Executive Summary

The Americans with Disabilities Act (ADA) was signed into law on July 26, 1990 and provides civil rights protection to disabled individuals, guaranteeing equal opportunities in public accommodations, employment, transportation, telecommunications, and State and local government services. Congress enacted this law to provide a “clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities”. Title II of the ADA requires all cities that receive federal funding or have more than 50 employees to complete a self-evaluation and corresponding Transition Plan, establish an ADA Coordinator and adopt grievance procedures for discrimination against qualified individuals with disabilities.

In developing the Transition Plan, all communities covered under Title II need to first conduct a self-evaluation, which includes a comprehensive inventory of pedestrian facilities. This inventory will allow each community to identify non-compliant locations and develop a program for remedial repairs in order to bring facilities into compliance. Vanderburgh County has undertaken this comprehensive self-evaluation to determine the extent to which individuals with disabilities may be restricted from access to county facilities. Furthermore, this Transition Plan includes this detailed review and it outlines barrier removal solutions which will result in improved access for all individuals.

APPENDIX F: BUILDING ASSESSMENT DATA
1. **Introduction**

The Americans with Disabilities Act (ADA) of 1990 is a civil rights statute that prohibits discrimination against people who have disabilities. There are five separate Titles (sections) of the ADA relating to various aspects of potential discrimination. Title II of the ADA specifically addresses the subject of making public services and public transportation accessible to those with disabilities. Under the terms of the ADA, designing and constructing facilities for public use that are not accessible by people with disabilities constitutes discrimination.

The most efficient way for communities to ensure Title II’s requirements are being met is through self-evaluation. Self-evaluation enables local governments to pinpoint the facilities, programs, and other services that must be modified or relocated in order for that local government agency to comply with the ADA. Once a comprehensive self-evaluation has been completed, local government agencies are then required to develop a Transition Plan to address any and all deficiencies. The Transition Plan is intended to achieve the following:

A. Identify physical obstacles that limit the accessibility of facilities to individuals with disabilities.
B. Describe the methods to be used to make the facilities accessible.
C. Provide a schedule or program for making the access modifications.
D. Identify the public officials responsible for the implementation of the Transition Plan.

ADA Transition Plans are required from all local governmental agencies to cover all facilities under their control. The focus of this Transition Plan is on publicly managed pedestrian facilities located within the county owned rights-of-way. This includes sidewalks, curb ramps, street cross-walks, driveway crossings, and median crossings.
2. **Laws, Regulation, Guidelines and Other Design Standards**

Beginning in 1968, a series of laws and regulations were put in place to prohibit discrimination against individuals with disabilities and address accessibility issues that exclude people with disabilities from programs, services, and activities. The culminations of these efforts have set the tone and requirements of this Transition Plan. The following is an abbreviated description of these influential documents.

A. **American Barriers Act of 1968 (ABA)**

The ABA requires that facilities designed, altered, built or leased with federal dollars be accessible to the public. The requirements set forth in the ABA are limited to the architectural standards in new and altered buildings and in newly leased facilities.

B. **The Rehabilitation Act of 1973**

Section 504 of the Rehabilitation Act obligates states and local governments to ensure that persons with disabilities have equal access to any programs, services, or activities receiving federal financial assistance. This Act also required entities to ensure that their employment practices do not discriminate on the basis of disability.

C. **The Americans with Disabilities Act of 1990 (ADA)**

Built upon the foundation laid by Section 504 of the Rehabilitation Act, the ADA requires that all state and local governments, regardless of their ability to receive federal financial assistance, provide equal access to programs, services, or activities to those whom are disabled. The ADA went a step further by applying the law to private businesses that meet the ADA’s definition of “public accommodation”, commercial facilities and many private employers.

Title II, one of five separate titles of the ADA, applies specifically to “public entities” and the programs, services, and activities they provide. This title outlines the requirements for the self-evaluation, Transition Plan and appointing an ADA coordinator.

In 1992, the U.S. Department of Justice issued 28 Code of Federal Regulations (CFR) Part 35, Nondiscrimination on the Basis of Disability in State and Local Governmental Services, to implement Subtitle A of Title II. In particular, this regulation extended the prohibition of discrimination in federally assisted programs already established by Section 504 of the Rehabilitation Act to all activities of state and local governments, including those that do not receive federal financial assistance.

D. **The ADA Standards for Accessible Design (ADA Standards)**

The ADA Standards outline the requirements necessary to make a building or other facilities physically accessible to people with disabilities. The Standards are a comprehensive guide that identifies what features will need to be accessible and list the specifications required to make them compliant with the ADA.

E. **Uniform Federal Accessibility Guidelines (UFAS)**
The guidelines discussed in the UFAS are architectural standards originally developed for facilities covered by the ABA. These uniformed standards are also used to satisfy compliance in new or altered construction under Section 504. With the exception of the elevator exemption, states and local governments have the option to use UFAS or the ADA standards to meet their obligations under Title II of the ADA.

**F. Public Right of Way Accessibility Guidelines (PROWAG)**

The design standards found in the draft PROWAG reflects the best practices for designing accessible pedestrian facilities. This document is not a rule and has no legal effect; however, Indiana Department of Transportation strongly encourages its use, and it is anticipated that PROWAG will become enforceable by federal law by the end of 2014.

**G. Accessibility and Discrimination**

Accessibility plays a significant role in the inclusion of people with disabilities. The first step toward fulfilling the rights of people with disabilities is creating an accessible, barrier-free environment. Regulations require that barriers that are structural must be removed in public areas of existing facilities when such removal is readily achievable. Barriers typically found in public areas include: routes of travel requiring the use of stairs, non-ADA compliant ramps, door widths that cannot accommodate the passage of a wheelchair, and the location of door handles that are too high.

Discrimination against individuals with disabilities occurs when a person is perceived differently, treated differently, and struggles to gain acceptance at a level experienced by their non-disabled peers. Often times, physical barriers encountered by people with disabilities can be perceived as discrimination because they exclude that individual from reaching their desired destination or performing a specific task or action. According to the ADA, all State and local governments are required to follow specific architectural standards in either the new construction or the alteration of existing buildings unless the corrective actions would result in undue financial or administrative burdens. To avoid discriminating against those with disabilities, public entities are required to make reasonable modifications. These modifications will provide equality of opportunity, but the county cannot guarantee equality of results.

**H. Program Accessibility**

Title II requires local governmental agencies to ensure that all of their programs, services, and activities, when viewed in their entirety, are accessible to persons with disabilities. Program access is intended to remove physical barriers to the local governmental agency services, programs and activities, but it generally does not require that the local governmental agency make each facility, or each part of any given facility, accessible. For example, every restroom in a given facility does not need to be made accessible. However, signage directing persons with disabilities to the accessible features and spaces within that given facility must be provided.

