	103 (7.1%)	240 (16.7%)	131 (9.1%)
	2025	226 (15.7%)	291 (20.2%)	184 (12.8%)	129 (9.0%)	91 (6.3%)	116 (8.1%)	267 (18.6%)	135 (9.4%)
	Change 2020-2025	-15 (-6.2%)	-24 (-7.6%)	-12 (-6.1%)	-4 (-3.0%)	9 (11.0%)	13 (12.6%)	27 (11.3%)	4 (3.1%)
Evansville	2010	6,513 (12.5%)	9,758 (18.8%)	7,528 (14.5%)	6,676 (12.9%)	5,408 (10.4%)	4,280 (8.2%)	7,894 (15.2%)	3,849 (7.4%)
	2020	4,651 (8.9%)	7,540 (14.4%)	6,901 (13.2%)	6,098 (11.7%)	4,711 (9.0%)	4,627 (8.9%)	11,221 (21.5%)	6,509 (12.5%)
	2025	3,951 (7.5%)	6,694 (12.7%)	6,271 (11.9%)	5,576 (10.6%)	4,348 (8.3%)	5,107 (9.7%)	12,846 (24.4%)	7,838 (14.9%)
	Change 2020-2025	-700 (-15.1%)	-846 (-11.2%)	-630 (-9.1%)	-522 (-8.6%)	-363 (-7.7%)	480 (10.4%)	1,625 (14.5%)	1,329 (20.4%)

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Projections indicate that low-income households making less than \$40,000 a year will comprise 57.7% of the households in the ADSA (Arts District Study Area) in 2025. However, households earning less than \$40,000 will decline between 2020 and 2025, while households earning over \$40,000 are projected to increase during this period. The greatest projected growth within the ADSA from 2020 to 2025 is expected to occur among households with incomes between \$50,000, and \$99,999, reflecting an increase of 40 (11.7%). A modest increase of 9 (11.0%) is also projected among households with incomes between \$40,000 and \$49,999 in the ADSA, while this same income group is projected to decline in the overall PSA (Evansville) during the same period.

Other notable demographic findings regarding the Arts District Study Area based on 2015-2019 American Community Survey (ACS) data include:

- Approximately one-third of the total population within the ADSA live in poverty. This is significantly higher than the 21.6% share for the overall PSA.
- Approximately 715 people, or 27.5% of the total population within the ADSA have a disability, well above the 17.0% share for the overall PSA. Among disabled persons in the ADSA, 159 (22.2%) are age 65 or older, reflecting a 47.5% disability rate for this age group.
- Nearly half of households in the ADSA are single, well above the 36.8% share for the overall PSA.
- Just 2.8% of renter households live in substandard housing, which is considered housing lacking complete indoor plumbing facilities and/or is overcrowded. This is comparable to the 2.0% share for the overall PSA.
- The share of renter-occupied housing units built prior to 1970 is 70.3% in the ADSA, well above the 46.7% share in the overall PSA. The share of owner-occupied housing units built prior to 1970 is 83.8% in the ADSA, which is also above the 72.1% share in the PSA.
- The share of non-conventional rental homes within structures of four or less units in the ADSA is 49.2%, which is comparable to the 52.8% in the PSA.
- An approximate share of 59.1% of the renter households are considered “rent burdened” within the ADSA, representing the households that pay more than 30% of their annual income toward rent. This share is significantly higher than the overall PSA share of 50.1%.

## **Economic and Redevelopment Activity**

Various activity is ongoing to continue revitalization efforts in the Arts District Study Area (ADSA). Notable activity includes the recent renovation and opening of the historic Rathbone building, creating a 46-unit multifamily apartment complex with banquet space and a rooftop lounge. Haynie's Corner, which contains bars, restaurants, and local businesses, continues to develop as a commerce center and gathering place within the ADSA. In 2019, it was announced that a total of six sites were approved for brownfield grant funding and that the City of Evansville accepted proposals to purchase and develop one or two mixed-use developments at the corner of Jefferson Street and Southeast Second Street. These revitalization efforts along with the significant investment and development underway in the adjacent downtown area will create synergy for the district. These efforts have spurred economic activity for the area, creating additional demand for a variety of housing alternatives.

## **Housing Supply**

### *1. Rental Housing*

We identified and telephone surveyed five multifamily rental housing projects containing a total of 201 units within the Arts District Study Area (ADSA). This survey was conducted to establish the overall strength of the rental market in the study area. These rentals have a combined occupancy rate of 99.0%, an extremely high rate for rental housing. All five surveyed properties consist of non-subsidized (market-rate and Tax Credit) units. The distribution of surveyed rental housing supply by product type is illustrated in the following table:

Project Type	Projects Surveyed	Total Units	Vacant Units	Occupancy Rate
Market-rate	3	101	2	98.0%
Tax Credit	2	100	0	100.0%
Total	5	201	2	99.0%

Note that the only vacant units among surveyed properties in the ADSA are at market-rate projects, which have an overall occupancy rate of 98.0%. Tax Credit properties in the ADSA are 100.0% occupied with a waiting list ranging from 46 to 92 households for the next available units. The overall occupancy rate of 99.0% among all properties surveyed is indicative of a strong rental market in the ADSA.

Besides the five properties surveyed in the Arts District Study Area (ADSA), we identified five additional *existing* properties within the ADSA that we were unable to survey at the time of this report. The known details of these projects are based on previous surveys conducted by Bowen National Research in Evansville and from our review of additional sources and are summarized in the following table.

