This addendum includes the following:

Question: On page 24, 3.1.6 compliance matrix it says: "Vendor must supply an Android application that functions on both tablets and smartphone."

- a. Would a ruggedized device operating a Windows OS with greater support and equivalent or improved functionality to an Android be considered responsive to this requirement?

Answer: 3.1.6 was meant to refer to the App being able to work on Android tablets and smartphones for passengers. To clarify the App should be able to work on both Android and Apple devices. We apologize for the miscommunication.

- a. We are open minded on the device and operating system for the driver as long as they are driver friendly and built to withstand the harsh conditions on a transit bus.