Program accessibility may be achieved through a variety of ways. Local governmental agencies may choose to make structural changes or pursue alternatives to structural changes to achieve
access. For example, the local governmental agency can move public meetings to accessible buildings and relocate services for individuals with disabilities to accessible levels or parts of a building. It should be noted that when choosing between possible methods of program accessibility, the local governmental agency must give priority to the choices that offer services, programs, and activities in the most integrated setting that is available and appropriate. Additionally, all newly constructed public facilities must be fully accessible to people with disabilities. 28CFR§§35.149, 35.150, 35.151, 35.163.

I. Undue Burden
A “grandfather clause” does not exist in the ADA; however, the law is flexible. Local government agencies must comply with Title II of the ADA, and must provide program access for all individuals. However, with respect to complying with Title II, a local governmental agency does not have to take any action to make a feature compliant to ADA standards if that agency can demonstrate that the alteration will result in the creation of a hazardous condition, or will cause undue financial and/or administrative burden. Hazardous conditions may include affecting crime prevention measures, legitimate safety requirements necessary for safe operation, or impact of the action on the operation of a site. The determination of an undue burden can only be made by the head of the local public agency (or a designee) and must be accompanied by a written statement outlining the reasons for reaching such a conclusion. In order to establish that an alteration of a feature will cause undue financial and/or administrative burden, an evaluation of all resources available for use in the program must be completed. The evaluation of these resources must include the amount of financial resources available, the effect on expenses and resources, the type and location of the facility, and the number of employees at the site.

If an alteration of a feature would result in a burden, the public entity must take any other action that would not result in an undue burden, but would ensure that individuals with disabilities receive the benefits and services of the program or activity. 28CFR§35.150(a)(3).

J. Safe Harbor
Elements in facilities built or altered before March 15, 2012 that comply with the 1991 ADA Standards for Accessible Design (1991 Standards) are not required to be modified to specifications in the 2010 Standards. For example, the 1991 Standards allow the maximum side reach control part of a paper towel dispenser to be 54 inches. The 2010 Standards lower that side reach range to 48 inches maximum. If a paper towel dispenser was installed prior to March 15, 2012 with its highest operating part at 54 inches, the paper towel dispenser does not need to be lowered to 48 inches. Since the dispenser complies with the 1991 Standards, that Standard provides a “safe harbor”.

K. Historic Properties
Exceptions to the ADA have been made for historic properties that are listed, or are eligible for listing, in the National Register of Historic Places, or a property designated as historic under state or local law. A public entity is not required to make alterations that would destroy or
threaten the historical significance of an historic property. In such a case, alternative requirements may be used as discussed in 28 CFR 36.405 and ADAAG 4.1.7(3). An example of an alternative requirement would include providing displays and written information in a location where they can be seen by a seated person.

L. Curb Ramps
When streets and roads are either newly built or altered ramps must be constructed whenever curbs or other physical barriers exist at the connection point between the roadway and a pedestrian walkway. Likewise, when new sidewalks or walkways are built or altered, they must also contain curb ramps or sloped areas wherever they intersect with a street or roadway. However, at existing roads and sidewalks that have not been altered, local governmental agencies may choose to construct curb ramps at every point where a pedestrian walkway intersects a curb, but they are not necessarily required to do so. Under program access, alternative routes to buildings that make use of existing curb ramps may be acceptable where persons with disabilities must only travel a marginally longer route. 28CFR§35.151(e).
3. **The Self-Evaluation and Transition Plan Requirements**

**A. Basic Requirements and Components**

In accordance with the ADA, Section 504, and the August 2, 2012 letter from Troy Woodruff, INDOT Chief of Staff (See Appendix A), local communities should at a minimum:

1. Designate an employee of the local community as an ADA/504 Coordinator. The coordinator will be responsible for overseeing compliance with the nondiscrimination laws (Rehabilitation Act, American Barriers Act, and Americans with Disabilities Act) as they relate to individuals with disabilities.

2. Create and distribute an educational notice alerting the public to their rights under the ADA and Section 504, as well as the County’s responsibilities under the law. This notice should be distributed on an on-going basis.

3. Develop and adopt a grievance policy and procedure that provides swift and equitable resolution of complaints.

4. Develop and adopt a model ordinance outlining accessibility standards, specifications and design details that reflect the most current ADA standards.

5. A self-evaluation and inventory should be completed of all of its facilities, programs, policies, and activities to evaluate whether there are access barriers for persons with disabilities.

6. Develop a Transition Plan that will address the removal of the access barriers identified in its inventory that includes a budget and schedule for improvements. All local communities are required to have a Transition Plan in place if they receive federal funds. Local communities with 50 or more employees must have a plan, regardless of whether they receive federal funds.

7. The Transition Plan must be implemented and regularly monitored for progress in barrier removal. This re-evaluation should occur at least once every three to five years.

**B. Roadway Prioritization Methodology**

Given the considerable challenge of moving toward not only providing safe and usable pedestrian facilities for all, but also complying with the federal and state regulations, the main goal of the Transition Plan is to develop a practical ranking of all the non-compliant facilities so that the repairs can be done in an order that targets higher priority facilities first.

The first step in developing the prioritized ranking was to identify the roads that are more heavily traveled by pedestrians, as well as those destinations to which pedestrians are traveling. To illustrate those roadways and destinations graphically, a Pedestrian Traffic Generator Map was created (See Appendix E). This map shows all the roadways and tracts of land throughout...
Each roadway is given a priority – 1, 2 or 3 (with 1 being the highest). These rankings are based on the INDOT Functional Classifications. Likewise, every parcel of land is also given a priority of 1, 2 or 3. These rankings are based on the land uses of each parcel, and seek to represent the level that each respective land use will generate pedestrian traffic. Figure 1 shows the Pedestrian Traffic Generator Map by Land Use, and Figure 2 shows the Pedestrian Traffic Generator Map by Priority. Figure 3 shows the Sidewalk and Curb Ramp Overlay on the Pedestrian Generator Map by Priority. Specific definitions of each of these priority rankings are listed in Table 1.

Table 1: Land Use and Roadway Priority Definitions
C. Building Assessment Methodology

Each building under the County’s jurisdiction was visited and assessed by Hafer Associates. The architects used the ADA Checklist for Readily Achievable Barrier Removal, which is based on the 2010 ADA Standards for Accessible Design. This checklist makes it possible for all buildings to be assessed in a consistent manner across the various aspects of the ADA. The checklist is split into four categories, called Priorities. They are as follows:

- Priority 1 – Approach & Entrance
- Priority 2 – Access to Goods & Services
- Priority 3 – Toilet Rooms
- Priority 4 – Additional Access

A complete copy of the checklist is included in the Appendix F – Master Checklist section. The checklist is setup in the Question and Answer style. Each item being assessed is addressed as a question, and the three available answers are “Yes”, “No” and “Not Applicable”. In most cases, an answer of Yes indicates that the particular item is in compliance with the ADA, and an answer of No indicates that the item is out of compliance. This checklist includes many helpful illustrations to not only help the person conducting the assessment to be thorough and consistent, but also to help the reader to understand the item and how it should be corrected in the case of a No answer.