Name	Location	Year Built/ Renovated	Total Units	Property Type
Donaldson Arms	1407 Howard Street	1912	60	Market-rate
The Grove	1105 SE 1 <sup>st</sup> Street	1935/2015	24	Market-rate
Hampton Apts.	1322 Parrett Street	1965/2019	35*	Market-rate
Mulberry Square	237 Mulberry Street	1978	40	Market-rate
Washington Court	111 Washington Avenue	1914	22	Government-subsidized

\*Includes 15 units under construction/renovation at the time of our last survey (2019)

The following table summarizes the breakdown of market-rate and Tax Credit units surveyed within the ADSA.

Arts District Study Area (ADSA)						
Market-rate						
Bedroom	Baths	Units	Distribution	Vacancy	% Vacant	Median Collected Rent
One-Bedroom	1.0	28	27.7%	1	3.6%	\$772
Two-Bedroom	1.0	42	41.6%	0	0.0%	\$895
Two-Bedroom	2.0	18	17.8%	1	5.6%	\$1,250
Three-Bedroom	2.0	13	12.9%	0	0.0%	\$1,450
<b>Total Market-rate</b>		<b>101</b>	<b>100.0%</b>	<b>2</b>	<b>2.0%</b>	-
Tax Credit, Non-Subsidized						
Bedroom	Baths	Units	Distribution	Vacancy	% Vacant	Median Collected Rent
One-Bedroom	1.0	7	7.0%	0	0.0%	\$315
Two-Bedroom	1.0	15	15.0%	0	0.0%	\$1,128
Three-Bedroom	2.0	25	25.0%	0	0.0%	\$716
Four-Bedroom	2.0	53	53.0%	0	0.0%	\$760
<b>Total Tax Credit</b>		<b>100</b>	<b>100.0%</b>	<b>0</b>	<b>0.0%</b>	-

The market-rate units are 98.0% occupied and the Tax Credit units are 100.0% occupied. Median collected rents by bedroom type range from \$772 to \$1,450 for the market-rate units and \$315 to \$1,128 for the Tax Credit units. It is important to point out that only 12.9% of the market-rate supply includes three-bedroom units. However, the supply of Tax Credit units in the ADSA heavily favors larger unit types, as over 75.0% of surveyed Tax Credit units are three-bedroom or larger. The 13 three-bedroom market-rate units have a median collected rent of \$1,400, whereas the three-bedroom and four-bedroom Tax Credit units range from \$716 to \$760 per month. Tax Credit rents for three-bedroom and four-bedroom units in the ADSA represent a significant rent advantage compared with market-rate units. However, very high occupancy rates for both market-rate and Tax Credit units in the ADSA demonstrates the need for additional rental housing choices for a wide variety of households sizes and income levels.

## 2. For-Sale Housing

Bowen National Research, through a review of the Multiple Listing Service information for the Arts District Study Area, identified historical (sold since 2010) for-sale residential data and currently available for-sale housing stock.

The following tables summarize the available and sold (since 2010) housing stock for the ADSA and the PSA.

For-Sale/Sold Housing Supply		
Type	ASDA (Arts District Study Area)	PSA (Evansville)
Available	0	168
Sold	278	17,711
<b>Total</b>	<b>278</b>	<b>17,879</b>

Source: Multiple Listing Service and Bowen National Research

	Total Units	% Share of PSA	Low List Price	High List Price	Average List Price	Median List Price	Average Days On Market
<b>ASDA - Arts District Study Area</b>	0	0.0%	N/A	N/A	N/A	N/A	N/A
<b>PSA - Evansville</b>	168	100.0%	\$16,900	\$995,000	\$154,443	\$105,000	134

Source: Multiple Listing Service and Bowen National Research

As the preceding table indicates, there were no homes available for sale in the Arts District Study Area (ADSA) at the time this survey was conducted. By comparison, the overall PSA (Evansville) has a total of 168 homes for sale with a median list price of \$105,000. The average days on market for available product in the PSA is 134.

Among the 278 homes sold in the ADSA since 2010, a total of 28 homes were sold from January 2020 to December 2020. Home sales prices within the ADSA ranged from \$35,000 to \$435,000, with an average sales price of \$163,344 and a median sales price of \$146,250. The average year built of sold product in the ADSA is 1911, while the average days on market is 53. Homes sold in the ADSA are selling within a time period that is much shorter than the overall PSA (Evansville). It appears that the shorter days-on-market figure and a lack of available homes for sale in the ADSA is indicative of very limited supply relative to the PSA.

## **Conclusions**

The Arts District Study Area (ADSA) experienced significant declines in its population and households between 2000 and 2010. However, population and household growth in the ADSA has stabilized since 2010. It is projected that the total population base will decline by only 11 between 2020 and 2025, while the number of households will go virtually unchanged during the same period. However, some household segments will grow over the next five years, with the greatest growth between 2020 and 2025 projected to occur among households age 75 and older and among households with incomes between \$50,000 and \$99,999. Over half of the overall households within the ADSA have incomes below \$40,000 and approximately one-third of the population lives in poverty.

According to the survey of rental housing alternatives and a review of the for-sale housing inventory, the ADSA has few available housing units and there appears to be pent-up demand for additional housing. Among the multifamily product surveyed in the market, the only vacant units are among the market-rate supply, while all Tax Credit units are occupied, with both Tax Credit properties having a waiting list for the next available units. As such, there is clear pent-up demand in the Arts District Study Area for affordable housing. While Tax Credit rental housing in the ADSA has much lower rents than comparable market-rate units, the lack of available units further demonstrates the need for additional affordable housing, especially since nearly 60.0% of renter households in the ADSA are considered to be rent burdened. In addition, there were no homes listed for sale in the ADSA at the time of this report, and only 28 homes sold in the ADSA in 2020. With an average sales price of over \$160,000, most available for-sale housing is not considered affordable to a majority of households within the ADSA.

Based on this analysis, the Arts District Study Area has a large base of low-income households and a large population living in poverty, many of which are rent burdened. In addition, few rental and for-sale housing options are available in the ADSA, particularly among affordable rental product for which there were no vacant units among the Tax Credit rental units surveyed. Note that there were no for-sale homes identified as available for purchase in the ADSA. As a result, it appears the Arts District area needs additional rental and for-sale product, with emphasis on product affordable to lower income households.

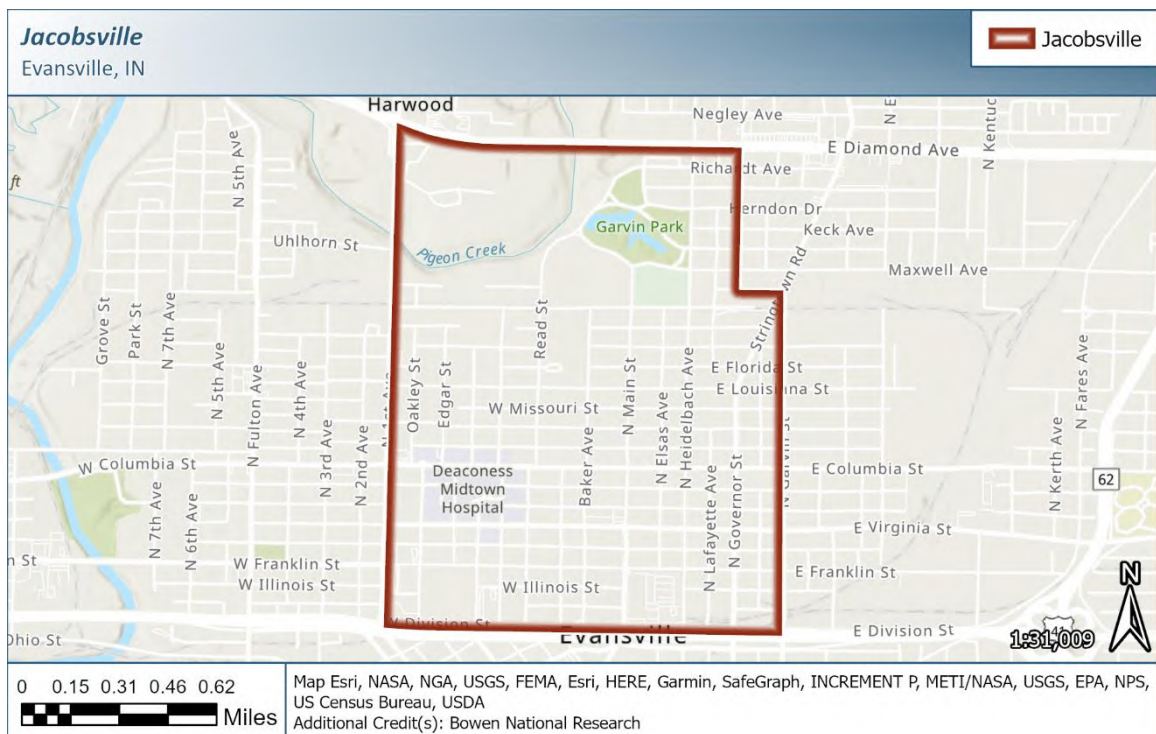

## D. JACOBSVILLE STUDY AREA

The Jacobsville Redevelopment Area, hereinafter referred to as the Jacobsville Study Area (JSA), is located in the northern portion of the Central Submarket, which is in the north central portion of Evansville. The area generally encompasses medical facilities, light industrial uses, retail and office space, residential units, and parkland.

The JSA is north of the Downtown Study Area and north of Lloyd Expressway (State Route 62). This study area is generally bounded by East Diamond Avenue to the north, North Garvin Street to the east, Lloyd Expressway (State Road 62) to the south, and North First Avenue to the west. The Jacobsville Study Area totals 1.5 square miles.

A map of the Jacobsville Study Area is below:

## Demographics

The following summarizes the population and household trends of the Jacobsville Study Area (JSA).

	Total Population		Total Households	
	JSA	Evansville	JSA	Evansville
2000 Census	6,748	122,887	2,781	52,906
2010 Census	5,896	120,081	2,361	51,906
Change 2000-2010	-852	-2,806	-420	-1,000
Percent Change 2000-2010	-12.6%	-2.3%	-15.1%	-1.9%
2020 Estimated	5,532	120,258	2,204	52,255
Change 2010-2020	-364	177	-157	349
Percent Change 2010-2020	-6.2%	0.1%	-6.6%	0.7%
2025 Projected	5,438	120,932	2,162	52,631
Change 2020-2025	-94	674	-42	376
Percent Change 2020-2025	-1.7%	0.6%	-1.9%	0.7%

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

The Jacobsville Study Area (JSA) experienced significant population and household declines between 2000 and 2010. During this time, the study area population declined by 852 (12.6%) and households declined by 420 (15.1%). The population and household base declined further between 2010 and 2020 and is projected to decline between 2020 and 2025 as well, though at significantly slower rates.

The distribution of households by age for the Jacobsville Study Area (JSA) is compared with Evansville in the table below.