The individual assessments for each building are included in Appendix F. Any time the answer to the question was Not Applicable, that line item was stricken and the data was not printed in an effort to present concise and efficient findings. Likewise, any time the answer to the questions was No, that line item was shaded so that it would easily stand out for easy identification.

Please see Section 4 – Self-Evaluation Data and Findings for executive summary statements and general compliance statements for each building, and then see Appendix F for the in-depth assessments for each building.
4. **Self-Evaluation Data and Findings**

**Sidewalks and Curb Ramps - Approach and Summary**

Sidewalks and curb ramps of Vanderburgh were recorded and placed into Arc-Map. The resulting map was then compared to the county’s record and differences were confirmed in the field. Curb ramps varied in condition across the county, see Figure 4.1 and 4.2. Overall, sidewalks were found to be in acceptable condition, though many slopes were not compliant with current ADA standards. One impassable location noted is on Elmridge Drive, Figure 4.3. Sidewalks and curb ramps can be summarized as follows*:

- 84.72 miles of sidewalks exist throughout outside of city limits in Vanderburgh County.
- 655 curb ramps exist throughout outside of city limits in Vanderburgh County.
- 202 locations have no curb ramps at all and are required to have curb ramps.

*See Appendix D for full lists of sidewalk and curb ramp locations*
Facility Assessments - Approach and Summaries

Approach

A team of architects reviewed each facility from the perspective of a public visitor to the building. The review followed the accessible route from the parking lot to the first point of contact in each relevant department within the building. This review also includes any restrooms, elevators, critical signage, drinking fountains, service counters, and fire alarm systems. The review data was recorded in spreadsheets which can be found in the Appendix F of this report. The spreadsheets are organized by the Priority of the accessible element, from Priority 1 (Access to the building) to Priority 4 (individual elements such as drinking fountains). Below are summaries for each building assessed including major observations to be addressed and associated key photographs. After the summaries, a list of budget considerations are provided for various upgrades that could improve the County’s compliance.

Facility Summaries

1.1  The Old Courthouse

- A disabled parking space has been identified but no access aisle is provided. The parking space would be complaint by painting a proper access aisle (See Image D).
- Exterior and interior signage need significant improvement. Directional signage to major public areas, elevators, and restrooms should meet ADA standards, including braille.
- The Historic door hardware is not compliant (See Image C).
- Many door thresholds in the building are higher than ¼” or ¾” sloped. These could be replaced by standard thresholds to comply.
A | Lower Level Entry

B | Ramp to Lower Level

C | Historic Hardware

D | Parking Area
1.2 Health Department

- Disabled parking spaces have been identified but none of them meet the Van Accessible requirements. The parking lot would be complaint by repainting a proper Van Accessible access aisle (See Image E) and providing a standard ADA Sign on a post.

![Image E | Lower Level Entry](image_url)
1.3 **Highway Department**

- A disabled parking space has been identified but no access aisle is provided. The parking space would be complaint by painting a proper access aisle (See Image F).

- The main entrance to the building is 2.5” higher than the adjacent sidewalk (See Image G). Sidewalk should be reworked to provide proper accessible route.

- The reception counter in the main office is higher than 36 inches high and not 36 inches long. A portion of the counter could be lowered to meet the requirement.
1.4 Weights and Measures

- The parking area for the building is a gravel lot with no designated accessible spaces. The lot needs to be paved, painted, and have proper signage installed to be compliant.
- There is very little signage on the outside of the building directing a visitor where to go (See Image H). ADA compliant signage, including braille, should be provided.
- The entrance thresholds to the building are higher than ¼” or ¾” sloped. This could be replaced by a standard threshold to comply.

[H | Garage Area]
1.5 **County Coroner’s Office**

- A disabled parking space has been identified but the access aisle is not at least 60” wide. The parking space would be complaint by painting a proper access aisle and raising the sign to above 60” (See Image J). Also, there is no Van Accessible space provided.
- The reception counter in the main office is higher than 36 inches high and there is not clear floor space of 17 – 25” under the counter. The countertop could be lowered and deepened to meet the requirement (See Image K).
- The Accessible toilet room needs some minor accessory improvements to be compliant. See Priority 3 Data in Appendix for details.
1.6  Coliseum

- There are accessible parking spaces available around the building but the markings are not very clear. The spaces need repainting and signs need to be raised above 60”.

- The facility currently uses the loading dock as the accessible access (See Image L). From a technical perspective, the loading dock slope is too steep, there are no handrails, and the thresholds along this route are too high. Also, requiring a disabled person to use a loading dock to access the building raises some dignity issues that do not comply with the intent of the ADA. The building needs a proper ADA ramp in a different location to be complaint.

- The Women’s restroom is much closer to full compliance than the Men’s restroom. The Women’s restroom needs some minor accessory improvements to be compliant. See Priority 3 Data in Appendix for details. The Men’s has some ADA accessories but the toilet compartment is too small and access is restricted, including a step near the urinal area, presumably a plumbing chase (See Image L). See Priority 3 Data in Appendix for details.

- The drinking fountain is too high to comply with ADA requirements. See Priority 4 Data in Appendix for details.
1.7 West Heights Trade School

The only facility reviewed as part of this study was the training building located in the rear of the lot. The old School No. 9 is not used, and the warehouse/storage building is not open to the public. The reviewed facility is used for emergency training purposes and includes two general use classrooms.

- The parking area does not have designated accessible spaces. The lot needs to be painted and have proper signage installed to be compliant.
- There is very little signage inside or outside of the building directing a visitor where to go. ADA compliant signage, including braille, should be provided.
- A temporary ramp is provided at entrance when needed, but not compliant (See Image Q). Minor rework of the concrete in this area could make the entrance accessible.
- The Accessible toilet room needs some minor accessory improvements to be compliant. See Priority 3 Data in Appendix for details.
1.8  **Burdette Park**

Overall Comments:

- Most drinking fountains throughout the park do not comply with ADA requirements. See Priority 4 Data in Appendix for details.
- Accessible parking spaces are not provided or properly indicated at most park destinations.
- Adequate fire alarm systems that provide audible and visual alarms are not consistently provided in facilities.
- Flooring in many facilities is not slip resistant – could use refinishing or secured mats.