		Household Heads by Age						
		<25	25 to 34	35 to 44	45 to 54	55 to 64	65 to 74	75+
JSA	2010	137 (5.8%)	384 (16.3%)	405 (17.2%)	531 (22.5%)	415 (17.6%)	250 (10.6%)	239 (10.1%)
	2020	116 (5.3%)	350 (15.9%)	339 (15.4%)	399 (18.1%)	440 (20.0%)	326 (14.8%)	234 (10.6%)
	2025	102 (4.7%)	334 (15.4%)	338 (15.6%)	371 (17.2%)	403 (18.6%)	366 (16.9%)	248 (11.5%)
	Change 2020-2025	-14 (-12.1%)	-16 (-4.6%)	-1 (-0.3%)	-28 (-7.0%)	-37 (-8.4%)	40 (12.3%)	14 (6.0%)
Evansville	2010	3,939 (7.6%)	9,068 (17.5%)	7,814 (15.1%)	10,011 (19.3%)	8,883 (17.1%)	5,606 (10.8%)	6,585 (12.7%)
	2020	3,218 (6.2%)	9,114 (17.4%)	8,434 (16.1%)	7,803 (14.9%)	9,464 (18.1%)	7,632 (14.6%)	6,590 (12.6%)
	2025	3,286 (6.2%)	8,241 (15.7%)	9,070 (17.2%)	7,796 (14.8%)	8,528 (16.2%)	8,463 (16.1%)	7,247 (13.8%)
	Change 2020-2025	68 (2.1%)	-873 (-9.6%)	636 (7.5%)	-7 (-0.1%)	-936 (-9.9%)	831 (10.9%)	657 (10.0%)

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

It is projected that by 2025, the largest share of households by age in the Jacobsville Study Area will be within the 55- to 64-year old age cohort. Between 2020 and 2025, it is projected that households within all age groups under the age of 65 will decline, while the number of households among age groups 65 and older will increase by 54 (9.6%). The projected increase in the older adult population in the JSA is consistent with the Evansville PSA.

Households by income for selected years are shown in the following table:

		Households by Income							
		<\$10,000	\$10,000 - \$19,999	\$20,000 - \$29,999	\$30,000 - \$39,999	\$40,000 - \$49,999	\$50,000 - \$59,999	\$60,000 - \$99,999	\$100,000+
JSA	2010	494 (20.9%)	590 (25.0%)	339 (14.4%)	278 (11.8%)	251 (10.6%)	119 (5.0%)	231 (9.8%)	59 (2.5%)

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Over one-half (52.5%) of all households within the JSA (Jacobsville Study Area) will have incomes under \$30,000 in 2025. Generally, each household income segment in the JSA under \$40,000 is projected to decrease slightly from 2020 to 2025, with households making less than \$10,000 projected to decrease the most. During the same period, households making \$50,000 or more annually are projected to increase by 48 (8.8%), which is well below the projected 15.4% increase for these households in the overall PSA.

Other notable demographic findings regarding the Jacobsville Study Area based on 2015-2019 American Community Survey (ACS) data include:

- Approximately 1,897 people, or 34.7% of the total population within the JSA live in poverty. This is higher than the 21.6% poverty share for the overall PSA.
- Approximately 1,299 people, or 23.6% of the total population within the JSA have a disability, well above the 17.0% share for the overall PSA. Among disabled persons in the JSA, 355 (27.3%) are over the age of 65, reflecting a 53.8% disability rate for this age group.
- Approximately 907 people, or 38.4% of households in the JSA are single, which is slightly higher than the 36.8% share for the overall PSA.
- Approximately 3.5% of renter households live in substandard housing, which is considered housing lacking complete indoor plumbing facilities and/or is overcrowded. This is higher than the 2.0% share for the overall PSA.
- The share of homes built prior to 1970 for renters is 69.2% in the JSA, well above the 46.7% share in the overall PSA. The share of homes built prior to 1970 for owners is 94.5% in the JSA, which is also higher than the 72.1% share in the PSA.
- The share of non-conventional rental homes within structures of four or less units in the JSA is 67.2%, well above the 52.8% in the PSA.
- An approximate share of 54.3% of the renter households are considered “rent burdened” within the JSA, representing the households that pay more than 30% of their annual income toward rent. This share is only slightly higher than the overall PSA share of 50.1%. Regardless, it is significant that over one-half of the renter households in the JSA are rent burdened.

## **Economic and Redevelopment Activity**

Evansville City Council voted in 2019 to expand the Jacobsville Redevelopment Area, which will allow for a larger portion of the Jacobsville neighborhood to benefit from a potential increase in economic activity. In addition to the expanded redevelopment area, various activity is ongoing to continue revitalization efforts in the Jacobsville Study Area (JSA). Notable activity includes the Deaconess Aquatic Center, which is expected to be complete in summer 2021; The Forge on Main, a mixed-use development that will include workforce housing and a grocery store when complete in fall 2021; Vectren's ongoing investment through the Jacobsville Workforce Housing Partnership to build and renovate affordable workforce housing in the Jacobsville neighborhood, and Berry Plastic's expansion of job openings. These revitalization efforts along with the significant investment and development underway in the adjacent downtown area will create synergy for the JSA. These efforts have spurred economic activity for the area, creating additional demand for a variety of housing alternatives.

## **Housing Supply**

### *1. Rental Housing*

We identified and telephone surveyed five multifamily rental housing projects containing a total of 241 units within the Jacobsville Study Area (JSA). This survey was conducted to establish the overall strength of the rental market in the study area. These rentals have a combined occupancy rate of 100.0%. Among the five projects surveyed, four are non-subsidized (market-rate and Tax Credit) projects containing 118 units. The remaining government-subsidized project has a total of 123 units. These non-subsidized units are 100.0% occupied. Note that this survey does not include The Forge on Main, a workforce housing project that is slated to open in fall 2021. The distribution of surveyed rental housing supply by product type is illustrated in the following table:

Project Type	Projects Surveyed	Total Units	Vacant Units	Occupancy Rate
Market-rate	2	47	0	100.0%
Tax Credit	2	71	0	100.0%
Government-Subsidized	1	123	0	100.0%
Total	5	241	0	100.0%

As the preceding table illustrates, two of the surveyed projects are market-rate, two operate under the Tax Credit program, and the remaining project operates with a government subsidy. All five properties are 100.0% occupied. In addition, the Tax Credit and government-subsidized properties each have a waiting list in place for the next available units. According to property management, waiting lists range from five to 15 households for the next available units. As such, there is clear pent-up demand in the Jacobsville Study Area for affordable housing.