Areas for improvement per building:

**Office**

- Counter height is too high for compliance
- Directional signage needs improvement
- Toilet rooms are not accessible

**Discovery Lodge**

- Parking needs ADA sign on post and van accessible space(s)
- Toilet rooms need minor accessory adjustments

**Pavilion / Storm Shelter**

- Currently no accessible parking – reconfigure / repaint spaces
- Pavilion ramp is not accessible from main office
- Main entrance is through office building; secondary entrance is through a normally locked, unmarked gate with noncompliant slope
- Ramps need proper handrails
- Storm shelter toilet rooms need minor accessory adjustments
  - Raise ADA Sign to proper height
- Counter height is too high and shallow for compliance
- Toilet room could use minor accessory improvements
Bishea Building

- Parking is compliant, but needs ADA sign on post
- Ramp is slightly too steep and requires handrail
- Exterior directional signage is needed
- Accessible entrance door threshold is too high
- Toilet rooms need proper signage and minor adjustments

Clubhouse

- Parking is shared with Shelter House #19 – no immediate accessible parking
- Slope and cross slope of exterior accessible route is too steep
- Proper directional signage is needed both on exterior and interior
- Door hardware needs improvement. See Appendix data.
- Interior space on lower level needs reconfiguration.
- Lower level is accessible from exterior only via steep slope (no elevator or lift)
- Toilet room needs significant improvement – not enough space is provided
Lakeside

- Parking is located across the street and lacks an immediate accessible parking space
- Door threshold needs rework
- Interior signage needs improvement (indicate accessible entrance to lower level from exterior)

Chalet

- Second level is only accessible via stairs
- Parking is not marked – repaint and incorporate proper signage to make compliant

First Aid

*Parking indicated is also the accessible lot for the aquatic center
- Parking needs reconfiguration, proper signage to be van accessible and located closest to accessible entrance
- Accessible route needs regarding
- Exterior directional signage needs improvement
Miniature Golf

- Parking needs reconfiguration to be marked as accessible
- Service counter is too high

Aquatic Center

*See First Aid for accessible parking
- Accessible route slope needs regrading
- Accessible interior route threshold issues need improvement
- Exterior signage needs improvement
- Accessible seating should be provided at dining facility; service counter needs reconfiguration
- Toilet rooms need toilet stall and accessory improvement

Shelter House #13

- Parking requires proper signage
- Door hardware, threshold need improvement
- Toilet rooms need minor improvement

Shelter House #18

- Parking needs proper signage
- Entrance ramp needs reconfiguration
- Door hardware, threshold could use improvement
- Interior signage needs improvement
- Toilet rooms need minor improvement

Shelter House #19

- Parking needs proper signage
- Slope, cross slope are questionable
- Interior signage at toilet rooms needs improvement
Shelter House General Comments

- Some Shelter Houses are indicated by Burdette as noncompliant or “functional,” meaning they can be used by persons with disabilities if accompanied by a non-disabled person
- The Shelter Houses with full reports are the accessible facilities, others have inaccessible entrances or noncompliant exterior access routes

Campground Shower Rooms

- Exterior signage needs improvement
- Showers are not accessible – require step up
- Toilet rooms need minor accessory improvements
1.9 Community Corrections

- The reception counter is higher than 36 inches high and there is not clear floor space of 17 – 25” under the counter. The countertop could be lowered and deepened to meet the requirement (See Image V).
- Slope seems steep outside entry (See Image W).
**Budget Considerations**

Below is a menu of improvements that could increase the ADA County’s compliance based on the issues identified in the summaries above. These are not market-tested or third-party numbers but cost opinions based on the reviewers’ industry experience that could vary based on level of finish and existing conditions.

**Priority 1**

Parking Lot Restriping – $3,000

Repainting small areas of an existing lot to allow for proper accessible spaces.

Exterior Signage – $2,000

Accessible space sign with post and directional signage to accessible entry.

New exterior ADA Ramp – $25,000 – $35,000

New exterior concrete ramp with railing, including any necessary demolition.

**Priority 2**

Interior Signage – $1,500 - $2500

Directional signage to accessible restroom(s), elevator, and other public spaces.

Entrance Thresholds – $1,000 - $2500 per opening

Replace standards thresholds, including some floor reworking in some buildings.

Reception Counters – $1,500 - $5000

Lowering and deepening reception counter with possible rework of opening.
Priority 3

Toilet Accessories – $1,500

  Adjusting existing toilet room accessories to proper dimensions, including minor painting and
  wall blocking/supports.

Restroom Remodel – $70,000

  Complete gut and remodel of existing restroom such as the Men’s at the Coliseum.

New Unisex ADA Restroom – $20,000

  New unisex restroom within an existing building.

Priority 4

Drinking Fountain – $3,000 - $4,000

  New ADA drinking fountain with possible wall/plumbing repair.
5. **Transition Plan**

   **A. Codes and Standards**
   Standards for the proper construction of sidewalks and curb ramps were developed as a part of this Transition Plan. The Standards are intended to apply all new construction undertaken within the right-of-way limits of Vanderburgh County after the final approval and adoption of the ADA Transition Plan. Copies of the code and corresponding drawing figures are included herein.

   **B. Implementation Plan**
   The implementation portion of this plan is to be used as a guide in removing the physical barriers and obstacles within the rights-of-way of the Vanderburgh County. The types of projects included in the implementation portion of the Transition Plan can be categorized as follows:

   1. Roadway and sidewalk construction and/or retrofit projects planned for the improvement of overall vehicular and pedestrian facilities. These projects would include Road Rehabilitation projects, Transportation Enhancement projects, Safe Routes to School project and other such surface transportation improvement initiatives.

   2. Curb ramp, sidewalk and intersection crosswalk retrofit projects included with road overlay or other street and/or sidewalk construction projects. Where applicable, all street and sidewalk maintenance and rehabilitation activities and projects should be programmed and developed to implement barrier removal.

   3. Curb ramp, sidewalk and intersection crosswalk retrofit activities done in conjunction with private land development projects. If public pedestrian facilities are affected during the construction of such projects, the replacement facilities should be done in accordance with the Codes and Standards listed herein.

   4. Curb ramp, sidewalk and intersection crosswalk retrofit activities done in conjunction with drainage or utility projects. Where applicable, any disturbance to the existing public pedestrian facilities by public or private utility companies should be restored in accordance with the Codes and Standards listed herein.

   **C. Prioritized Rankings of Facilities**
   Because Vanderburgh County has a relatively large number of facilities, it is impossible to immediately remove all known barriers to access. Barriers in facilities will be removed systematically, County-wide, to ensure equality among all programs. It is the intent of Vanderburgh County to address barriers to accessibility in it public buildings and parks within a reasonable time frame, depending on the immediate necessity, degree of complexity, and overall cost.
Vanderburgh County reserves the right to modify barrier removal priorities in order to allow for flexibility in accommodating community requests, petitions for reasonable modifications from persons with disabilities, changes in County programs, as well as funding constraints and opportunities. It is the goal of this Transition Plan to provide access to the programs, activities and services provided by the County. Interim measures will be explored and implemented in order to provide programmatic access to the public pending the implementation of physical barrier removal projects.

When reviewing the assessments and setting priorities for each building, the following recommendations are intended as guidance in developing the schedule of improvements:

Priority One: The highest priority should be placed on those barrier removal items that provide accessibility at the main entrance of a facility or improve a path of travel to the portion of the facility where program activities take place. Examples are as follows:

1. Connection to the public right-of-way
2. Parking and passenger loading
3. Entrance walks
4. Entrance ramps
5. Entrance stairs
6. Entrance doors

Priority Two: A second level priority should be placed on those barrier removal items that improve or enhance access to program use areas. Examples are as follows:

1. Transaction counters
2. Conference and meeting rooms
3. Public offices
4. Sports fields and courts
5. Public restrooms

Priority Three: A third level priority should be placed on those barrier removal items that improve access to amenities serving program areas. Examples are as follows:

1. Drinking fountains
2. Public telephones
3. Vending machines

Priority Four: A fourth and lowest level of priority is used to identify areas or features not required to be modified for accessibility because there are no public programs located in this space, or because there are similar features located nearby that reasonably provide programmatic access.
D. Funding Strategies
The County intends to fund the implementation of barrier removal in two different ways. First, for smaller, less expensive items such as toilet room grab bars, braille signage, and door hardware, the County will designate a budgetary line item of not less than $5,000.00 per year that will be used to purchase the various pieces of hardware, and the County’s existing building maintenance staff will do the installations.

Second, for major projects that require specific allocation of funds by the County Council and County Commissioners, the projects shall be undertaken and completed as funding allows. Projects such as this are intended to include major remodeling or reconstruction of existing facilities to correct non-compliance.

E. Steering Committee
The County shall create an on-going ADA Steering Committee that will provide guidance and recommendations to the County Commissioners in developing the actual work program for barrier removal. The Committee shall meet as needed, but not less than on a biennial basis. The County shall provide the following functions:

1. Provide a recommended sequential order of work for the minor projects. Examples of this may include providing a recommendation to correct all the minor deficiencies in a single facility before moving on to the next, or perhaps correcting one deficient aspect (such as toilet room grab bars or braille signage) in every facility. In either case, the Committee shall provide the recommended order that the facilities will be ranked. For example, buildings where public meetings and/or County business is conducted should be corrected before parks and recreational buildings.

2. Provide a recommendation as to whether any given County facility is worth the expenditure of the needed funds to bring it into compliance. In some cases, it may be more cost effective to replace a building or relocate the office/service than to bring it into compliance.

3. Provide a recommended sequential order of work for major projects.

The Committee shall be made up of the following members:

- One County Commissioner
- At least one County Council Member
- County Highway Superintendent
- County Maintenance Director
- One local healthcare professional
- One local clergy person
- One local business leader
- One City Council member from the Evansville
- Other members as directed by the County Commissioners
Grievance Policy and Complaint Procedure

If a person (or group of people) believes he or she may have been the victim of discrimination based on his or her disability, that person (or group of people) may file a grievance against the county. To expedite this process, Vanderburgh County has adopted a policy that covers the process that the person (or group of people) should follow to file the grievance, as well as the process that the county must follow in evaluating and resolving the grievance. A copy of the policy and the official grievance form are included in this plan.

Vanderburgh County will keep copies of all grievances filed, along with all paper work regarding the evaluation and resolution thereof for a minimum of six (6) years.

Vanderburgh County strives to maintain the rights of its citizens at every level of government. Therefore, the county’s grievance policy and procedure were developed such that a grievant could complete the local grievance procedure and appeal, if needed, and still have the opportunity to file a grievance with a state or federal agency within the known allowable timeframes from the date of the alleged discrimination.
6. **Glossary**

The ADA, the “Title II Technical Assistance Manual” and “ADA Best Practices Tool Kit for State and Local Governments” defines many of the terminology used throughout the act and this Transition Plan. The following is a summary of these definitions.

**AASHTO.** American Association of State Highway and Transportation Officials

**Accessible.** Refers to a site, facility, work environment, service, or program that is easy to approach, enter, operate, participate in, and/or use safely and with dignity by a person with a disability.

**ADA.** American Disabilities Act as contained at 42 U.S.C 12101 et seq.

**ADAAG.** Americans with Disabilities Act Accessibility Guidelines contains guidelines issued by the United States Architectural and Transportation Barriers Compliance Board. It is important to note that these guidelines are not enforceable standards.

**APS.** Accessible Pedestrian Signal(s)

**APWA.** American Public Works Association

**Auxiliary Aids and Services.** Includes—

1. Qualified interpreters or other effective methods of making orally delivered materials available to individuals with hearing impairments;
2. Qualified readers, taped texts or other effective methods of making visually delivered materials available to individuals with visual impairments;
3. Acquisition or modification of equipment or devices; and other similar services and actions.

**CIP.** Capital Improvement Plan

**Complaint.** A claimed violation of the ADA.

**Compliant Curb Ramp.** A curb ramp constructed to comply with state and/or federal law (whichever provides the higher access standard) in place at the time of construction. In the case of a location where it is structurally impracticable or technically infeasible to build a fully compliant curb ramp, or where construction of a fully compliant curb ramp would constitute a Fundamental Alteration of a service, program or activity of the City or County, or an Undue Burden on the City or County, a curb ramp that complies with access standards, or was constructed to the standards existing at the time of construction, or to the maximum extent feasible, will constitute a Compliant Curb Ramp as long as the requirements set forth in this Transition Plan for justifying the reasons for the City or County to avoid full compliance are met.

**Curb Ramp.** A short ramp cutting through a curb or built up to it allowing an accessible route that people with disabilities can use to safely transition from a roadway to a curbed sidewalk and vice versa.
**Detectable Warnings:** A surface feature built in or applied to walking surfaces or other elements to warn of hazards on a pedestrian access path.

**Disability.** With respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of such individual; a record of such an impairment; or being regarded as having such an impairment.

**Discrimination on the basis of disability.** No qualified individual with a disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of services, programs, or activities of a public entity, or be subjected to discrimination by any such entity. This includes:

1. Limit, segregate, or classify a citizen in a way that may adversely affect opportunities or status because of the person’s disability;
2. To participate in a contract that could subject a qualified citizen with a disability to discrimination;
3. To use any standards, criteria or methods of administration that have the effect of discriminating on the basis of disability; to deny equal benefits because of a disability;
4. To fail to make reasonable accommodations to known physical or mental limitations of an otherwise qualified individual unless it can be shown that the accommodation would impose an undue burden on the City or County’s operations.

**DOJ/USDOJ.** United States Department of Justice

**DOT/USDOT.** United States Department of Transportation

**Facility.** Means all or any portion of buildings, structures, sites, complexes, equipment, rolling stock or other conveyances, roads, walks, passageways, parking lots, or other real or personal property, including the site where the building, property, structure, or equipment is located.

**Has a record of such an impairment.** Means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

**Is regarded as having an impairment.** Means—

1. Has a physical or mental impairment that does not substantially limit major life activities but that is treated by a public entity as constituting such a limitation;
2. Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or
3. Has none of the impairments defined in paragraph (1) of this definition but is treated by a public entity as having such an impairment.

**Major life activities.** Means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.
**Pedestrian Generator Map.** A Pedestrian Generator Map identifies land uses that are most likely to create pedestrian trips either to or from them. For the purpose of the Transition Plan, pedestrian generators were placed into one of three categories: Priority Level 1 (Create a high number of pedestrian trips), Priority Level 2 (Create a moderate number of pedestrian trips), or Priority Level 3 (Create a low number of pedestrian trips). A detailed list of land uses and its assigned priority level is shown in Table 1.

**Pedestrian Right-of-Way.** Portion of land area owned by the city or county and provided by dedication for use by the public through walking, wheelchair or other non-automobile device.