In addition to the five properties surveyed in the Jacobsville Study Area (JSA), we identified three additional *existing* properties within the JSA that we were unable to survey at the time of this report. The known details of these projects are based on previous surveys conducted by Bowen National Research in Evansville and from our review of additional sources and are summarized in the following table:

Name	Location	Year Built/ Renovated	Total Units	Property Type
Garfield Commons	422 Garfield Avenue	2018	47	Tax Credit
Lucas Place I	414 Baker Avenue	1907/1999	20	Government-subsidized
Lucas Place II	120 W. Michigan Street	2011	27	Government-subsidized

The following table summarizes the breakdown of market-rate and Tax Credit units surveyed within the Jacobsville Study Area (JSA).

Jacobsville Study Area (JSA)						
Market-rate						
Bedroom	Baths	Units	Distribution	Vacancy	% Vacant	Median Collected Rent
One-Bedroom	1.0	35	74.5%	0	0.0%	\$535
Two-Bedroom	1.0	12	25.5%	0	0.0%	\$565
<b>Total Market-rate</b>		<b>47</b>	<b>100.0%</b>	<b>0</b>	<b>0.0%</b>	-
Tax Credit, Non-Subsidized						
Bedroom	Baths	Units	Distribution	Vacancy	% Vacant	Median Collected Rent
One-Bedroom	1.0	12	16.9%	0	0.0%	\$335
Two-Bedroom	1.0	25	35.2%	0	0.0%	\$650
Two-Bedroom	2.0	4	5.6%	0	0.0%	\$740
Three-Bedroom	2.0	22	31.0%	0	0.0%	\$740
Four-Bedroom	2.5	8	11.3%	0	0.0%	\$860
<b>Total Tax Credit</b>		<b>71</b>	<b>100.0%</b>	<b>0</b>	<b>0.0%</b>	-

The market-rate and Tax Credit units in the Jacobsville Study Area (JSA) are 100.0% occupied. Median rents by bedroom type range from \$535 (one-bedroom) to \$565 (two-bedroom) for the market-rate units and \$335 (one-bedroom) to \$860 (four-bedroom) for the Tax Credit units. Generally, these median rents for the JSA are below the rents for the Downtown and Arts District study areas.

## 2. For-Sale Housing

Bowen National Research, through a review of the Multiple Listing Service information for the Jacobsville Study Area (JSA), identified both historical (sold since 2010) for-sale residential data and currently available for-sale housing stock.

Within this study area, there were 489 homes sold over the past decade and only nine homes currently available for purchase. The following tables summarize the available and sold (since 2010) housing stock for the JSA and the PSA.

For-Sale/Sold Housing Supply		
Type	JSA (Jacobsville Study Area)	PSA (Evansville)
Available	9	168
Sold	489	17,711
Total	<b>498</b>	<b>17,879</b>

Source: Multiple Listing Service and Bowen National Research

	Available For-Sale Housing						
	Total Units	% Share of PSA	Low List Price	High List Price	Average List Price	Median List Price	Average Days On Market
<b>JSA – Jacobsville Study Area</b>	9	5.4%	\$36,843	\$95,000	\$57,010	\$55,000	199
<b>PSA - Evansville</b>	168	100.0%	\$16,900	\$995,000	\$154,443	\$105,000	134

Source: Multiple Listing Service and Bowen National Research

The nine homes available for purchase within the Jacobsville Study Area (JSA) range from \$36,843 to \$95,000, with a median list price of \$55,000, which is nearly half of the overall PSA median list of \$105,000. The average days on market for the available homes in the JSA is 199, which is a higher figure than the overall PSA (134 days on market).

A total of 11 homes were sold within the JSA from January 2020 to December 2020. Home sales prices within the JSA ranged from \$3,700 to \$182,500, with an average sales price of \$46,800 and a median sales price of \$35,450. The average year built of sold product in the JSA is 1904, while the average days on market is 42.

While the median list price of available homes in the JSA is \$55,000 and may be affordable to many low-income households, we expect that homes at this price are likely older, lower quality homes in need of significant repairs and modernization that will be unaffordable to most low-income households in the JSA. The average year built of sold product in the JSA was 1904. As such, this housing does not represent a viable option for most low-income households and will likely not appeal to most moderate- and higher-income households.

## **Conclusions**

The Jacobsville Study Area (JSA) experienced significant declines in overall population and households between 2000 and 2020. Projections indicate that the decline in overall population and households will not be as significant between 2020 and 2025. Despite the negative demographic trends, older adult households (age 65 and older) are projected to increase by 9.6% between 2020 and 2025. Over one-half (52.5%) of all households within the JSA are projected to have incomes below \$30,000 by 2025, and over one-third of the population lives in poverty.

According to the survey of rental housing alternatives and a review of the for-sale housing inventory, the JSA has few available housing units and there appears to be pent-up demand for additional housing. The five rental properties surveyed in the JSA have a total of 241 units with no vacancies. According to property management, wait lists range from five to 15 households for the Tax Credit and government-subsidized projects in the market. As such, there is clear pent-up demand in the Jacobsville Study Area for affordable housing. Although rental and for-sale product in the JSA is generally priced below adjacent neighborhoods, more than half of area households are considered cost burdened, meaning that many area households are paying a disproportionately high share of their income toward housing costs.