**Physical or Mental Impairment.** Means—

1. Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological, musculoskeletal, special sense organs, respiratory (including speech organs), cardiovascular, reproductive, digestive, genitourinary, hemic and lymphatic, skin, and endocrine;
2. Any mental or psychological disorder such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.
3. The phrase *physical or mental impairment* includes, but is not limited to, such contagious and noncontagious diseases and conditions as orthopedic, visual, speech and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, specific learning disabilities, HIV disease (whether symptomatic or asymptomatic), tuberculosis, drug addiction, and alcoholism.
4. The phrase *physical or mental impairment* does not include Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders; Compulsive gambling, kleptomania, or pyromania; or Psychoactive substance use disorders resulting from current illegal use of drugs.

**Public Entity.** Means—

1. Any State or local government;
2. Any department, agency, special purpose district, or other instrumentality of a State or States or local government.
3. Certain commuter authorities as well as AMTRAK.

**Public Right of Way Accessibility Guidelines (PROWAG).** This document reflects the best practices for designing accessible pedestrian facilities.

**Qualified Individual with a Disability.** An individual with a disability who, with or without reasonable modifications to rules, policies, or practices, the removal of architectural, communication, or transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a public entity.
**Readily Achievable.** Easily accomplishable and able to be carried out without much difficulty or expense. Examples include lowering mirrors, install side ramping of a few steps, installation of grab bars where only routine reinforcement of the wall is required and similar modest adjustments.

**Reasonable Accommodation.** All public entities must make “reasonable accommodation” to the known physical or mental limitations of otherwise qualified applicants or employees with disabilities, unless the public entity can show that the accommodation would impose an “undue hardship” on the operation of its program.

**Reasonable Modification.** An adjustment to rules policies or procedures to accommodate an individual whose disability makes it impossible to comply otherwise when such adjustment does not fundamentally alter the nature of the program, service or activity. Example:

(1) Granting a variance in the zoning requirement when a ramp is installed to the front entrance of a building but will encroach on the established set-back by three feet.

**Self-Evaluation.** Means—

(1) A public entity shall, within one year of the effective date of this part, evaluate its current services, policies, and practices, and the effects thereof, that do not or may not meet the requirements of this part and, to the extent modification of any such services, policies, and practices is required, the public entity shall proceed to make the necessary modifications.

(2) A public entity shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the self-evaluation process by submitting comments.

(3) A public entity that employs 50 or more persons shall, for at least three years following completion of the self-evaluation, maintain on file and make available for public inspection:
   (a) A list of the interested persons consulted;
   (b) A description of areas examined and any problems identified; and
   (c) A description of any modifications made.

**Structurally Impracticable.** Changes having little likelihood of being accomplished without removing or altering a load bearing structural member and/or incurring an increased cost of 50 percent or more of the value of the element of the facility or building involved.

**Technically Infeasible.** With respect to an alteration of an existing element, that it has little likelihood of being accomplished because existing physical or site constraints prohibit modification or addition of elements, spaces, or features to bring the element into full and strict compliance with the minimum requirements for new construction and which are necessary to provide accessibility.

**Transition plan.**

(1) In the event that structural changes to facilities will be undertaken to achieve program accessibility, a public entity that employs 50 or more persons shall develop a transition plan setting forth the steps necessary to complete such changes. A public entity shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the development of the transition plan.
by submitting comments. A copy of the transition plan shall be made available for public inspection.

(2) If a public entity has responsibility or authority over streets, roads, or walkways, its transition plan shall include a schedule for providing curb ramps or other sloped areas where pedestrian walks cross curbs, giving priority to walkways serving entities covered by the Act, including State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas.

(3) The plan shall, at a minimum—
   
   (a) Identify physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities;
   
   (b) Describe in detail the methods that will be used to make the facilities accessible;
   
   (c) Specify the schedule for taking the steps necessary to achieve compliance with this section and, if the time period of the transition plan is longer than one year, identify steps that will be taken during each year of the transition period; and
   
   (d) Indicate the official responsible for implementation of the plan.

**Undue Burden.** An action requiring significant difficulty or expense when considering the nature and cost of the accommodation in relation to the size, resources, and structure of the specific operation.
Appendix A: Guidance Document from Troy Woodruff, INDOT Chief of Staff
August 2, 2012

All Local Public Agencies (LPA)

RE: LPA Annual Pre-Award Certification and the Americans with Disabilities Act (ADA) and Section 504 of the Vocational Rehabilitation Act (Section 504)

Due to several questions we at the Indiana Department of Transportation (INDOT) have received regarding the LPA Annual Pre-Award Certification, the Americans with Disabilities Act (ADA) and Section 504 of the Vocation Rehabilitation Act of 1973 (Section 504), I want to explain the purpose of the pre-award certification and briefly list the minimum requirements an local community must meet to comply with the nondiscrimination laws as they relate to persons with a disability. I strongly encourage all local communities to strive to exceed the minimum requirements and show that Indiana is committed to ensuring equal access to all persons.

Earlier this year INDOT notified local communities via the Local Technical Assistance Program (LTAP) that we developed an electronic self-reporting tool, the local community Annual Pre-Award Certification and Assurance, for locals. The purpose of this self-reporting tool is to assist INDOT in gathering baseline information to monitor local community compliance with the relevant civil rights laws. The LPA Annual Pre-Award Certification and Assurance is a short survey that outlines the basic requirements for compliance with the relevant nondiscrimination laws. The information reported will be shared with the Federal Highway Administration (FHWA). Additionally, the information will be used to monitor the good faith efforts of a local community to comply with the nondiscrimination laws.

Each local community was required to complete the LPA Annual Pre-Award Certification and Assurance by June 30, 2012. If your community has not completed the LPA Annual Pre-award Certification and Assurance, please do so immediately. Those entities that do not complete the LPA Annual Pre-Award Certification and Assurance will receive a notice in September.

As a part of your contractual agreement with INDOT, you must voluntarily comply with the relevant nondiscrimination laws. Failure to make a good faith effort to comply with these laws could result in a deferral of funding for a local community’s projects pending the local community voluntarily coming into compliance.

Under the ADA and Section 504, a local community should at a minimum:

1. Designate an employee of the local community as an ADA/504 Coordinator, who is responsible for overseeing compliance with the nondiscrimination laws as they relate to persons with a disability.
2. Develop and distribute on an ongoing basis a notice to the public regarding their rights under the ADA and Section 504 and the local community’s responsibilities under the law. A model nondiscrimination statement containing the minimum requirements for a nondiscrimination statement is available on the Department of Justice (DOJ) website at: http://www.ada.gov//pcatoolkit/chap2toolkit.htm.

3. Develop and/or adopt a grievance or complaint procedure that provides for prompt and equitable resolution of complaints. A model grievance or complaint procedure containing the minimum requirements for a nondiscrimination statement is available on the DOJ website at: http://www.ada.gov//pcatoolkit/chap2toolkit.htm.

4. Develop and/or adopt accessibility standards, specifications and design details. Design standards should reflect the most current Americans with Disabilities Act Accessibility Guidelines (ADAAG) for buildings. The current ADA standards are available on the Access Board website at: http://www.access-board.gov/ada/. A local community’s design standards for pedestrian facilities may reflect the draft Public Right of Way Accessibility Guidelines (PROWAG). Although, the PROWAG is currently in rulemaking, INDOT strongly encourages the use of the PROWAG since it reflects the best practices for designing accessible pedestrian facilities. The PROWAG is available on the Access Board website at: http://www.access-board.gov/prowag/.

5. Complete a self-evaluation and inventory of all of its facilities, programs, policies and activities to evaluate whether there are access barriers for persons with disabilities. To avoid a duplication of efforts, communities located within the jurisdiction of a Metropolitan planning Organization (MPO) planning area should contact their MPO before beginning their inventory. Many MPOs have begun inventories of their planning areas.

6. Develop an ADA/504 plan for removing the access barriers identified in its inventory that includes a budget and schedule for improvements. All local communities receiving federal funds are required to have a transition plan. Additionally, all local communities with 50 or more employees, regardless of whether they receive federal funds, must have a plan.

7. Implement its accessibility plan and regularly monitor progress at removing barriers. INDOT recommends a reevaluation occur at least once every three to five years.

All INDOT local communities should have an initial ADA/504 plan completed by December 31, 2012.
These are the minimum requirements for compliance with the applicable disability nondiscrimination laws. Commencing Augus: 6, 2012, the INDOT District Customer Service Manager will contact you to confirm you have received the letter and will request information regarding the status of your Transition Plan.

The information in this letter is intended as guidance for recipients of funds from INDOT and should not be interpreted as legal advice. Each local community has the ongoing responsibility to comply with the civil rights laws, including the ADA and Section 504. Furthermore, each local community must develop an accessibility plan for the removal of access barriers that meets their unique needs as a community based on their available resources. There is not a template or boilerplate transition plan that would serve the needs of all local communities. If you have specific questions regarding how to comply with the law, please contact independent counsel.

Additional resources, including sample plans, are available on the INDOT LPA/MPO webpage: http://www.in.gov/indot/2390.htm. INDOT wants to provide as many resources as possible; however, INDOT cannot provide legal advice regarding the adequacy of a local community’s self-evaluation/inventory or ADA/504 plan. Should you have any general questions regarding the ADA or Section 504 that relate to doing business with INDOT, please contact:

Latosha N. Higgins
Title VI/ADA Program Manager
(317) 234-6142
lhiggins@indot.in.gov.

For technical questions regarding accessing the LPA Annual Pre-Award Certification and Assurance via the INDOT Technical Application Pathway (ITAP), please contact:

Ann Bishop
Grants and Special Initiatives Coordinator
abishop1@indot.in.gov.

This letter should serve as the prevailing guidance from INDOT

Thank you for your attention to this matter.

Sincerely,

[Signature]

Troy A. Woodruff
INDOT Chief of Staff
Appendix B: Construction Standards for New Sidewalks
APPENDIX B – CONSTRUCTION STANDARDS FOR NEW SIDEWALKS

SPECIAL PROVISIONS

NOTICE: These Special Provisions amend or supplement Section 604 – SIDEWALKS, CURB RAMPS, STEPS, AND HANDRAILS as written in the Indiana Department of Transportation Standard Specifications dated 2012. All provisions which are not so amended or supplemented remain in full force and effect.

Copies of the Standard Specifications can be downloaded from the INDOT website at www.in.gov/dot.

Indiana Department of Transportation Standard Specifications
SECTION 604 – SIDEWALKS, CURB RAMPS, STEPS, AND HANDRAILS

Section 604.03(a) General Requirements
DELETE the following language from the first paragraph:
Poles shall be located so as not to impede the usage or safety of the curb ramps.
DELETE the last paragraph of the subsection.
ADD the following language to the Section:
Curb ramps, blended transitions or a combination thereof must connect the Pedestrian Access Route (PAR) to each pedestrian street crossing. Curb ramps and blended transitions must be wholly contained within the pedestrian street crossing served. Typically, two (2) curb ramps must be provided at each street corner. In alterations where existing physical constraints prevent two (2) curb ramps from being installed at a street corner, a single diagonal curb ramp is permitted to be installed.

The continuous clear width of the Pedestrian Access Route shall be no less than four (4) feet, exclusive of the width of the curb. Where sidewalks are wider than four (4) feet, only a portion of the sidewalk is required to comply with the requirements of the Americans with Disabilities Act (ADA).

Where the clear width of the Pedestrian Access Route (PAR) is less than five (5) feet, passing spaces shall be provided at intervals of 200 feet maximum. Passing spaces shall be five (5) feet by five (5) feet minimum. Passing spaces are permitted to overlap PAR’s.

Where PAR’s are contained within a street or highway Right-of-Way, the grade of the PAR shall not exceed the general grade established for the adjacent street or highway. Where PAR’s are not contained within a street or highway Right-of-Way, the grade of the PAR shall be five (5) percent maximum.

A turning space four (4) feet minimum by four (4) feet minimum shall be provided at the top of each curb ramp and shall be permitted to overlap other turning spaces and clear spaces.
The running slope of the curb ramp shall cut through or shall be built up to the curb at right angles or shall meet the gutter grade break at right angles where the curb is curved. The running slope of the ramp shall be five (5) percent minimum and 8.3 percent maximum but shall not require the length of the ramp to exceed 15 feet. The running slope of the turning space shall be two (2) percent maximum.

Section 604.05 Reconstructed PCC Sidewalks

MODIFY the last paragraph to read as follow:
The new sidewalk shall have a joint pattern similar to the surrounding sidewalk with spacing at no greater than every six (6) feet. One half (1/2) inch transverse expansion joints shall be placed not more than 40 feet apart and one half (1/2) inch expansion joints shall be placed along intersecting sidewalks, yard walks, carriage walks, curb ramps, and street curbing. Sidewalks placed at residential drives shall be six (6) inches thick, or the same depth of the existing drive whichever is greater. Sidewalks placed at commercial drives shall be nine (9) inches thick, or the same depth of the existing drive, whichever is greater.
NOTE:
1. Per 150.110(F), all sidewalks adjacent to curb ramps shall be finished with a wooden float with broom finish.
2. All outside edges shall be edged with 1/4 inch radius tool.

CURB RAMP, TYPE "A"

1. Per 150.110(F), All Sidewalks Adjacent To Curb Ramps Shall Be Finished With A Wooden Float With Broom Finish.
2. All Outside Edges Shall Be Edged With 1/4 Inch Radius Tool.
3. See 154.062 For Specification For Curing Concrete.

VANDERBURGH COUNTY, INDIANA

150.110 SIDEWALKS
FIG. 11, DETAILS
Appendix C: Grievance Policy, Procedure and Form
Vanderburgh County, Indiana
Grievance Procedure under
the Americans with Disabilities Act

This Grievance Procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"). It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by Vanderburgh County. The County Employee Handbook set forth in chapter 2.90 of the Vanderburgh County Code governs employment-related complaints of disability discrimination.