Based on this analysis, the Jacobsville Study Area has a large base of low-income households, many of which are cost burdened. Few housing options are available in the neighborhood, particularly among affordable rental product and for-sale product that does not require extensive repairs. As a result, it appears the Jacobsville area needs additional rental and for-sale product, with emphasis on product affordable to lower income households and the increasing older adult population. Note that the ongoing Jacobsville Workforce Housing Partnership funded by Vectren is renovating existing properties in the JSA. This project, along with The Forge on Main mixed-use property slated to open in fall 2021, is expected to supply much needed affordable housing units to the neighborhood.

## ADDENDUM D: GLOSSARY

Various key terms associated with issues and topics evaluated in this report are used throughout this document. The following provides a summary of the definitions for these key terms. It is important to note that the definitions cited below include the source of the definition, when applicable. Those definitions that were not cited originated from the National Council of Housing Market Analysts (NCHMA).

***Area Median Household Income (AMHI)*** is the median income for families in metropolitan and non-metropolitan areas, used to calculate income limits for eligibility in a variety of housing programs. HUD estimates the median family income for an area in the current year and adjusts that amount for different family sizes so that family incomes may be expressed as a percentage of the area median income. For example, a family's income may equal 80 percent of the area median income, a common maximum income level for participation in HUD programs. (Bowen National Research, Various Sources)

***Available rental housing*** is any rental product that is currently available for rent. This includes any units identified through Bowen National Research survey of over 100 affordable rental properties identified in the study areas, published listings of available rentals, and rentals disclosed by local realtors or management companies.

***Basic Rent*** is the minimum monthly rent that tenants who do not have rental assistance pay to lease units developed through the USDA-RD Section 515 Program, the HUD Section 236 Program and the HUD Section 223 (d) (3) Below Market Interest Rate Program. The Basic Rent is calculated as the amount of rent required to operate the property, maintain debt service on a subsidized mortgage with a below-market interest rate, and provide a return on equity to the developer in accordance with the regulatory documents governing the property.

***Contract Rent*** is (1) the actual monthly rent payable by the tenant, including any rent subsidy paid on behalf of the tenant, to the owner, inclusive of all terms of the lease (HUD & RD) or (2) the monthly rent agreed to between a tenant and a landlord (Census).

***Cost overburdened households*** are those renter households that pay more than 30% or 35% (depending upon source) of their annual household income towards rent. Typically, such households will choose a comparable property (including new affordable housing product) if it is less of a rent burden.

***Elderly or Senior Housing*** is housing where (1) all the units in the property are restricted for occupancy by persons 62 years of age or older or (2) at least 80% of the units in each building are restricted for occupancy by households where at least one household member is 55 years of age or older and the housing is designed with amenities and facilities designed to meet the needs of senior citizens.

***Extremely low-income*** is a person or household with income below 30% of Area Median Income adjusted for household size.

***Fair Market Rent (FMR)*** are the estimates established by HUD of the gross rents (contract rent plus tenant paid utilities) needed to obtain modest rental units in acceptable condition in a specific county or metropolitan statistical area. HUD generally sets FMR so that 40% of the rental units have rents below the FMR. In rental markets with a shortage of lower priced rental units HUD may approve the use of Fair Market Rents that are as high as the 50<sup>th</sup> percentile of rents.

***Garden apartments*** are apartments in low-rise buildings (typically two to four stories) that feature low density, ample open-space around buildings, and on-site parking.

***Gross Rent*** is the monthly housing cost to a tenant which equals the Contract Rent provided for in the lease plus the estimated cost of all tenant paid utilities.

***Household*** is one or more people who occupy a housing unit as their usual place of residence.

***Housing Choice Voucher (Section 8 Program)*** is a federal rent subsidy program under Section 8 of the U.S. Housing Act, which issues rent vouchers to eligible households to use in the housing of their choice. The voucher payment subsidizes the difference between the Gross Rent and the tenant's contribution of 30% of adjusted gross income, (or 10% of gross income, whichever is greater). In cases where 30% of the tenant's income is less than the utility allowance, the tenant will receive an assistance payment. In other cases, the tenant is responsible for paying his share of the rent each month.

***Housing unit*** is a house, apartment, mobile home, or group of rooms used as a separate living quarters by a single household.

***HUD Section 8 Program*** is a Federal program that provides project based rental assistance. Under the program HUD contracts directly with the owner for the payment of the difference between the Contract Rent and a specified percentage of tenants' adjusted income.

***HUD Section 202 Program*** is a Federal program, which provides direct capital assistance (i.e. grant) and operating or rental assistance to finance housing designed for occupancy by elderly households who have income not exceeding 50% of the Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization. Units receive HUD project based rental assistance that enables tenants to occupy units at rents based on 30% of tenant income.

***HUD Section 236 Program*** is a Federal program which provides interest reduction payments for loans which finance housing targeted to households with income not exceeding 80% of Area Median Income who pay rent equal to the greater of Basic Rent or 30% of their adjusted income. All rents are capped at a HUD approved market rent.

***HUD Section 811 Program*** is a Federal program, which provides direct capital assistance and operating or rental assistance to finance housing designed for occupancy by persons with disabilities who have income not exceeding 50% of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization.

***Income Limits*** are the Maximum Household Income by county or Metropolitan Statistical Area, adjusted for household size and expressed as a percentage of the Area Median Income for the purpose of establishing an upper limit for eligibility for a specific housing program. Income Limits for federal, state and local rental housing programs typically are established at 30%, 50%, 60% or 80% of AMI.