Any person who has a complaint regarding the County’s alleged non-compliance with the ADA may file a complaint. The complaint should be submitted by the grievant and/or his/her designee as soon as possible, but no later than 60 calendar days after the alleged incident. The complaint should be in writing and it should contain information about the alleged incident including the name, address, phone number of complainant and location, date, a description of the problem, and your suggestions for resolving the problem.

We would ask that all grievance complaints be submitted on the attached form, and sent to the following address:

President
Board of Commissioners of Vanderburgh County
305 Civic Center Complex
1 N.W. Martin Luther King Jr. Blvd.
Evansville, IN  47708

Alternative means of filing complaints, such as personal interviews or a tape recording of the complaint, will be made available for persons with disabilities upon request.

Upon receipt of a complaint, the President of the Vanderburgh County Commissioners shall forward the complaint to the Vanderburgh County ADA Coordinator. Within 30 calendar days after receipt of the complaint, the ADA Coordinator or his/her designee shall meet with the complainant to discuss the complaint and possible resolutions to the same. Within 30 calendar days of the meeting, the ADA Coordinator or his/her designee shall respond in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The response will explain the position of Vanderburgh County and offer options for substantive resolution of the complaint.

If the response by the ADA Coordinator or his/her designee does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 30 calendar days after receipt of the response to the Board of Commissioners of Vanderburgh County.
Within 30 calendar days after receipt of the appeal one member of the Board of Commissioners of Vanderburgh County shall meet with the complainant to discuss the complaint and possible resolutions. Within 30 calendar days after such meeting, the Board of Commissioners of Vanderburgh County will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.

All written complaints received, all appeals to the Board of Commissioners of Vanderburgh County, and all responses to the complaints and appeals will be retained by Vanderburgh County for at least three years.

The right of a person to a prompt and equitable resolution of the complaint filed hereunder shall not be impaired by the person's pursuit of other remedies such as the filing of an ADA complaint with the responsible federal department or agency. Use of this grievance procedure is not a prerequisite to the Complainant’s pursuit of other available remedies available by law.
# Vanderburgh County ADA Complaint Form

**Instructions:** Please fill out this form completely. Please note that this form shall be filed for complaints regarding facilities, services, and/or programs owned and/or operated by Vanderburgh County. Sign and return this original form with your signature to the following address:

President, Board of Commissioners of Vanderburgh County  
305 Civic Center Complex  
1 NW M.L. King Jr. Blvd  
Evansville, IN 47708

<table>
<thead>
<tr>
<th>Your Name (Complainant):</th>

**Lavatories**

| 3.21 | Does at least one lavatory have a clear floor space for a forward approach at least 30" wide and 48" long? | Yes |
| 3.22 | Do no less than 17" and no greater than 25" of the clear floor space extend under the lavatory so that a person using a wheelchair can get close enough to reach the faucet? | Yes | Measurement: |
| 3.23 | Is the front of the lavatory or counter surface, whichever is higher, no more than 34" above the floor? | Yes | Measurement: 34 inches |
| 3.24 | Is there at least 27" clearance from the floor to the bottom of the lavatory that extends at least 8" under the lav for knee clearance? | Yes | Measurement: |
| 3.25 | Is there toe clearance at least 9" high? | Yes | Measurement: |
| 3.26 | Are pipes below the lavatory insulated or otherwise configured to protect against contact? | No |

**Soap Dispensers and Hand Dryers**

| 3.28 A | Are the operable parts of the soap dispenser within one of the following ranges: Above lavatories or counters no less than 20" and no greater than 25" deep: no higher than 44" above the floor? | Yes | Measurement: |
| 3.28 B | Above lavatories less than 20" deep: no higher than 48" above the floor? | Yes | Measurement: 40 inches |
| 3.29 C | Not over an obstruction: no higher than 48" above the floor? | Yes | Measurement: 48 inches |
| 3.29 D | Can the operable parts of the hand dryer or towel dispenser be operated without tight grasping, pinching, or twisting of the wrist? | Yes |
| 3.29 E | Is the force required to activate the hand dryer or towel dispenser no greater than 5 lbs.? | Yes |

**Water Closets in Single-Use Toilet Rooms and Compartments (Stalls)**

<p>| 3.3 | Is the centerline of the water closet no less than 16&quot; and no greater than 18&quot; from the side wall or partition? | Yes | Measurement: 17 inches |
| 3.31 | Is clearance provided around the water closet measuring at least 60&quot; from the side wall and at least 56&quot; from the rear wall? | Yes | Measurement: inches |
| 3.32 | Is the height of the water closet no less than 17&quot; and no greater than 19&quot; above the floor measured to the top of the seat? | Yes | Measurement: inches |
| 3.33 A | Is there a grab bar at least 42&quot; long on the side wall? | No | Measurement: 25 inches |
| 3.33 B | Is the grab bar located no more than 12&quot; from the rear wall? | Yes | Measurement: inches |
| 3.33 C | Does the grab bar extend at least 54&quot; from the rear wall? | No | Measurement: 30 inches |
| 3.33 D | Is the grab bar mounted no less than 33&quot; and no greater than 36&quot; above the floor to the top of the gripping surface? | Yes | Measurement: 33 inches |
| 3.33 E | Is there at least 12&quot; clearance between the grab bar and any protruding objects above? | Yes | Measurement: 8 inches |
| 3.33 F | Is there at least 1-1/2&quot; clearance between the grab bar and projecting objects below? | Yes | Measurement: inches |
| 3.33 G | Is the space between the wall and the grab bar 1-1/2 inches? | Yes | Measurement: | inches |
| 3.34 A | Is there a grab bar at least 36&quot; long on the rear wall? | Yes | Measurement: | 36 | inches |
| 3.34 B | Does the grab bar extend at least 12&quot; from the centerline of the water closet on one side (side wall)? | Yes | Measurement: | inches |
| 3.34 C | Does it extend at least 24&quot; on the other (open) side? | Yes | Measurement: | inches |
| 3.34 D | Is it mounted no less than 33&quot; and no greater than 36&quot; above the floor to the top of the gripping surface? | Yes | Measurement: | inches |
| 3.34 E | Are there at least 12&quot; clearance between the grab bar and the protuding objects above? | Yes | Measurement: | inches |
| 3.34 F | Are there at least 1-1/2&quot; clearance between the grab bar and projecting objects below? | Yes | Measurement: | inches |
| 3.34 G | Is the space between the wall and the grab bar at least 1-1/2&quot; ? | Yes | Measurement: | inches |
| 3.35 | If the flush control is hand operated, is the operable part located no higher than 48&quot; above the floor? | Yes | Measurement: | inches |
| 3.36 A | If the flush control is hand operated, can it be operated with one hand and without tight grasping, pinching, or twisting of the wrist? | Yes | | |
| 3.36 B | Is the force required to activate the flush control no greater than 5lbs? | Yes | | |</p>