***Low-Income Household*** is a person or household with gross household income less than 40% of Area Median Income adjusted for household size (Bowen National Research).

***Low-Income Housing Tax Credit*** is a program to generate equity for investment in affordable rental housing authorized pursuant to Section 42 of the Internal Revenue Code, as amended. The program requires that a certain percentage of units built be restricted for occupancy to households earning 60% or less of Area Median Income, and that the rents on these units be restricted accordingly.

***Market vacancy rate (physical)*** is the average number of apartment units in any market which are unoccupied divided by the total number of apartment units in the same market, excluding units in properties which are in the lease-up stage. Bowen National Research considers only these vacant units in its rental housing survey.

***Mixed income property*** is an apartment property containing (1) both income restricted and unrestricted units or (2) units restricted at two or more income limits (i.e. low-income tax credit property with income limits of 30%, 50% and 60%).

***Moderate Income*** is a person or household with gross household income between 40% and 60% of Area Median Income adjusted for household size.

***Multifamily*** are structures that contain more than two housing units.

***Overcrowded housing*** is often considered housing units with 1.01 or more persons per room. These units are often occupied by multi-generational families or large families that are in need of more appropriately-sized and affordable housing units. For the purposes of this analysis, we have used the share of overcrowded housing from the American Community Survey.

***Pipeline housing*** is housing that is currently under construction or is planned or proposed for development. We identified pipeline housing during our telephone interviews with local and county planning departments and through a review of published listings from housing finance entities such as IHFA, HUD and USDA.

**Population trends** are changes in population levels for a particular area over a specific period of time which is a function of the level of births, deaths, and net migration.

**Potential support** is the equivalent to the *housing gap* referenced in this report. The *housing gap* is the total demand from eligible households that live in certain housing conditions (described in Section VIII of this report) less the available or planned housing stock that was inventoried within each study area.

**Project-based rent assistance** is rental assistance from any source that is allocated to the property or a specific number of units in the property and is available to each income eligible tenant of the property or an assisted unit.

**Public Housing or Low-Income Conventional Public Housing** is a HUD program administered by local (or regional) Housing Authorities which serves Low- and Very-Low-Income households with rent based on the same formula used for HUD Section 8 assistance.

**Rent burden** is gross rent divided by adjusted monthly household income.

**Rent burdened households** are households with rent burden above the level determined by the lender, investor, or public program to be an acceptable rent-to-income ratio.

**Restricted rent** is the rent charged under the restrictions of a specific housing program or subsidy.

**Single-Family Housing** is a dwelling unit, either attached or detached, designed for use by one household and with direct access to a street. It does not share heating facilities or other essential building facilities with any other dwelling.

**Special needs population** is a specific market niche that is typically not catered to in a conventional apartment property. Examples of special needs populations include: substance abusers, visually impaired person or persons with mobility limitations.

**Subsidized Housing** is housing that operates with a government subsidy often requiring tenants to pay up to 30% of their adjusted gross income toward rent and often limiting eligibility to households with incomes of up to 50% or 80% of the Area Median Household Income. (Bowen National Research)

**Subsidy** is monthly income received by a tenant or by an owner on behalf of a tenant to pay the difference between the apartment's contract rent and the amount paid by the tenant toward rent.

**Substandard** housing is typically considered product that lacks complete indoor plumbing facilities. Such housing is often considered to be of such poor quality and in disrepair that it should be replaced. For the purposes of this analysis, we have used the share of households living in substandard housing from the American Community Survey.

***Substandard conditions*** are housing conditions that are conventionally considered unacceptable which may be defined in terms of lacking plumbing facilities, one or more major systems not functioning properly, or overcrowded conditions.

***Tenant*** is one who rents real property from another.

***Tenant paid utilities*** are the cost of utilities (not including cable, telephone, or internet) necessary for the habitation of a dwelling unit, which are paid by the tenant.

***Tenure*** is the distinction between owner-occupied and renter-occupied housing units.

***Townhouse (or Row House)*** is a single-family attached residence separated from another by party walls, usually on a narrow lot offering small front and back-yards; also called a row house.

***Vacancy Rate – Economic Vacancy Rate (physical)*** is the maximum potential revenue less actual rent revenue divided by maximum potential rent revenue. The number of total habitable units that are vacant divided by the total number of units in the property.

## ADDENDUM E: QUALIFICATIONS

### The Company

Bowen National Research employs an expert staff to ensure that each market study includes the highest standards. Each staff member has hands-on experience evaluating sites and comparable properties, analyzing market characteristics and trends, and providing realistic recommendations and conclusions. The Bowen National Research staff has national experience and knowledge to assist in evaluating a variety of product types and markets.

### Primary Contact and Report Author

**Patrick Bowen**, President of Bowen National Research, has conducted numerous housing needs assessments and provided consulting services to city, county and state development entities as it relates to residential development, including affordable and market rate housing, for both rental and for-sale housing, and retail development opportunities. He has also prepared and supervised thousands of market feasibility studies for all types of real estate products, including housing, retail, office, industrial and mixed-use developments,

since 1996. Mr. Bowen has worked closely with many state and federal housing agencies to assist them with their market study guidelines. Mr. Bowen has his bachelor's degree in legal administration (with emphasis on business and law) from the University of West Florida and currently is a member of the NCHMA Executive Committee and is a co-chair of the NCHMA Standards Committee.

Patrick Bowen has served as the lead author/analyst and primary contacts of the following housing assessments since 2010:

- Housing Needs Assessment – Yellow Springs, Ohio
- Housing Study & Needs Assessment – St. Johnsbury, Vermont
- Housing Needs Assessment – Spokane Tribe, Washington
- Housing Needs Assessment – Penobscot Nation, Maine
- Countywide Housing Needs Assessment – Preble County, Ohio
- Downtown Residential Feasibility Study – Charleston, West Virginia
- Regional Housing Needs Assessment – Asheville, North Carolina Region
- Statewide and County Level Housing Needs Assessments – Vermont
- Citywide Housing Needs Assessment – Evansville, Indiana
- Town Housing Needs Assessment – Nederland, Colorado
- Housing Market Study – Fort Wayne (Southeast Quadrant), Indiana
- Citywide Housing Market Study & Tornado Impact Analysis – Joplin, Missouri
- Downtown Residential Feasibility Study – Morgantown, West Virginia

- Downtown Housing Needs Analysis – Springfield, Illinois
- Countywide Rental Housing Needs Analysis & Hurricane Dolly Housing Impact Analysis– Hidalgo County, Texas
- Citywide Comprehensive Housing Market Study – Rock Island, Illinois
- For-Sale Housing Analyses – Richmond and Chesterfield County, Virginia
- Affordable Housing Market Analysis – Jacksonville, North Carolina.
- East District Rental Housing Needs Assessment – New Orleans, Louisiana
- Employer Survey and Housing Needs Assessment – Greene County, Pennsylvania
- Hill District Housing Needs Assessment – Pittsburgh, Pennsylvania
- Statewide Rural and Farm Labor Housing Needs Analysis – Texas

**The following individuals provided research and analysis assistance and have been involved with previous housing needs assessment completed by our firm in some capacity:**

**June Davis**, Office Manager of Bowen National Research, has 24 years of experience in market feasibility research. Ms. Davis has overseen production on over 20,000 market studies for projects throughout the United States.

**Lisa Goff**, Market Analyst, has conducted site-specific analyses in both rural and urban markets throughout the country. She is also experienced in the day-to-day operation and financing of Low-Income Housing Tax Credit and subsidized properties, which gives her a unique understanding of the impact of housing development on current market conditions.

**Desireé Johnson** is the Director of Operations for Bowen National Research. Ms. Johnson is responsible for all client relations, the procurement of work contracts, and the overall supervision and day-to-day operations of the company. She has been involved in the real estate market research industry since 2006. Ms. Johnson has an Associate of Applied Science in Office Administration from Columbus State Community College.

**Jeff Peters**, Market Analyst, has conducted on-site inspection and analysis for rental properties throughout the country. He is familiar with multiple types of rental housing programs, the day-to-day interaction with property managers and leasing agents and the collection of pertinent property details. Mr. Peters graduated from The Ohio State University with a Bachelor of Arts in Economics.

**Craig Rupert**, Market Analyst, has conducted on-site market analysis in both urban and rural markets throughout the United States since 2010. Mr. Rupert is experienced in the evaluation of multiple types of housing programs, including market-rate, Tax Credit and various government subsidies and uses this knowledge and research to provide both qualitative and quantitative analysis. Mr. Rupert has a degree in Hospitality Management from Youngstown State University.

**Stephanie Viren** is the Research & Travel Coordinator at Bowen National Research. Ms. Viren focuses on collecting detailed data concerning housing conditions in various markets throughout the United States. Ms. Viren has extensive interviewing skills and experience and also possesses the expertise necessary to conduct surveys of diverse pools of respondents regarding population and housing trends, housing marketability, economic development and other socioeconomic issues relative to the housing industry. Ms. Viren's professional specialty is condominium and senior housing research. Ms. Viren earned a Bachelor of Arts in Business Administration from Heidelberg College.

**Jack Wiseman**, Market Analyst, has conducted extensive market research in over 200 markets throughout the United States since 2008. He provides thorough evaluation of site attributes, area competitors, market trends, economic characteristics and a wide range of issues impacting the viability of real estate development. He has evaluated market conditions for a variety of real estate alternatives, including affordable and market-rate apartments, retail and office establishments, educational facilities, marinas and a variety of senior residential alternatives. Mr. Wiseman has a Bachelor of Arts degree in Economics from Miami University.

**Christopher T. Bunch**, Market Analyst has over ten years of professional experience in real estate, including five years of experience in the real estate market research field. Mr. Bunch is responsible for preparing market feasibility studies for a variety of clients. Mr. Bunch earned a bachelor's degree in Geography with a concentration in Urban and Regional Planning from Ohio University in Athens, Ohio.

**In-House Researchers** – Bowen National Research employs a staff of in-house researchers who are experienced in the surveying and evaluation of all rental and for-sale housing types, as well as in conducting interviews and surveys with city officials, economic development offices and chamber of commerce, housing authorities and residents.

*No subconsultants were used as part of this assessment.*

## ADDENDUM F: SOURCES

Bowen National Research uses various sources to gather and confirm data used in each analysis. These sources include the following:

- 2000 and 2010 U.S. Census
- American Community Survey
- American Seniors Housing Assn.: *The State of Seniors Housing*
- ESRI Demographics
- Evansville City Representatives
- Evansville Department of Metropolitan Development
- Growth Alliance for Greater Evansville
- Housing Authority of the City of Evansville
- Indiana Department of Workforce Development
- Indiana State Department of Health Division of Long Term Care (ISDH)
- InfoGroup
- Management for each property included in the survey
- Multiple Listing Service
- Realtor.com
- SOCDS Building Permits Database
- U.S. Department of Housing and Urban Development (HUD)
- U.S. Department of Labor, Bureau of Labor Statistics
- Urban Decision Group (UDG)
- Vanderburgh County Representatives
